C_SIGDA_2403 Exam Practice & Valid C_SIGDA_2403 Exam Notes

The C_SIGDA_2403 Test Guide is written by lots of past materials' rigorous analyses. The language of our study materials are easy to be understood, only with strict study, we write the latest and the specialized study materials. We want to provide you with the best service and hope you can be satisfied. It boosts your confidence for real exam and will help you remember the exam questions and answers that you will take part in. You may analyze the merits of each version carefully before you purchase our SAP Certified Associate - Process Data Analyst - SAP Signavio guide torrent and choose the best one.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample

Questions (Q42-Q47):

NEW QUESTION # 42

Which of the following areas are part of the lifecycle of a business process? Note: There are 3 correct answers to this question.

- A. Process Approvals
- **B. Process Documentation**
- **C. Process Analysis**
- **D. Process Execution**
- E. Process Risk Management

Answer: B,C,D

NEW QUESTION # 43

Which of the following Widgets need to be linked to a process model to provide insights? Note: There are 3 correct answers to this question.

- A. Process Discovery
- B. Variant Explorer
- **C. Process Funnel**
- **D. Process Conformance**
- **E. Diagram**

Answer: C,D,E

Explanation:

Certain widgets in SAP Signavio Process Intelligence require a link to a process model (e.g., a BPMN model) to generate meaningful insights by contextualizing data against a defined structure. The documentation specifies:

* Option A (Diagram): The Diagram Widget displays process models from the SAP Signavio Process Manager workspace and requires a link to a specific model to visualize it in the Collaboration Hub or Process Intelligence.

* Option D (Process Funnel): The Process Funnel Widget visualizes case progression along a process path and often needs to be linked to a process model to define the steps in the funnel, ensuring accurate representation of the process flow.

* Option E (Process Conformance): The Process Conformance Widget compares actual process execution against a reference BPMN model, requiring a direct link to the model to identify conformance issues.

* Option B (Process Discovery) is incorrect because it generates process models automatically from event logs without needing a predefined process model.

Reference: SAP Signavio Process Intelligence Widget Documentation, section on "Widget Configuration and Model Linking"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Widget and Model Integration.

NEW QUESTION # 44

What is the benefit of using Exclusive Gateways (XOR) in a process flow?

- A. Allows to trigger as many paths as required, based on a condition
- **B. Allows to trigger a certain process path, based on a condition**
- C. Allows to skip all paths
- D. Allows to trigger multiple paths simultaneously, based on a condition

Answer: B

NEW QUESTION # 45

What are the trigger types within SAP Signavio Process Governance? Note: There are 3 correct answers to this question.

- **A. Public or private forms**
- B. Task
- **C. Email**
- **D. Process Manager**
- E. Start event

Answer: A,C,D

NEW QUESTION # 46

How does a good software solution support process management? Note: There are 3 correct answers to this question.

- A. With a seamless printing feature
- **B. With a central object repository**
- C. By exporting and importing
- **D. With version control**
- **E. By collaboration/commenting features**

Answer: B,D,E

Explanation:

A robust software solution like SAP Signavio supports Business Process Management by providing tools to manage, collaborate, and maintain process assets. The SAP Signavio Process Transformation Suite Documentation outlines:

* Exact Extract: "Effective process management software supports:

* Version Control: To track changes and maintain process model history.

* Collaboration/Commenting Features: To enable stakeholder feedback and teamwork on process models.

* Central Object Repository: To store and reuse process elements, ensuring consistency across models." (SAP Signavio Process Transformation Suite Overview, section on "Process Management Software Features").

* Explanation:

* Option A (With version control): Version control tracks changes to process models, allowing users to revert to previous versions or review modification history, critical for maintaining accuracy in SAP Signavio Process Manager.

* Option D (By collaboration/commenting features): Collaboration features, such as commenting in the SAP Signavio Process Collaboration Hub, enable stakeholders to provide feedback, discuss improvements, and align on process designs.

* Option E (With a central object repository): A central repository (e.g., the Dictionary in SAP Signavio) stores reusable process elements like tasks or roles, ensuring consistency and reducing redundancy across models.

* Option B (With a seamless printing feature) is incorrect as printing, while useful, is not a core process management function compared to version control or collaboration.

* Option C (By exporting and importing) is incorrect because exporting/importing is a secondary feature for data transfer, not a primary process management support mechanism.
