- B. There are no security profile group applied to all policies.
- C. Log allowed traffic is set to Security Events for all policies.
- D. Digital experience monitoring is not configured.

Answer: C

Explanation:

If "Log allowed traffic" is set only to "Security Events" for all policies, only specific security events (such as blocked or malicious traffic) are logged, while general allowed traffic is not recorded.

This results in a daily summary report with minimal data, as it lacks logs of most regular traffic. To capture more detailed information, "Log allowed traffic" should be configured to record all traffic types, not just security events.
