

# Free PDF Quiz 2025 Trustable PL-500: Microsoft Power Automate RPA Developer Reliable Exam Book

P.S. Free 2025 Microsoft PL-500 dumps are available on Google Drive shared by RealValidExam: <https://drive.google.com/open?id=1A2w2zfQa9zQyhQETD12qORk3Y9f8Cqt0>

PL-500 dump at RealValidExam are always kept up to date. Every addition or subtraction of PL-500 exam questions in the exam syllabus is updated in our brain dumps instantly. Practice on real PL-500 exam questions and we have provided their answers too for your convenience. If you put just a bit of extra effort, you can score the highest possible score in the Real PL-500 Exam because our PL-500 exam preparation dumps are designed for the best results.

Microsoft PL-500 exam is an excellent opportunity for professionals who want to prove their knowledge and skills in RPA development using Microsoft Power Automate. With the help of various courses and study materials, you can prepare for the exam and become certified in Microsoft Power Automate RPA Developer. By obtaining this certification, you can increase your credibility in the industry, stand out in the job market, and open up new opportunities for career growth.

Microsoft PL-500 exam consists of multiple-choice questions that test the candidate's knowledge of automating business processes using Power Automate. PL-500 Exam also covers topics such as chatbots and RPA (Robotic Process Automation) bots. PL-500 exam is designed to test the candidate's ability to create custom workflows, connect to data sources, and automate repetitive tasks. Passing the exam requires a deep understanding of Power Automate, including its capabilities, limitations, and best practices.

These PL-500 mock tests are made for customers to note their mistakes and avoid them in the next try to pass PL-500 exam in a single try. These Microsoft PL-500 mock tests will give you real PL-500 exam experience. This feature will boost your confidence when taking the Microsoft PL-500 Certification Exam. The 24/7 support system has been made for you so you don't feel difficulty while using the product. In addition, we offer free demos and up to 1 year of free Microsoft Dumps updates. Buy It Now!

## Microsoft Power Automate RPA Developer Sample Questions (Q34-Q39):

### NEW QUESTION # 34

You are developing a cloud flow.

The flow must be able to query several Azure endpoints and must use standard actions where possible.

You need to configure the flow.

Which actions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

| Requirement                                                                       | Action                                                                                                                                        |
|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Issue POST requests to the Microsoft Graph API by using application permissions.  | <div>HTTP</div> <div>HTTP with Azure AD</div> <div>Send an HTTP request to SharePoint</div> <div>Office 365 groups send an HTTP request</div> |
| Issue GET requests to the Microsoft Graph API by using delegated permissions.     | <div>HTTP</div> <div>HTTP with Azure AD</div> <div>Send an HTTP request to SharePoint</div> <div>Office 365 groups send an HTTP request</div> |
| Issue POST requests to Office 365 Management APIs by using delegated permissions. | <div>HTTP</div> <div>HTTP with Azure AD</div> <div>Send an HTTP request to SharePoint</div> <div>Office 365 groups send an HTTP request</div> |
| Issue GET requests to the SharePoint REST API by using delegated permissions.     | <div>HTTP</div> <div>HTTP with Azure AD</div> <div>Send an HTTP request to SharePoint</div> <div>Office 365 groups send an HTTP request</div> |
| Issue POST request to SharePoint REST API by using application permissions.       | <div>HTTP</div> <div>HTTP with Azure AD</div> <div>Send an HTTP request to SharePoint</div> <div>Office 365 groups send an HTTP request</div> |

**Answer:**

Explanation:

## ANSWER AREA

| Requirement                                                                       | Action                                                                                                                        |
|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Issue POST requests to the Microsoft Graph API by using application permissions.  | <p>HTTP</p> <p>HTTP with Azure AD</p> <p>Send an HTTP request to SharePoint</p> <p>Office 365 groups send an HTTP request</p> |
| Issue GET requests to the Microsoft Graph API by using delegated permissions.     | <p>HTTP</p> <p>HTTP with Azure AD</p> <p>Send an HTTP request to SharePoint</p> <p>Office 365 groups send an HTTP request</p> |
| Issue POST requests to Office 365 Management APIs by using delegated permissions. | <p>HTTP</p> <p>HTTP with Azure AD</p> <p>Send an HTTP request to SharePoint</p> <p>Office 365 groups send an HTTP request</p> |

Explanation:

http  
 http with azure AD  
 http with azure ad  
 http with azure ad  
 http request to sharepoint.

## NEW QUESTION # 35

You develop a desktop flow for a company.

You need to ensure that another user can modify the flow.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the order.

| Actions                                                                           | Answer area |
|-----------------------------------------------------------------------------------|-------------|
| Add people and select the co-owner access type.                                   | 1           |
| Select a flow and select <b>Share</b> .                                           | 2           |
| Navigate to <a href="https://flow.microsoft.com">https://flow.microsoft.com</a> . | 3           |
| Launch Power Automate for desktop.                                                |             |
| Add people and select the user access type.                                       |             |

Navigation buttons: < > < >

Answer:

Explanation:

**Actions**

- Add people and select the co-owner access type.
- Select a flow and select **Share**.
- Navigate to <https://flow.microsoft.com>.
- Launch Power Automate for desktop.
- Add people and select the user access type.

**Answer area**

- Navigate to <https://flow.microsoft.com>.
- Select a flow and select **Share**.
- Add people and select the co-owner access type.

Microsoft

Navigate to <https://flow.microsoft.com> and sign in with your organization premium account.

Select a flow and select **Share**.

Add people and select the co-owner access type.

### NEW QUESTION # 36

You develop automation solutions for a company.

You need to configure variables for a cloud flow solution.

Which types of variables should you use for each type of data? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

| Requirement                                           | Variable type                                                                                                                                                              |
|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Store a list of names in JSON format.                 | <input type="checkbox"/> Object<br><input type="checkbox"/> Float<br><input type="checkbox"/> Integer<br><input type="checkbox"/> Array                                    |
| Store the URL for a website.                          | <input type="checkbox"/> Object<br><input type="checkbox"/> String<br><input type="checkbox"/> Float<br><input type="checkbox"/> Integer<br><input type="checkbox"/> Array |
| Store a date using the following pattern: yyyy-MM-dd. | <input type="checkbox"/> Object<br><input type="checkbox"/> String<br><input type="checkbox"/> Float<br><input type="checkbox"/> Integer<br><input type="checkbox"/> Array |
| Store a price for a product.                          | <input type="checkbox"/> Object<br><input type="checkbox"/> String<br><input type="checkbox"/> Float<br><input type="checkbox"/> Integer<br><input type="checkbox"/> Array |

Microsoft

**Answer:**

Explanation:

## Answer Area

| Requirement                                           | Variable type                                                                            |
|-------------------------------------------------------|------------------------------------------------------------------------------------------|
| Store a list of names in JSON format.                 | <div>Object</div> <div>Float</div> <div>Integer</div> <div>Array</div>                   |
| Store the URL for a website.                          | <div>Object</div> <div>String</div> <div>Float</div> <div>Integer</div> <div>Array</div> |
| Store a date using the following pattern: yyyy-MM-dd. | <div>Object</div> <div>String</div> <div>Float</div> <div>Integer</div> <div>Array</div> |
| Store a price for a product.                          | <div>Object</div> <div>String</div> <div>Float</div> <div>Integer</div> <div>Array</div> |

Explanation:

## Answer Area

### Requirement

### Solution

Store a list of names in JSON format.

Object  
Float  
Integer  
**Array**

Store the URL for a website.

Object  
**String**  
Float  
Integer  
Array

Store a date using the following pattern: yyyy-MM-dd.

Object  
**String**  
Float  
Integer  
Array

Store a price for product.

Object  
String  
**Float**  
Integer  
Array

### NEW QUESTION # 37

You need to implement a solution to manage the priority of incoming orders.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

| Actions                                                              | Answer area |
|----------------------------------------------------------------------|-------------|
| Edit the desktop flow.                                               |             |
| Edit the cloud flow.                                                 |             |
| Modify the Run a flow built with Power Automate for desktop action.  |             |
| Change the desktop flow's priority to High.                          |             |
| Set the priority value based on the volume for an order.             |             |
| Set the desktop flow's queue order based on the volume for an order. |             |
| Select the desktop flow and then select <b>Move to top</b> .         |             |

**Answer:**

Explanation:

| Actions                                                              | Answer area                                                         |
|----------------------------------------------------------------------|---------------------------------------------------------------------|
| Edit the desktop flow.                                               | Edit the cloud flow.                                                |
| Edit the cloud flow.                                                 | Modify the Run a flow built with Power Automate for desktop action. |
| Modify the Run a flow built with Power Automate for desktop action.  | Set the priority value based on the volume for an order.            |
| Change the desktop flow's priority to High.                          |                                                                     |
| Set the priority value based on the volume for an order.             |                                                                     |
| Set the desktop flow's queue order based on the volume for an order. |                                                                     |
| Select the desktop flow and then select <b>Move to top</b> .         |                                                                     |

Explanation

Edit the cloud flow.

Modify the Run a flow built with Power Automate for desktop action.

Set the priority value based on the volume for an order.

To implement a solution to manage the priority of incoming orders, you need to perform three actions in sequence:

Edit the cloud flow that triggers the desktop flow. This is where you can define the logic for setting the priority value based on the volume for an order<sup>1</sup>.

Modify the Run a flow built with Power Automate for desktop action in the cloud flow. This is where you can pass the priority value as a parameter to the desktop flow<sup>1</sup>.

Set the priority value based on the volume for an order in the desktop flow. This is where you can use the priority value as a dynamic content to determine how the desktop flow will run on the target machine<sup>1</sup>.

### NEW QUESTION # 38

You are setting up a data loss prevention (DLP) policy for an environment. The default policy group is set to Non-business.

You must configure the following apps in the policy:

- \* AppA will be used for tracking business-sensitive data.
- \* AppB will be deployed in six months and must be automatically added to the published policy.
- \* AppC uses a custom connector. The connector uses personal data for testing. When testing is complete, the connector will connect to business-sensitive data.

You need to select the appropriate policy for each app.

Which policy should you use for each app? To answer, drag the appropriate policies to the correct apps. Each app may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Policies         | Answer Area | App  | Policy |
|------------------|-------------|------|--------|
| Blocked          |             | AppA |        |
| Business data    |             | AppB |        |
| Default group    |             | AppC |        |
| Move to business |             |      |        |

**Answer:**

**Explanation:**

| Policies         | Answer Area | App  | Policy           |
|------------------|-------------|------|------------------|
| Blocked          |             | AppA | Move to business |
| Business data    |             | AppB | Default group    |
| Default group    |             | AppC | Blocked          |
| Move to business |             |      |                  |

**Explanation**

| Policies         | Answer Area | App  | Policy           |
|------------------|-------------|------|------------------|
| Blocked          |             | AppA | Move to business |
| Business data    |             | AppB | Default group    |
| Default group    |             | AppC | Blocked          |
| Move to business |             |      |                  |

## NEW QUESTION # 39

.....

We believe that one of the most important things you care about is the quality of our PL-500 exam materials, but we can ensure that the quality of it won't let you down. Many candidates are interested in our PL-500 exam materials. What you can set your mind at rest is that the PL-500 exam materials are very high quality. PL-500 exam materials draw up team have a strong expert team to constantly provide you with an effective training resource. They continue to use their rich experience and knowledge to study the real exam questions of the past few years, to draw up such an exam materials for you. In other words, you can never worry about the quality of PL-500 Exam Materials, you will not be disappointed.
