Reliable SAP C_SAC_2501 Real Test | C_SAC_2501 Reliable Test Review

A team of experts at Exams. Facilitate your self-evaluation and quick progress so that you can clear the SAP C_SAC_2501 examination easily. The SAP C_SAC_2501 prep material 3 formats are discussed below. The SAP C_SAC_2501 Practice Test is a handy tool to do precise preparation for the SAP C_SAC_2501 examination.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q47-Q52):

NEW QUESTION # 47
Your embedded dataset in SAP Analytics Cloud has columns for Country, Region, City, and Customer Name. You want to aggregate measures for these columns as a single column. What can you do?

- A. Convert the embedded dataset to a model.
- B. Create a level-based hierarchy in the dataset.
- C. Create a parent-child hierarchy in the dataset.
- D. Create a group that includes the dimensions.

Answer: B

Explanation:
To aggregate measures for columns such as Country, Region, City, and Customer Name as a single column in an embedded dataset, creating a level-based hierarchy is the most effective approach. This type of hierarchy allows you to define a multi-level structure that represents the logical relationship between different geographical entities and customer names. By doing so, you can easily perform aggregations and analyze data at various levels of detail, from the broadest level (e.g., Country) down to the most specific one (e.g., Customer Name).

NEW QUESTION # 48
What must a data model contain in SAP Analytics Cloud? Note: There are 2 correct answers to this question.

- A. Dimensions
- B. Hierarchies
- C. Calculations
- D. Measures

Answer: A,D

Explanation:
In SAP Analytics Cloud, a data model must contain at least "Dimensions" and "Measures" to be functional. Dimensions are the qualitative aspects of the data (e.g., time, geography, product categories) that provide the context for analysis. Measures, on the other hand, are the quantitative data points (e.g., sales, costs, quantities) that are analyzed within the context provided by dimensions. Both are fundamental components of a data model, enabling structured data analysis and reporting.

NEW QUESTION # 49
You are creating a styling rule for a table. What is the context?

- A. The location of the cursor
- B. The table header
- C. The highest level in the table
- D. The most granular level in the table

Answer: A

NEW QUESTION # 50

Which SAP Analytics Cloud feature uses natural language processing?

- A. Data analyzer
- **B. Just Ask feature**
- C. Smart insight
- D. Digital boardroom

Answer: B

NEW QUESTION # 51

What source system can you connect to with a live connection?

- A. SAP Business ByDesign Analytics
- B. SAP SuccessFactors
- **C. SAP Datasphere**
- D. SAP ERP Central Component

Answer: C

Explanation:
SAP Analytics Cloud can establish a live connection with various source systems, including SAP Datasphere. This allows for real-time data access and analysis without the need to replicate data into the cloud, which is beneficial for scenarios where data privacy and security are paramount.
