So our products are absolutely your first choice to prepare for the test SAFe-Practitioner certification.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q75-Q80):

NEW QUESTION # 75
Which statement correctly describes one aspect of the team's commitment at the end of PI Planning?

- A. A team does not commit to uncommitted objectives
- B. A team commits to all the Features they put on the ART planning board
- C. A team commits to all the Stories they put on their PI plan
- D. A team commits only to the PI Objectives with the highest business value

Answer: A

Explanation:
A team's commitment at the end of PI Planning is based on the PI Objectives that they have defined and negotiated with the Business Owners and other stakeholders. PI Objectives are SMART (Specific, Measurable, Achievable, Relevant, and Time-bound) goals that reflect the expected business and technical outcomes for the upcoming PI. A team does not commit to uncommitted objectives, which are stretch goals that may or may not be achieved depending on the actual capacity and velocity of the team. Uncommitted objectives are not included in the vote of confidence or the business value assessment. NEW QUESTION # 76
Which of the following are true for the System demo?

- A. Features are functionally complete or "toggled" so as not to disrupt demonstrable functionality
- B. It is not mandatory to have all the functionalities tested before the demo
- C. It happens once per PI, at the end of the PI
- D. Architectural Runway work in process is scaffolded and toggled

Answer: A,D

NEW QUESTION # 77
What is one example of differentiating business objectives?

- A. Solution Intent
- B. Enterprise Goals
- C. Strategic Themes
- D. Portfolio Vision

Answer: C

Explanation:
Differentiating business objectives are those that provide competitive differentiation and strategic advantage for the enterprise. They reflect the unique value proposition and vision of the enterprise and guide the portfolio strategy and decision-making. One example of differentiating business objectives is Strategic Themes, which are portfolio-level business objectives that connect a portfolio to the strategy of the enterprise.
They are written in Objective and Key Result (OKR) format and influence the vision, budget, and backlogs for the portfolio, large solution, and program levels. They also provide business context and alignment for the agile teams and ARTs in the portfolio.

NEW QUESTION # 78
Which of the following SAFe Core Competencies of Business Agility includes the Customer Centricity and Design Thinking dimension?

- A. Continuous Learning Culture
- B. Lean-Agile Leadership

- C. Lean Portfolio Management
- D. Agile Product Delivery

Answer: D

Explanation:
Agile Product Delivery is one of the SAFe Core Competencies of Business Agility that includes the Customer Centricity and Design Thinking dimension. Agile Product Delivery is a customer-centric approach to defining, building, and releasing a continuous flow of valuable products and services to customers and users. It requires a close collaboration between the business and IT, and a focus on delivering solutions that meet the current and future needs of the customers and users. Customer Centricity and Design Thinking are key aspects of Agile Product Delivery that help enterprises understand their customers and users better, empathize with their problems and goals, and co-create solutions that delight them. Customer Centricity and Design Thinking also enable enterprises to validate their assumptions and hypotheses, and pivot when necessary to achieve the desired outcomes. NEW QUESTION # 79
What is one component of a Guardrail in Lean Portfolio Management?

- A. Participatory budgeting forums that lead to Value Stream budget changes
- B. Allocation of centralized vs decentralized decisions in the Enterprise
- C. Determining if business needs meet the Portfolio Threshold
- D. Capacity allocation of the Value Stream compared to process mapping

Answer: B

Explanation:
A guardrail in Lean Portfolio Management (LPM) is a policy or practice that helps ensure that the portfolio is aligned and funded to create and maintain the solutions needed to meet business targets. One of the guardrails in LPM is the allocation of centralized vs decentralized decisions in the enterprise. This guardrail defines the boundaries and guidelines for decision making at different levels of the organization, such as strategic, tactical, and operational. Centralized decisions are those that require alignment and agreement across multiple value streams or portfolios, such as vision, strategy, budget allocation, and governance. Decentralized decisions are those that can be made by the value streams or teams closest to the customer and the work, such as backlog prioritization, solution design, and delivery. The goal of this guardrail is to empower the teams and value streams to make fast and effective decisions, while ensuring alignment and coherence at the portfolio and enterprise levels12.
