Reliable Docker DCA Exam Syllabus - DCA Training Online

Every day is new beginning; we will have a good mood. Hot and outstanding IT certification will be a good beginning for your IT career road. Docker DCA current exam content will be a strong helper for you. If you want to realize your dream and get a certification, Exam4PDF provide the best valid Docker DCA Current Exam Content materials to help you pass tests. And you will have a great progress in a short time.

Docker Certified Associate (DCA) Exam Sample Questions (Q187-Q192):

NEW QUESTION # 187

Is this a function of UCP?

Solution: enforces the deployment of signed images to the cluster

- A. No
- B. Yes

Answer: A

NEW QUESTION # 188

The Kubernetes yaml shown below describes a networkPolicy.

```
apiVersion: networking.k8s.io/v1
kind: NetworkPolicy
metadata:
  name: docker
  namespace: default
spec:
  podSelector:
    matchLabels:
      tier: backend
  ingress:
    - from:
      - podSelector:
          matchLabels:
            tier: api
    ...
```

Will the networkPolicy BLOCK this traffic?

Solution: a request issued from a pod bearing only the tier: frontend label, to a pod bearing the tier: backend label

- A. Yes
- B. No

Answer: A

Explanation:

The provided Kubernetes NetworkPolicy YAML configuration indicates that the policy applies to pods with the label tier: backend in the default namespace. The ingress rule allows traffic from pods with the label tier: api. Therefore, a request issued from a pod bearing only the tier: frontend label to a pod bearing the tier: backend label will be blocked by this networkPolicy. This is because the networkPolicy does not have a rule allowing ingress from pods with the tier: frontend label. For more information on Kubernetes NetworkPolicies, you can refer to the Kubernetes Documentation on Network Policies.

NEW QUESTION # 189

Will this command list all nodes in a swarm cluster from the command line?

Solution: 'docker ls -a'

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

Using 'docker ls -a' does not list all nodes in a swarm cluster from the command line. The docker ls command is not a valid command. To list containers, you need to use 'docker container ls' or 'docker ps'. To list images, you need to use 'docker image ls' or 'docker images'. To list nodes in a swarm cluster, you need to use 'docker node ls'. References: https://docs.docker.com/engine/reference/commandline/container_ls/, https://docs.docker.com/engine/reference/commandline/image_ls/, https://docs.docker.com/engine/reference/commandline/node_ls/

NEW QUESTION # 190

Are these conditions sufficient for Kubernetes to dynamically provision a persistentVolume, assuming there are no limitations on the amount and type of available external storage?

Solution: A default provisioner is specified, and subsequently a persistentVolumeClaim is created.

- A. No
- B. Yes

Answer: A

Explanation:

= The conditions are not sufficient for Kubernetes to dynamically provision a persistentVolume, because they are missing a StorageClass object. A StorageClass object defines which provisioner should be used and what parameters should be passed to that provisioner when dynamic provisioning is invoked. A persistentVolumeClaim must specify the name of a StorageClass in its storageClassName field to request a dynamically provisioned persistentVolume. Without a StorageClass, Kubernetes cannot determine how to provision the storage for the claim. Reference:

Dynamic Volume Provisioning | Kubernetes

Persistent volumes and dynamic provisioning | Google Kubernetes Engine ...

Dynamic Provisioning and Storage Classes in Kubernetes or Dynamic Provisioning and Storage Classes in Kubernetes

NEW QUESTION # 191

A host machine has four CPUs available and two running containers. The sysadmin would like to assign two CPUs to each container.

Which of the following commands achieves this?

- A. Set the '--cpuset-cpus' flag of the 'dockerd' process to the value 'even-spread'
- B. Set the '--cpuset-cpus' flag to '.5' on both containers
- C. Set the '--cpu-quota' flag to '1.3' on one container and '2.4' on the other container.
- D. Set the '--cpuset-cpu's flag to '1.3' on one container and '2.4' on the other container.

Answer: B

NEW QUESTION # 192

.....

As everybody knows, competitions appear ubiquitously in current society. In order to live a better live, people improve themselves by furthering their study, as well as increase their professional DCA skills. With so many methods can boost individual competitiveness, people may be confused, which can really bring them a glamorous work or brighter future? We are here to tell you that a DCA Certification definitively has everything to gain and nothing to lose for everyone. And our DCA exam questions are the best choice to help you pass the DCA exam and get the certification.

Reliable DCA Exam Syllabus: <https://www.exam4pdf.com/DCA-dumps-torrent.html>

Since inception, our company has been working on the preparation of DCA learning guide, and now has successfully helped tens of thousands of candidates around the world to pass the exam, Among global market, DCA guide question is not taking up such a large share with high reputation for nothing, When it comes to the DCA study materials selling in the market, qualities are patchy.

Tax position location and status) of the target investor base, DCA As noted previously, visual contrast is highly desirable with small-footprint videos, Since inception, our company has been working on the preparation of DCA learning guide, and now has successfully helped tens of thousands of candidates around the world to pass the exam.

Use Docker DCA Exam Dumps And Get Successful

Among global market, DCA guide question is not taking up such a large share with high reputation for nothing, When it comes to the DCA study materials selling in the market, qualities are patchy.

Then you will find that your work ability is elevated greatly by studying our DCA actual exam, Dear everyone, are you tired of your
