

# Free PDF Quiz 2025 Marvelous ATlassian New ACP-120 Study Materials

ATLASSIAN ACP-120 Jira Cloud Administrator 2

ACP-120 Certification test with ease.

### ATLASSIAN Jira Cloud Administrator Sample Questions (Q21-Q26):

**NEW QUESTION # 21**  
Currently, several groups and project roles are listed in every system event of the DEV Notification Scheme and should remain that way. A new requirement states that when DEV issues move from the status Open to status Assigned, only Project Role (Managers) should be notified. DEV project does not share any of its schemes.  
Identify the event that needs to be configured.

- A. Issue Assigned
- B. Work Started On Issue
- C. Custom event
- D. Issue Moved

**Answer: C**

**NEW QUESTION # 22**  
Which three statements are correct about deleting a user account (Choose three)

- A. Organization admins can delete managed accounts
- B. Access to all products and administration functions will be lost
- C. Accounts can only be deleted if they have no issues assigned
- D. Individual users can delete their unmanaged accounts
- E. Issues that were created by a deleted account will be deleted

**Answer: A,B,E**

**NEW QUESTION # 23**  
The Legal team has the following requirements  
\* Notify a list of individuals when issues are set to Pending status  
\* Allow project administrators to manage that list on an ongoing basis  
Which combination of two configuration elements will meet these requirements (Choose two)

- A. Custom Event
- B. Project Role
- C. Group
- D. Workflow condition
- E. Workflow validator

**Answer: A,B**

**NEW QUESTION # 24**  
Billie needs to perform various restricted tasks in the system. You must decide whether to grant her

## Receive free updates for the ATlassian ACP-120 Exam Dumps

This updated ACP-120 exam study material consists of ACP-120 PDF dumps, desktop practice exam software, and a web-based practice test. Experts have prepared the ACP-120 desktop-based exam simulation software. There are ACP-120 Actual Questions

in the practice test to give you an exact impression of the ATlassian ACP-120 original test.

## ATlassian Jira Cloud Administrator Sample Questions (Q62-Q67):

### NEW QUESTION # 62

You want to rename an issue type. What might be impacted by this change?

- **A. Swimlanes by queries**
- B. Custom field contexts
- C. Issue type schemes
- D. Workflow schemes
- E. Issue type screen schemes

**Answer: A**

Explanation:

Renaming an issue type in Jira Software Cloud changes its display name, which can impact configurations or features that reference the issue type by name, particularly in JQL queries or user-defined settings. The element most likely to be impacted is swimlanes by queries (Option D), as swimlanes often use JQL queries that include issue type names.

\* Explanation of the Correct Answer (Option D):

\* Swimlanes on Jira boards (e.g., Kanban or Scrum) can be configured to use JQL queries to group issues (e.g., `issuetype = Bug`). If a swimlane's JQL query references the issue type being renamed (e.g., `issuetype = Task`), renaming the issue type (e.g., to Story) will cause the query to no longer match issues of the renamed type, breaking the swimlane's functionality. These queries must be updated to reflect the new issue type name.

\* Exact Extract from Documentation:

Configure board swimlanes

Swimlanes on Jira boards can be based on JQL queries (e.g., `issuetype = Bug`).

Impact of renaming issue types:

\* JQL queries referencing the issue type name (e.g., `issuetype = Task`) will no longer match issues if the issue type is renamed (e.g., to Story). To update:

\* Go to Board settings > Swimlanes.

\* Update the JQL query to use the new issue type name. Note: Renaming an issue type can affect any JQL-based feature, including swimlanes, filters, and dashboards. (Source:

Atlassian Support Documentation, "Configure boards in Jira Cloud")

\* Why This Fits: Renaming an issue type impacts swimlanes by queries because JQL queries in swimlane configurations may reference the issue type name, requiring updates to maintain functionality, making Option D the correct answer.

\* Why Other Options Are Incorrect:

\* Issue type schemes (Option A):

\* Issue type schemes define which issue types are available in a project. Renaming an issue type changes its display name globally but does not alter the scheme's structure or associations, as issue types are referenced by their internal IDs in schemes.

\* Extract from Documentation:

Renaming an issue type updates its display name but does not affect issue type schemes, which use internal IDs.

(Source: Atlassian Support Documentation, "Manage issue types in Jira Cloud")

\* Issue type screen schemes (Option B):

\* Issue type screen schemes map screens to issue types for operations (Create, Edit, View).

These schemes reference issue types by their internal IDs, so renaming an issue type does not impact the scheme's configuration.

\* Extract from Documentation:

Issue type screen schemes use issue type IDs, not names. Renaming an issue type does not require changes to screen schemes.

(Source: Atlassian Support Documentation, "Configure screen schemes in Jira Cloud")

\* Workflow schemes (Option C):

\* Workflow schemes map workflows to issue types. Like other schemes, they use issue type IDs, so renaming an issue type does not affect workflow assignments or configurations.

\* Extract from Documentation:

Workflow schemes reference issue types by ID. Renaming an issue type has no impact on workflow schemes.

(Source: Atlassian Support Documentation, "Configure workflow schemes")

\* Custom field contexts (Option E):

\* Custom field contexts define the projects and issue types where a custom field is available.

Contexts also use issue type IDs, so renaming an issue type does not require changes to the context configuration.

\* Extract from Documentation:

Custom field contexts use issue type IDs. Renaming an issue type does not affect field contexts.

(Source: Atlassian Support Documentation, "Manage custom fields in Jira Cloud")

\* Additional Notes:

\* Renaming an issue type is done in Settings > Issues > Issue types and requires Jira administrator privileges.

\* Other JQL-based features (e.g., filters, dashboards, automation rules) may also be impacted if they reference the issue type name, but swimlanes by query is the most directly affected among the options.

\* To minimize impacts, use issue type IDs in JQL queries (e.g., issuetype = 10001), though this is less common.

### NEW QUESTION # 63

A dashboard displays an Issue Statistics gadget as shown.

The dashboard owner wants to change the order of the statuses shown in the gadget to appear as follows.

1. To Do
2. In Progress
3. Ready For QA
4. Blocked
5. Rejected
6. Done

Which action will permanently arrange the statuses into the required order?

- A. Change the Sort Direction option in the gadget to Ascending.
- B. Reorder the statuses on the Status administration page.
- **C. Add numbers to the status names to allow them to be sorted in numerical order.**
- D. Change the category of the statuses.
- E. Change the gadget Sort By field to Total.

**Answer: C**

Explanation:

### NEW QUESTION # 64

Gary complains that he is not getting any notifications when issues are updated.

According to the notification helper, he should receive notifications for all issues he is watching. His coworkers confirm they receive those notifications and they regularly update issues that he is watching.

Which update to Gary's personal settings must have occurred (Choose one)

- A. The setting You're watching the issue was disabled
- **B. The setting Watch your issues was disabled**
- C. The setting You make changes to the issue was disabled
- D. The setting Email notifications format was changed

**Answer: B**

#### NEW QUESTION # 65

Contractors will begin using your Jira instance.

You receive the following requirements for them:

They must be able to	They must NOT be able to
Create issues	Delete issues
Create dashboards	Share dashboards
@mention people in issues	Subscribe the team to emails that contain information based on filters
Transition issues	Make changes to more than one issue at the same time
Add Comments to issues	

How should you manage global permissions for the contractors user group?

- A. Grant them the Create Shared Objects permission.
- **B. Grant them the Browse Users permission.**
- C. Grant them the Manage Group Filter Subscriptions permission.
- D. Grant them the Jira System Administrators permission.
- E. Grant them the Bulk Change permission.

**Answer: B**

Explanation:

#### NEW QUESTION # 66

A team in your company requests a new Jira project that fulfills the following requirements:

\* Ability to work on issues in weekly iterations

\* Allows the project administrators to create their own fields

The project should fulfill these requirements right after creation without the need to enable additional features.

Which project should you create?

- A. Company-managed project with Scrum template
- B. A company-managed project with Kanban template
- C. Team-managed project with Canban template
- **D. Team-managed project with Scrum template**

**Answer: D**

#### NEW QUESTION # 67

.....

Our ATlassian ACP-120 Exam Dumps effect in helping candidates' certification exam. Original questions are also important.

These would provide a forum where certification training can be carried on. Our dumps torrent is perfect and practice test is also the latest. After you purchase our product, we offer free update service for one year.

**Exam ACP-120 Pattern:** <https://www.prep4sures.top/ACP-120-exam-dumps-torrent.html>

As for PC version of our Exam ACP-120 Pattern - Jira Cloud Administrator prep torrent, it is popular with computer users, and the software is more powerful, There have been 99 percent people used our ACP-120 exam prep that have passed their exam and get the certification, more importantly, there are signs that this number is increasing slightly, You can print these Jira Cloud Administrator (ACP-120) questions if you prefer an off-screen study.

The C++ refactoring I mention later is easily done using the Eclipse refactoring ACP-120 facilities, Refactoring in Ruby gives you all the realistic, hands-on practice you need to refactor Ruby code quickly and effectively.

## 2025 New ACP-120 Study Materials 100% Pass | High Pass-Rate Exam ACP-120 Pattern: Jira Cloud Administrator

As for PC version of our Jira Cloud Administrator prep torrent, it Valid ACP-120 Exam Format is popular with computer users, and the software is more powerful, There have been 99 percent people used our ACP-120 Exam Prep that have passed their exam and get the certification, more importantly, there are signs that this number is increasing slightly.

You can print these Jira Cloud Administrator (ACP-120) questions if you prefer an off-screen study. As we know, when facing a variety of products for a decision, it inclines to get confused to decide which one is the most useful and effective to realize our aim--passing the ATlassian ACP-120 exam smoothly.

You needn't to wait for a long time.
