

Free PDF Quiz 2025 Juniper Trustable JN0-105: Junos, Associate (JNCIA-Junos) Updated Test Cram

What's more, part of that ExamsLabs JN0-105 dumps now are free: https://drive.google.com/open?id=1OOHMzVaqNq_UWp2kqD5A3KVLsVx-iLLR

With our JN0-105 test prep, you don't have to worry about the complexity and tediousness of the operation. As long as you enter the learning interface of our soft test engine of JN0-105 quiz guide and start practicing on our Windows software, you will find that there are many small buttons that are designed to better assist you in your learning. When you want to correct the answer after you finish learning, the correct answer for our JN0-105 test prep is below each question, and you can correct it based on the answer. In addition, we design small buttons, which can also show or hide the JN0-105 Exam Torrent, and you can flexibly and freely choose these two modes according to your habit. In short, you will find the convenience and practicality of our JN0-105 quiz guide in the process of learning. We will also continue to innovate and improve functions to provide you with better services.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.
Topic 2	Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.
Topic 3	User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.
Topic 4	Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.
Topic 5	Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.

JN0-105 Authorized Test Dumps | Exam Topics JN0-105 Pdf

Maybe you will meet some difficult problems when you prepare for your JN0-105 exam, you even want to give it up. It is no exaggeration to say that our study material is the most effective product for candidates to prepare for their exam. Because JN0-105 exam torrent can help you to solve all the problems encountered in the learning process, JN0-105 Practice Test will provide you with very flexible learning time so that you can easily pass the exam. At the same time, if you have any questions during the trial period of JN0-105 quiz guide, you can feel free to communicate with our staffs, and we will do our best to solve all the problems for you.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q19-Q24):

NEW QUESTION # 19

You are asked to configure your device running Junos OS to automatically archive your configuration upon commit. In this scenario, which two methods are supported by the Junos OS? (Choose two)

- A. RCP
- B. SCP
- C. FTP
- D. HTTP

Answer: A,B

Explanation:

Junos OS supports multiple methods for automatically archiving configurations upon commit. Two of the supported methods are SCP (Secure Copy Protocol) and RCP (Remote Copy Protocol). These methods can be configured to save the configuration files to a remote server automatically whenever a commit is made.

Reference:

"You can configure Junos OS to automatically archive the configuration using protocols such as SCP and RCP upon commit."

NEW QUESTION # 20

Which three benefits occur when operating an interior gateway protocol (IGP) in an autonomous system (AS)? (Choose three.)

- A. IGP's determine the optimal paths for data transmission.
- B. IGP's learn prefixes in the global Internet's routing table.
- C. IGP's react very fast to network change.
- D. IGP's learn everything about the subnets and best paths within your network.
- E. IGP's automatically distribute static routing information.

Answer: A,C,D

Explanation:

Operating an Interior Gateway Protocol (IGP) within an Autonomous System (AS) provides several benefits, including determining the optimal paths for data transmission (B), reacting quickly to network changes (D), and learning all about the subnets and best paths within the network (E). IGP's are designed to manage routing within a single AS efficiently, adapting to changes and ensuring data is routed through the best available paths.

NEW QUESTION # 21

Exhibit

```
{hold:node0} [edit]
```

```
root# set system root-authentication ?
```

Possible completions:

```
+ apply-groups Groups from which to inherit configuration data
+ apply-groups-except Don't inherit configuration data from these groups
encrypted-password Encrypted password string
load-key-file File (URL) containing one or more ssh keys
plain-text-password Prompt for plain text password (autoencrypted)
> ssh-dsa Secure shell (ssh) DSA public key string
> ssh-rsa Secure shell (ssh) RSA public key string
```

```
{hold:node0} [edit]
root# set system root-authentication plain-text-password
New password:
Retype new password:
{hold:node0} [edit]
root# commit and-quit
[edit interfaces]
'ge-0/0/0'
HA management port cannot be configured
error: configuration check-out failed
{hold:node0} [edit]
root#
You are unable to remotely access your Juniper device using the CLI.
Referring to the exhibit, which command would you add to the existing configuration to enable remote CLI access?
```

- A. set system login idle-timeout 20
- B. load factory-default
- C. set system root-authentication plain-text-password
- D. set system services ssh

Answer: D

Explanation:

In Junos OS, remote access to the device's CLI is commonly facilitated through Secure Shell (SSH), a protocol providing secure command-line access over an insecure network. The given exhibit indicates an attempt to set a root authentication password but does not show configuration for enabling remote access services. To enable SSH, which is not shown in the configuration snippet, you need to configure the device to accept SSH connections. This is done by enabling the SSH service within the system services hierarchy of the configuration. The correct command to add to the existing configuration for enabling remote CLI access via SSH is set system services ssh. This command activates the SSH service, allowing secure remote logins to the device.

NEW QUESTION # 22

What information does the forwarding table require so that the device forwards traffic? (Choose three.)

- A. outgoing interface name
- B. BGP local preference value
- C. OSPF metric value
- D. next hop IP address
- E. next hop MAC address

Answer: A,D,E

Explanation:

The forwarding table in a network device requires specific information to efficiently forward traffic toward its destination. This includes the next hop IP address, which indicates the next router or device in the path to the destination. The outgoing interface name identifies the physical or logical interface through which the packet should be sent to reach the next hop. Lastly, the next hop MAC address is crucial for Layer 2 forwarding decisions, allowing the device to encapsulate the IP packet in a frame that can be understood by Ethernet or other Layer 2 protocols. OSPF metric values and BGP local preference values are used in the routing decision process to select the best path and populate the forwarding table but are not directly used by the forwarding table to forward traffic.

NEW QUESTION # 23

How many login classes are assignable to a user account?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

<https://www.juniper.net/documentation/us/en/software/junos/user-access-evo/user-access/topics/topic-map/junos-os-login-class.html#:~:text=You%20can%20define%20any%20number,to%20an%20individual%20user%20account.>

In Junos OS, each user account can be assigned only one login class. Login classes in Junos OS define the permissions for users, controlling what they can access and modify within the system. This setup helps in maintaining a clear and secure access control mechanism.

Reference:

Junos OS Documentation on User Accounts and Login Classes.

NEW QUESTION # 24

.....

By unremitting effort and studious research of the JN0-105 actual exam, our professionals devised our high quality and high JN0-105 effective practice materials which win consensus acceptance around the world. They are meritorious experts with a professional background in this line and remain unpretentious attitude towards our JN0-105 Preparation materials all the time. They are unsuspecting experts who you can count on.
