Salesforce ADM-201 Certification Exam covers a wide range of topics, including Salesforce applications, data management, security, user management, and reporting. ADM-201 exam tests the candidate's ability to configure and manage Salesforce applications to meet business needs, as well as their knowledge of best practices in Salesforce administration. Salesforce Certified Administrator certification also requires candidates to have a good understanding of Salesforce features, functionality, and limitations.

The ADM-201 certification exam is a 60-question multiple-choice test that must be completed within 105 minutes. ADM-201 exam is administered by Salesforce and can be taken either online or in-person at a testing center. ADM-201 exam is designed to test the knowledge and skills of candidates in various areas of Salesforce administration. To pass the exam, candidates need to score at least 65%.

## What Topics Are Covered in ADM-201 Exam?

**This Salesforce Administrator certification exam evaluates the candidate's knowledge and competency in a long list of technical domains such as:**

- **Common & Custom Objects** — For this topic, candidates must be able to define the standard architecture of objects, know how to edit fields and layouts of pages for custom and standard objects while realizing the impact of removing fields, and decide how to design and designate layouts of pages, types of records, and processes for various businesses for common and custom items.
- **Service as well as Support Apps** — In this area, test-takers must explain the characteristics of managing cases, show how to automate case management, describe what can be done using the Salesforce knowledge, and finally, detail the power of Salesforce communities.
- **Security Features & Access** — This objective involves describing all the security controls deployed by an organization, adopting the right security measures that are based on the characteristics of the Salesforce sharing model, determining the right way to use custom profiles or permissions taking into account the large numbers of profile settings, and describing how templates for communication, dashboards as well as various reports can be secured and organized with the aid of folders.
- **Reports on Analytics and Dashboards** — This objective evaluates whether candidates know the tools accessible when making a report, how the sharing structure influences reports, the choices to be made while dealing with dashboards, and the uses of custom kinds of reports.
- **Data Management** — This segment tests whether candidates know what to consider before transferring, updating, and

massively removing pieces of data. It also checks how well candidates can identify data management tools, describe the benefits of data tools for validation, and know the different backup options available.

- **App Exchange** — In this final portion, candidates must show they know when to and when not to deploy AppExchange applications.
