Free PDF Quiz 2025 Oracle 1Z0-1163-1–High Pass-Rate Vce Format

Passing the 1Z0-1163-1 exam requires the ability to manage time effectively. In addition to the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam study materials, practice is essential to prepare for and pass the Oracle 1Z0-1163-1 exam on the first try. It is critical to do self-assessment and learn time management skills. Because the 1Z0-1163-1 test has a restricted time constraint, time management must be exercised to get success. Only with enough practice one can answer real Oracle 1Z0-1163-1 exam questions in a given amount of time.

If you want to pass the exam smoothly buying our Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 guide dump is your ideal choice. They can help you learn efficiently, save your time and energy and let you master the useful information. Our passing rate of 1Z0-1163-1 study tool is very high and you needn't worry that you have spent money and energy on them but you gain nothing. We provide the great service after you purchase our 1Z0-1163-1 cram training materials and you can contact our customer service at any time during one day. It is a pity if you don't buy our 1Z0-1163-1 study tool to prepare for the test Oracle certification.

Actual4Dumps Oracle 1Z0-1163-1 Exam Dumps and Practice Test Software

You may want to know our different versions of 1Z0-1163-1 exam questions. Firstly, PDF version is easy to read and print. Secondly software version simulates the real 1Z0-1163-1 actual test guide, but it can only run on Windows operating system. Thirdly, online version supports for any electronic equipment and also supports offline use. For the first time, you need to open 1Z0-1163-1 Exam Questions in online environment, and then you can use it offline. All in all, helping our candidates to pass the exam successfully is what we always looking for. Our 1Z0-1163-1 actual test guide is your best choice.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Topic 2	• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.

Topic 3	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Topic 4	• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.
Topic 5	• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q34-Q39):

NEW QUESTION # 34
Which feature in Oracle Fusion Cloud SCM provides real-time order promising based on supply and demand constraints?

- A. Cost Accounting.
- B. Global Order Promising.
- C. Supplier Portal.
- D. Manufacturing Execution.

Answer: B

Explanation:
Global Order Promising (A) provides real-time order promising by analyzing supply (inventory, production) and demand (orders, forecasts) constraints across the enterprise. For instance, if a customer requests 100 units and only 80 are available with a 2-day production lead time, GOP promises delivery in 2 days. Option B (Supplier Portal) supports collaboration, not promising. Option C (Manufacturing Execution) tracks production, not order commitments. Option D (Cost Accounting) handles financials. GOP enhances customer trust and planning accuracy by delivering feasible, data-driven promises.

NEW QUESTION # 35
What is the primary function of Cost Rollup in Oracle Fusion Cloud SCM?

- A. It tracks only direct labor expenses, excluding materials.
- B. It ensures material costs remain unchanged over time.
- C. It calculates the total cost of a product by aggregating material, labor, and overhead expenses.
- D. It eliminates the need for cost accounting.

Answer: C

Explanation:
Cost Rollup (C) in Oracle Fusion Cloud SCM calculates the total cost of a product by aggregating material, labor, and overhead expenses across production stages. For instance, a widget might cost $10 total-$5 materials, $3 labor, $2 overhead-rolled up from raw inputs to finished goods. Option A is false-Cost Rollup enhances, not eliminates, cost accounting by providing detailed data. Option B is incorrect-it includes all cost components, not just labor. Option D is wrong-costs fluctuate with market conditions; Rollup reflects current values. This function ensures accurate pricing, profitability analysis, and cost control, critical for financial decision-making and competitive strategy.

NEW QUESTION # 36
What is the role of automation in creating POs from contract fulfillment in Oracle Fusion Cloud Procurement?

- A. It ensures that POs are created accurately based on contract terms, reducing manual errors, and improving efficiency.
- B. It enhances supplier qualification by providing visibility into supplier responses.
- C. It facilitates the approval process by routing POs to the appropriate approvers, based on invoice rules and limits.

Answer: A

Explanation:
In Oracle Fusion Cloud Procurement, automation plays a critical role in creating purchase orders (POs) from contract fulfillment by ensuring that POs are generated directly from agreed contract terms with high accuracy and minimal manual intervention. This process leverages predefined contract data-such as item details, pricing, quantities, and delivery schedules-to populate POs automatically, reducing errors like incorrect pricing or quantities that often occur in manual entry. For instance, if a contract specifies 100 units of a product at $10 each, automation ensures the PO reflects this exactly, bypassing the need for manual rekeying. Option A is incorrect because routing POs for approval is a subsequent step, not the primary role of automation in PO creation. Option C is unrelated, as supplier qualification pertains to evaluating suppliers, not PO generation. This automation improves efficiency by speeding up the procurement cycle, ensures compliance with contract terms, and frees procurement staff to focus on strategic tasks rather than clerical work. It also integrates with supplier collaboration tools to confirm details, further enhancing accuracy.

NEW QUESTION # 37
Which key metric measures the effectiveness of the Demand to Management OMBP in Oracle Fusion Cloud SCM?

- A. Inventory Turnover, which tracks the speed of inventory movement.
- B. Supplier Lead Time, which measures supplier response efficiency.
- C. Forecast Accuracy, evaluates the precision of demand predictions against actual market demand.

Answer: C

Explanation:
For the Demand to Management OMBP, Forecast Accuracy is the primary metric, as it evaluates how precisely demand predictions match actual market demand, a foundational step in effective supply chain planning. Calculated as a percentage (e.g., actual demand of 800 units versus a forecast of 850 yields 94% accuracy), it directly reflects the OMBP's ability to drive downstream processes like procurement and production. Option B (Supplier Lead Time) measures supplier performance, which affects supply execution but not demand forecasting accuracy. Option C (Inventory Turnover) tracks inventory movement efficiency, an outcome influenced by forecast accuracy, not a direct measure of the OMBP itself. Accurate forecasts prevent overproduction or shortages-for example, overestimating demand by 20% could lead to $50,000 in excess inventory costs, underscoring the metric's importance.

NEW QUESTION # 38
Which function does the Global Order Promising component serve in Oracle Fusion Cloud SCM?

- A. It provides real-time order promising based on supply and demand constraints.
- B. It guarantees order fulfillment within 24 hours.
- C. It focuses only on local supplier availability.

Answer: A

Explanation:
Global Order Promising (GOP) in Oracle Fusion Cloud SCM provides real-time order promising by evaluating supply and demand constraints across the enterprise, ensuring accurate delivery commitments. Option A is incorrect as GOP considers global, not just local, availability. Option C is false-it doesn't guarantee a 24-hour fulfillment but provides feasible timelines. This enhances customer satisfaction and planning accuracy.

NEW QUESTION # 39
......

Actual4Dumps offers authentic and up-to-date 1Z0-1163-1 study material that every candidate can rely on for good preparation. Our top priority is to help you pass the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam on the first try. The cost of registering for a certification Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam is quite expensive, ranging between $100 and $1000. After paying such an amount, the candidate is sure to be on a tight budget. Actual4Dumps provides Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1)

preparation material at very low prices compared to other platforms. We also assure you that the amount will not be wasted and you will not have to pay for the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) certification test for a second time.
