NEW QUESTION #91

On a primary ledger in the system options close section, the following field has been selected 'Prevent General Ledger Period Closure When Open Subledger Periods Exist'.

For which three subledgers can you opt out of the period close checking feature by using the lookup ORA GL INCLD STRICT PRD CLOSE? (Choose three.)

- A. Receivables
- B. Order Management
- C. Assets
- D. Revenue Management
- E. Receipt accounting

Answer: A,C,E

Explanation:

According to Oracle documentation3, you can opt out of the period close checking feature for these three subledgers by using the lookup ORA_GL_INCLD_STRICT_PRD_CLOSE: Receipt accounting, Receivables, and Assets. The period close checking feature prevents you from closing a General Ledger period if there are any open subledger periods that exist for that ledger. You can opt out of this feature for specific subledgers by using the lookup ORA_GL_INCLD_STRICT_PRD_CLOSE and setting the Enabled flag to No for those subledgers. Therefore, options A, B, and D are correct. Option C is incorrect because Revenue Management is not a subledger that can be opted out of the period close checking feature. Option E is incorrect because Order Management is not a subledger that can be opted out of the period close checking feature.

You have a requirement to have invoices generated for certain Intercompany transactions. Where do you enable invoicing?

- A. the transaction type
- B. the transaction batch
- C. the transaction source
- D. the transaction category

Answer: A

Explanation:

According to Oracle documentation2, you enable invoicing for certain Intercompany transactions on the transaction type. You can enable invoicing for a transaction type by selecting the Invoicing Options tab and choosing the invoice method, invoice source, invoice batch source, and invoice rule. Therefore, option D is correct. Option A is incorrect because you do not enable invoicing on the transaction batch. Option B is incorrect because you do not enable invoicing on the transaction source.
