

# Free PDF Quiz 2025 Fortinet FCP\_FCT\_AD-7.2: FCP—FortiClient EMS 7.2 Administrator—High-quality Dumps Discount

What's more, part of that ActualtestPDF FCP\_FCT\_AD-7.2 dumps now are free: <https://drive.google.com/open?id=1m7MKgYinMUE1VgLLLe-i2tdVcHMgBukHk>

With the pass rate reaching 98.75%, our FCP\_FCT\_AD-7.2 test materials have gained popularity in the international market. Many candidates have recommended our products to their friends. In addition, FCP\_FCT\_AD-7.2 exam materials are edited by skilled professionals, and they possess the professional knowledge for the exam, therefore you can use the exam materials at ease. Free demo for FCP\_FCT\_AD-7.2 Exam Dumps are available, and you can have a try before buying , so that you can have a better understanding of what you are going to buy.

## Fortinet FCP\_FCT\_AD-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Security Fabric integration: The topic focuses on Security Fabric integration with FortiClient EMS, automatic quarantine of compromised endpoints, ZTNA solution, and IP</li><li>MAC ZTNA filtering.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>FortiClient EMS setup: This topic discusses the initial configuration of FortiClient EMS, the configuration of Chromebooks, and configuration of FortiClient EMS features.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Diagnostics: It analyzes diagnostic information to troubleshoot issues related FortiClient EMS and FortiClient. Moreover, it focuses on resolving common FortiClient deployment and implementation issues.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>FortiClient provisioning and deployment: It discusses deployment of FortiClient on Windows, macOS, iOS, and Android endpoints, and configuration of endpoint profiles.</li></ul>

## Valid Fortinet FCP\_FCT\_AD-7.2 Test Sample | FCP\_FCT\_AD-7.2 Test Collection

What we provide for you is the latest and comprehensive FCP\_FCT\_AD-7.2 exam dumps, the safest purchase guarantee and the immediate update of FCP\_FCT\_AD-7.2 exam software. Free demo download can make you be rest assured to buy; one-year free update of FCP\_FCT\_AD-7.2 Exam software after payment can assure you during your preparation for the exam. What's more, what make you be rest assured most is that we develop the exam software which will help more candidates get FCP\_FCT\_AD-7.2 exam certification.

### Fortinet FCP—FortiClient EMS 7.2 Administrator Sample Questions (Q37-Q42):

#### NEW QUESTION # 37

Refer to the exhibit, which shows the output of the ZTNA traffic log on FortiGate.

What can you conclude from the log message?

- A. The remote user connection does not match the ZTNA rule configuration.
- B. The remote user connection does not match the ZTNA firewall policy.
- C. The remote user connection does not match the ZTNA server configuration.
- D. The remote user connection does not match the local-in policy.

**Answer: A**

Explanation:

Observation of ZTNA Traffic Log:

The log message indicates that the remote user connection was denied due to failure to match a proxy policy.

Evaluating Log Message:

The message suggests that the connection does not match the existing ZTNA rule configuration, leading to the denial.

Conclusion:

The correct conclusion from the log message is that the remote user connection does not match the ZTNA rule configuration (B).

Reference:

ZTNA traffic log analysis and configuration documentation from the study guides.

#### NEW QUESTION # 38

Refer to the exhibits.

## Security Fabric Settings

### ☒ FortiGate Telemetry

Security Fabric role **Serve as Fabric Root** Join Existing Fabric

Fabric name Fabric

Topology  FGVM010000052731 (Fabric Root)

Allow other FortiGates to join ☒  port3  +

Pre-authorized FortiGates None  Edit

SAML Single Sign-On  ☐

Management IP/FQDN  **Use WAN IP** Specify

Management Port **Use Admin Port** Specify

### ☒ FortiAnalyzer Logging

IP address 10.0.1.250

Test Connectivity

Logging to ADOM root

Storage usage  144.55 MiB / 50.00 GiB

Analytics usage  91.02 MiB / 35.00 GiB

(Number of days stored: 55/60)

Archive usage  53.53 MiB / 15.00 GiB

(Number of days stored: 54/365)

Upload option  **Real Time** Every Minute Every 5 Minutes

SSL encrypt log transmission

Allow access to FortiGate REST API

Verify FortiAnalyzer certificate  FAZ-VMTM19008187

### ☒ FortiClient Endpoint Management System (EMS)

Name EMSServer 

IP/Domain Name 10.0.1.100

Serial Number FCTEMS0000100991

Admin User admin

Password ..... 

Hostname: EMSServer

Listen on IP: 10.0.1.100

Use FQDN: ☒

FQDN: fortiserver

Remote HTTPS access: ☐

SSL certificate: No certificate imported

Based on the FortiGate Security Fabric settings shown in the exhibits, what must an administrator do on the EMS server to successfully quarantine an endpoint when it is detected as a compromised host (IoC)?

- A. The administrator must enable SSH access to EMS.
- B. The administrator must enable FQDN on EMS.
- C. The administrator must authorize FortiGate on FortiAnalyzer.
- D. The administrator must enable remote HTTPS access to EMS.

**Answer: D**

Explanation:

Based on the FortiGate Security Fabric settings shown in the exhibits, to successfully quarantine an endpoint when it is detected as a compromised host (IOC), the following step is required:

Enable Remote HTTPS Access to EMS: This setting allows FortiGate to communicate securely with FortiClient EMS over HTTPS. Remote HTTPS access is essential for the quarantine functionality to operate correctly, enabling the EMS server to receive and act upon the quarantine commands from FortiGate.

Therefore, the administrator must enable remote HTTPS access to EMS to allow the quarantine process to function properly.

Reference

FortiGate Infrastructure 7.2 Study Guide, Security Fabric and Integration with EMS Sections Fortinet Documentation on Enabling Remote HTTPS Access to FortiClient EMS

#### NEW QUESTION # 39

Refer to the exhibit. Based on The settings shown in The exhibit, which statement about FortiClient behaviour is Hue?

**FORTINET**  
AntiVirus Protection ☒

— Settings

- ☒ Scan files as they are downloaded or copied to my system
- ☐ Dynamic threat detection using threat intelligence data
- ☐ Block malicious websites
- ☒ Block known attack communication channels

— Scheduled Scan

Schedule Type: Monthly

Scan On: 1

Start (HH:MM): 19:30

Scan Type: Full Scan

☐ Disable Scheduled Scan

— Exclusions

Add/remove files or folders to exclude from scanning

C:\Desktop\Resources\

- A. FortiClient scans infected files when the user copies files to the Resources folder.
- B. FortiClient copies infected files to the Resources folder without scanning them.
- C. FortiClient blocks and deletes infected files after scanning them.
- D. FortiClient quarantines infected files and reviews later, after scanning them.

**Answer: A**

**Explanation:**

Based on the settings shown in the exhibit, FortiClient is configured to scan files as they are downloaded or copied to the system. This means that if a user copies files to the "Resources" folder, which is not listed under exclusions, FortiClient will scan these files for infections. The exclusion path mentioned in the settings, "C:\Users\Administrator\Desktop\Resources", indicates that any files copied to this specific folder will not be scanned, but since the question implies that the "Resources" folder is not the same as the excluded path, FortiClient will indeed scan the files for infections.

## NEW QUESTION # 40

**Exhibit.**

Icon	Source	Message	Time
Info	Deployment Service	Host WIN-EFVKBEA3S71 entered deployment state 230 (Initial error)	1 time since 2019-05-
Error	Deployment Service	Failed to install FortiClient on endpoint net-WIN-EFVKBEA3S71. Error c...	1 time since 2019-05-
Info	Deployment Service	Failed to install FortiClient on endpoint net-WIN-EFVKBEA3S71. Error c...	1 time since 2019-05-

Info	Deployment Service	Host WIN-EFVKBEA3S71 entered deployment state 70 (Pending depl...	1 time since 2019-05-
Info	Deployment Service	Host WIN-EFVKBEA3S71 entered deployment state 30 (Probed)	1 time since 2019-05-

Installer: FortiClient- No Connections

Profile: Fortinet-Trak

Gateway List: Corp

Based on the logs shown in the exhibit, why did FortiClient EMS fail to install FortiClient on the endpoint?

- A. The FortiClient antivirus service is not running.
- B. The Windows installer service is not running.
- C. The task scheduler service is not running.
- D. The remote registry service is not running.

**Answer: C**

**Explanation:**

<https://community.fortinet.com/t5/FortiClient/Technical-Note-FortiClient-fails-to-install-from-FortiClient-EMS/> The deployment service error message may be caused by any of the following. Try eliminating them all, one at a time.

1. Wrong username or password in the EMS profile
2. Endpoint is unreachable over the network
3. Task Scheduler service is not running
4. Remote Registry service is not running
5. Windows firewall is blocking connection

## NEW QUESTION # 41

Which component or device shares ZTNA tag information through Security Fabric integration?

- A. FortiClient EMS
- B. FortiClient
- C. FortiGate Access Proxy
- D. FortiGate

**Answer: A**

**Explanation:**

FortiClient EMS is the component that shares ZTNA tag information through Security Fabric integration. ZTNA tags are synchronized from FortiClient EMS as inputs for the FortiGate application gateway. They can be used in ZTNA policies as security posture checks to ensure certain security criteria are met. FortiClient EMS can share ZTNA tags across multiple devices in the Fabric, such as FortiGate, FortiManager, and FortiAnalyzer. FortiClient EMS can also share ZTNA tags across multiple VDOMs on the same FortiGate device. FortiClient EMS can be configured to control the ZTNA tag sharing behavior in the Fabric Devices.

settings.

FortiGate is the device that enforces ZTNA policies using ZTNA tags. FortiGate can receive ZTNA tags from FortiClient EMS via Fabric Connector. FortiGate can also publish ZTNA services through the ZTNA portal, which allows users to access applications without installing FortiClient. FortiGate can also provide ZTNA inline CASB for SaaS application access control.

FortiGate Access Proxy is a feature that enables FortiGate to act as a proxy for ZTNA traffic.

FortiGate Access Proxy can be deployed in front of the application servers to provide ZTNA protection. FortiGate Access Proxy can also be deployed behind the application servers to provide ZTNA visibility. FortiGate Access Proxy can use ZTNA tags to identify and authenticate users and devices.

FortiClient is the endpoint software that connects to ZTNA services. FortiClient can register ZTNA tags with FortiClient EMS based on the endpoint security posture. FortiClient can also use ZTNA tags to access ZTNA services published by FortiGate. FortiClient can also use ZTNA tags to access SaaS applications with ZTNA inline CASB.
