Microsoft Endpoint Administrator Sample Questions (Q107-Q112):

NEW QUESTION # 107

You have a Microsoft 365 E5 subscription that contains a group named Group1.

You create a Conditional Access policy named CAPolicy1 and assign CAPolicy1 to Group1.

You need to configure CAPolicy1 to require the members of Group1 to reauthenticate every eight hours when they connect to Microsoft Exchange Online.

What should you configure?

- A. an assignment that uses a Sign-in risk condition
- **B. Session access controls**
- C. an assignment that uses a User risk condition
- D. Grant access controls

Answer: B

Explanation:

User sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource.

The Azure Active Directory (Azure AD) default configuration for user sign-in frequency is a rolling window of 90 days.

Sign-in frequency control

Sign in to the Azure portal as a global administrator, security administrator, or Conditional Access administrator.

Browse to Azure Active Directory > Security > Conditional Access.

Select New policy.

Give your policy a name. We recommend that organizations create a meaningful standard for the names of their policies.

Choose all required conditions for customer's environment, including the target cloud apps.

Under Access controls > Session.

Select Sign-in frequency.

Choose Periodic reauthentication and enter a value of hours or days or select Every time.

Save your policy.

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-session-lifetime>

NEW QUESTION # 108

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to configure an update ring that meets the following requirements:

* Fixes and improvements to existing Windows functionality can be deferred for 14 days but will install automatically seven days after that date.

* The installation of new Windows features can be deferred for 90 days but will install automatically 10 days after that date.

* Devices must restart automatically three days after an update is installed.

How should you configure the update ring? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 109

You have a Hyper-V host that contains the virtual machines shown in the following table.

Name	Generation	Virtual processor	Memory
VM1	1	4	16 GB
VM2	2	1	8 GB
VM3	2	2	4 GB

On which virtual machines can you install Windows 11?

- A. VM1, VM2, and VM3
- B. VM1 only
- C. VM3 only
- D. VM1 and VM2 only
- E. VM2 and VM3 only

Answer: A

NEW QUESTION # 110

Your on-premises network contains an Active Directory Domain Services (AD DS) domain.

You have an Azure subscription that contains a virtual network named VNet1. VNet1 contains five virtual machines and is NOT connected to the on-premises network.

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You purchase Windows 365 Enterprise licenses.

You need to deploy Cloud PC. The solution must meet the following requirements:

- * All users must be able to access their Cloud PC at any time without any restrictions.
- * The users must be able to connect to the virtual machines on VNet1.

How should you configure the provisioning policy for Windows 365? To answer, drag the appropriate options to the correct settings. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.
