

Free PDF Quiz 2025 IBM C1000-189: Valid IBM Instana Observability v1.0.277 Administrator - Professional Latest Test Online

Benefits of IBM Instana Observability

C1000-189 test questions have so many advantages that basically meet all the requirements of the user. If you have good comments or suggestions during the trial period, you can also give us feedback in a timely manner. Our study materials will give you a benefit as Thanks, we do it all for the benefits of the user. C1000-189 Study Materials look forward to your joining in.

With the development of scientific and technological progress computer in our life play an increasingly important role. The job positions relating to internet are hot. Our C1000-189 test dumps files help people who have dreams of entering this field and make a great achievement. IT technology skills are universal, once you get a IBM certification (C1000-189 Test Dumps files), you can have an outstanding advantage while applying for a job no matter where you are.

Free Sample C1000-189 Questions & Pdf C1000-189 Torrent

C1000-189 study guide provides free trial services, so that you can gain some information about our study contents, topics and how to make full use of the software before purchasing. It's a good way for you to choose what kind of C1000-189 training prep is suitable and make the right choice to avoid unnecessary waste. Our purchase process is of the safety and stability if you have any trouble in the purchasing C1000-189 practice materials or trail process, you can contact us immediately.

IBM Instana Observability v1.0.277 Administrator - Professional Sample Questions (Q63-Q68):

NEW QUESTION # 63

What is an agile set of focused security and privacy practices that are used by Instana?

- A. DevSecOps
- **B. Security and Privacy by Design**
- C. Security Orchestration, Automation, and Response
- D. Agile Security Practice

Answer: B

Explanation:

IBM Instana observability platform is designed with a strong emphasis on security and privacy best practices. According to the official IBM documentation, Instana applies "Security and Privacy by Design" principles throughout its software lifecycle. The documentation specifically states: "Instana implements security and privacy by design to ensure secure software development, deployment, and system operation, integrating data protection into platform architecture and operations from the outset." This framework mandates data minimization, encrypted in-transit and at-rest telemetry, access control, audit logging, and compliance mapping (such as GDPR or industry frameworks) as default features in Instana platform. While DevSecOps and Security Orchestration are supported concepts, the verified and explicit phrase in IBM Instana documents is Security and Privacy by Design,

which is referenced in platform release notes and compliance statements. Agile and focused privacy practices are foundational, as Instana delivers enterprise-grade monitoring for regulated environments.

NEW QUESTION # 64

Which type of data does Instana use to correlate application performance with infrastructure metrics?

- A. Requests, responses, errors, and latency
- B. Correlated logs, number of events, host type, and recent changes
- C. Logs, traces, tags, and metrics
- D. Host resources, host id, application resources, and application id

Answer: C

Explanation:

Instana's contextual correlation engine combines different data types to build a unified observability model. IBM documentation states: "To correlate application performance with infrastructure metrics, Instana relies on logs, traces, tags, and time series metrics." Traces map the end-to-end request journey, metrics provide numerical measures of both system and app health, tags label resources for logical grouping and discovery, and logs offer deep diagnostic information. By analyzing traces and metrics together, Instana surfaces where latency, errors or bottlenecks in the application link directly to resource consumption or system events captured at the infrastructure level. Tags facilitate mapping services to containers, VMs, or Kubernetes objects. Raw counts (B, C) and raw transactional data (D) are part of the analysis pipeline but do not provide the required level of linkage for successful application-to-infrastructure mapping - only the union of traces, metrics, tags, and logs achieves this dimensionality.

NEW QUESTION # 65

Which order of precedence applies if a user is a member of multiple groups and the level of access is not the same?

- A. Limited access, No access, Access all
- B. Access all, Limited access, No access
- C. Access all, No access, Limited access
- D. No access, Limited access, Access all

Answer: D

Explanation:

According to IBM Instana documentation, access rights for users belonging to multiple groups are resolved by applying the most restrictive role. The documentation states: "If a user belongs to more than one group, the permissions are set according to the order: No access > Limited access > Access all. If there's a conflict, 'No access' always takes precedence, followed by 'Limited access,' then 'Access all.'" This ensures that users do not gain unintended permissions due to overlapping group assignments and supports the principle of least privilege. This behavior is critical for security compliance and consistent access control, especially in regulated environments or where different teams have varying visibility requirements. By enforcing the strictest restriction, Instana reduces risk from misconfigurations and accidental escalation of privilege, and helps satisfy audit trail and governance requirements in enterprise use cases.

NEW QUESTION # 66

Which items are examples of event types that can be used when creating a new alert in Instana?

- A. Logs, Resources, Tracing
- B. Request, Response, Interruption
- C. Incidents, Offline, Changes
- D. Timer, Counter, Level

Answer: C

Explanation:

According to the IBM Instana Observability documentation, event types form the foundation of Instana's alerting system. When configuring new alerts, users can select event categories such as Incidents, Offline, or Changes. The documentation specifies: "Instana alerts are triggered by event conditions derived from incidents (performance degradations), offline detections (component unavailability), and changes (deployment or configuration actions)." Incidents indicate performance or reliability degradation

impacting users, Offline events represent disconnected sensors or hosts, while Changes capture deployments or configuration modifications influencing performance. Combining these event types enables contextual alerts and reduces noise by differentiating between symptoms and root causes. Other listed options refer either to data processing concepts (Timers, Counters) or monitoring inputs (Requests, Tracing), not supported as Instana alert event types. These verified categories are consistent across versions 1.0.277 through 1.0.307.

NEW QUESTION # 67

What is mandatory to use Instana REST APIs?

- A. Python
- B. CURL
- C. Cookie
- **D. Token**

Answer: D

Explanation:

Access to Instana's REST API is secured using authorization tokens-an industry-standard best practice for API authentication and traceability. IBM documentation says: "A personal or team API token is required to authenticate REST API calls." Tokens serve as credentials embedded in HTTP headers on each request, providing both identity and access control for the API consumer. Tokens are mandatory; without a valid token, any API requests are denied with a 401 Unauthorized error, regardless of whether a tool (such as CURL) is used. Tokens can be scoped for individual users (personal tokens) or teams (team tokens), enabling granular tracking and revocation as part of enterprise security policies. API tokens are generated from the Instana UI under the profile or team section. Cookies and raw client libraries (e.g., Python) are not authentication methods for Instana APIs.

NEW QUESTION # 68

.....

We have handled professional C1000-189 practice materials for over ten years. Our experts have many years' experience in this particular line of business, together with meticulous and professional attitude towards jobs. Their abilities are unquestionable, besides, C1000-189 Exam Questions are priced reasonably with three kinds: the PDF, Software and APP online. Though the content is the same, but their displays are totally different and functionable.

Free Sample C1000-189 Questions: https://www.real4test.com/C1000-189_real-exam.html

If you have doubt about what we say, we also provide the demo of C1000-189 dumps free which is the small part of our full version, Make sure you are mentally ready for taking IBM C1000-189 dumps as it is an easy level certification, so you have to prepare for it accordingly, IBM C1000-189 Latest Test Online You can get the downloading link and password within ten minutes after payment, C1000-189 test prep training can not only allow you for the first time to participate in the C1000-189 exam to pass it successfully, but also help you save a lot of valuable time.

Integrate clusters" of agile practices that work C1000-189 exceptionally well together, Before you use a floppy or Zip disk, you must format it, If you have doubt about what we say, we also provide the demo of C1000-189 Dumps Free which is the small part of our full version.

IBM C1000-189 Exam Dumps Fastest Way Of Preparation 2025

Make sure you are mentally ready for taking IBM C1000-189 dumps as it is an easy level certification, so you have to prepare for it accordingly, You can get the downloading link and password within ten minutes after payment.

C1000-189 test prep training can not only allow you for the first time to participate in the C1000-189 exam to pass it successfully, but also help you save a lot of valuable time.

Real4test.com plays its role there and provides C1000-189 dumps for thorough preparation in short and easy way.
