

Free PDF Quiz 2025 Microsoft Authoritative Accurate DP-420 Study Material

Microsoft DP-420 Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB

100% Pass Quiz Microsoft DP-420 Marvelous Latest Study Notes

We strongly recommend that you should practice DP-420 Latest Study Notes - Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB pass guaranteed questions with our online test engine, LatestCram DP-420 Latest Study Notes Partnership Program. Do you like LatestCram DP-420 Latest Study Notes, Our Microsoft DP-420 latest study dumps will provide you an effective and cost-efficient way to practice and help you to become a certified professional in the IT industry. Before purchasing we provide you free demo download of DP-420 learning materials line for your reference.

It is one thing to learn, but getting the DP-420 Latest Study Notes cert really makes it complete, Build from left to right, Practically, nations have reached the Keynesian Endpoint* No more balance DP-420 PDF sheets are left to support either economic activity or the financial system.

Download DP-420 Exam Dumps

Then you can look at the free demos and try to answer them to see the value of our DP-420 study materials and finally decide to buy them or not, Language topics are organized based on the needs of Latest DP-420 Study Notes beginner programmers rather than structure, making for an even easier introduction to the subject.

We strongly recommend that you should practice Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB <https://www.latestcram.com/DP-420-exam-cram-questions.html> pass guaranteed questions with our online test engine, LatestCram Partnership Program. Do you like LatestCram?

Our Microsoft DP-420 latest study dumps will provide you an effective and cost-efficient way to practice and help you to become a certified professional in the IT industry.

Based on high-quality products, our DP-420 guide torrent has high quality to guarantee your test pass rate, which can achieve 98% to 100%. DP-420 study tool is updated online by our experienced experts, and then sent to the user. And we provide free updates of DP-420 training material for one year after your payment. The data of our DP-420 Exam Torrent is forward-looking and can grasp hot topics to help users master the latest knowledge. And you can also free download the demo of DP-420 exam questions to have a check.

The exam will be vanquished smoothly this time by the help of valid latest DP-420 exam torrent. Written by meticulous and professional experts in this area, their quality has reached to the highest level compared with others' similar DP-420 test prep and concord with the syllabus of the exam perfectly. Their questions points provide you with simulation environment to practice. In that case, when you sit in the Real DP-420 Exam room, you can deal with almost every question with ease.

2025 Accurate DP-420 Study Material | Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB 100% Free Free Vce

Dumps

As students or other candidates, you really need practice materials like our DP-420 exam materials to conquer DP-420 exam or tests in your improving profession. Without amateur materials to waste away your precious time, all content of our DP-420 practice materials are written for your exam based on the real exam specially. Actually, one of the most obvious advantages of our DP-420 simulating questions is their profession, which is realized by the help from our experts. And your success is guaranteed with our DP-420 exam material.

Microsoft Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Sample Questions (Q19-Q24):

NEW QUESTION # 19

You plan to create an Azure Cosmos DB database named db1 that will contain two containers. One of the containers will contain blog posts, and the other will contain users. Each item in the blog post container will include:

- * A single blog post
- * All the comments associated to the blog post
- * The names of the users who created the blog post and added the comments.

You need to design a solution to update usernames in the user container without causing data integrity issues. The solution must minimize administrative and development effort. What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

In the user container, implement:

- A stored procedure
- The change feed processor
- A post-trigger
- A stored procedure
- A user-defined function

In the blog post container, implement:

- The change feed processor
- The change feed processor
- A post-trigger
- A stored procedure
- A user-defined function

Microsoft

Answer:

Explanation:

Answer Area

In the user container, implement:

- A stored procedure
- The change feed processor
- A post-trigger
- A stored procedure
- A user-defined function

In the blog post container, implement:

- The change feed processor
- The change feed processor
- A post-trigger
- A stored procedure
- A user-defined function

NEW QUESTION # 20

You plan to use a multi-region Azure Cosmos DB for NoSQL account to store data for a new application suite. The suite contains the applications shown in the following table.

Name	Requirement
Reporting	Must be able to track the total order counts within five minutes of orders being placed.
Purchasing	Must guarantee that the latest committed stock quantities are used always.
Fulfillment	Must ensure that orders are read in the order in which they are placed.

Each application should use the weakest consistency level possible.

Which consistency level should you configure for each application? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Reporting: Eventual
Bounded staleness
Consistent prefix
Eventual
Session
Strong

Purchasing: Bounded staleness
Bounded staleness
Consistent prefix
Eventual
Session
Strong

Fulfillment: Strong
Bounded staleness
Consistent prefix
Eventual
Session
Strong

Answer:

Explanation:

Answer Area

Reporting: Eventual
Bounded staleness
Consistent prefix
Eventual
Session
Strong

Purchasing: Bounded staleness
Bounded staleness
Consistent prefix
Eventual
Session
Strong

Fulfillment: Strong
Bounded staleness
Consistent prefix
Eventual
Session
Strong

Explanation:

NEW QUESTION # 21

You have an Azure subscription that contains an Azure Cosmos DB for NoSQL account named accounts. You configure account1 to send resource logs to Log Analytics.

You need to identify any containers in account1 that were deleted during the past 24 hours.

How should you complete the query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

| where TimeGenerated >= now(-1d)

| where == "SqlContainersDelete"

 Microsoft

Answer:

Explanation:

Answer Area

| where TimeGenerated >= now(-1d)

| where == "SqlContainersDelete"

 Microsoft

Explanation:

Answer Area

CDBControlPlaneRequests

| where TimeGenerated >= now(-1d)

| where OperationName == "SqlContainersDelete"

Microsoft

NEW QUESTION # 22

You have an Azure Cosmos DB for NoSQL account.

The change feed is enabled on a container named invoice.

You create an Azure function that has a trigger on the change feed.

What is received by the Azure function?

- A. all the properties of the updated items
- B. only the changed properties and the system-defined properties of the updated items
- C. only the partition key and the changed properties of the updated items
- D. all the properties of the original items and the updated items

Answer: A

Explanation:

Explanation

According to the Azure Cosmos DB documentation, the change feed is a persistent record of changes to a container in the order they occur. The change feed outputs the sorted list of documents that were changed in the order in which they were modified.

The Azure function that has a trigger on the change feed receives all the properties of the updated items². The change feed does not include the original items or only the changed properties. The change feed also includes some system-defined properties such as `_ts` (the last modified timestamp) and `_lsn` (the logical sequence number)³.

Therefore, the correct answer is:

A: all the properties of the updated items

NEW QUESTION # 23

You have an Azure subscription.

You need to deploy the following resources to an Azure Cosmos DB for NoSQL account:

* A container

* A user-defined function (UDF)

The solution must minimize the possibility of the deployment failing.

How should you complete the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
