In the ever-changing world that is cybersecurity, being ahead of the curve is not just a matter of goal, but essential. [Securing Networks with Cisco Firepower 300-710 Exam Practice Questions](#) is an important step in gaining a thorough understanding of network security. This comprehensive guide is your complete guide, offering tips, techniques, strategies and questions that will help you succeed in securing networks.

Understanding Cisco Firepower 300-710 Exam

Before diving into the intricacies of exam questions we must first understand the fundamentals. The Cisco Firepower 300-710 Exam is designed to assess your skills in the implementation of advanced firewalls, including setup, and troubleshooting of Cisco security equipment. This test will testify to your ability to provide solid security for your network using Cisco Firepower Threat Defense technology.

Key exam objectives

- 1. Firepower Threat Defense Architecture:** Learn about the structure and deployment methods that comprise Firepower Threat Defense (FTD).
- 2. Deployment:** Manage the use of Firepower Threat defense devices. Also, establish high-availability.

Valid 300-710 Exam Format Newest Questions Pool Only at ActualTestsQuiz

Our company pays high attentions to the innovation of our 300-710 study materials. We constantly increase the investment on the innovation and build an incentive system for the members of the research expert team. Our experts group specializes in the research and innovation of our 300-710 Study Materials and supplements the latest innovation and research results into the 300-710 study materials timely.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q349-Q354):

NEW QUESTION # 349

An administrator is working on a migration from Cisco ASA to the Cisco FTD appliance and needs to test the rules without disrupting the traffic. Which policy type should be used to configure the ASA rules during this phase of the migration?

- A. identity
- **B. Prefilter**
- C. Access Control
- D. Intrusion

Answer: B

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/security/firepower/migration-tool/migration-guide/ASA2FTD-with-FP-Migration-Tool/b_Migration_Guide_ASA2FTD_chapter_01011.html

NEW QUESTION # 350

What is a functionality of port objects in Cisco FMC?

- A. to represent all protocols in the same way
- B. to mix transport protocols when setting both source and destination port conditions in a rule
- **C. to represent protocols other than TCP, UDP, and ICMP**
- D. to add any protocol other than TCP or UDP for source port conditions in access control rules.

Answer: C

Explanation:

Reference: https://www.cisco.com/c/en/us/td/docs/security/firepower/620/configuration/guide/fpmc-config-guide-v62/reusable_objects.html

NEW QUESTION # 351

An organization recently implemented a transparent Cisco FTD in their network. They must ensure that the device does not respond to insecure SSL/TLS protocols. Which action accomplishes this task?

- **A. Use the Cisco FTD platform policy to change the minimum SSL version on the device to TLS 1.2.**
- B. Modify the device's settings using the device management feature within Cisco FMC to force only secure protocols.
- C. Configure a FlexConfig object to disable any insecure TLS protocols on the Cisco FTD device.
- D. Enable the UCAPL/CC compliance on the device to support only the most secure protocols available.

Answer: A

NEW QUESTION # 352

An engineer runs the command `restore remote-manager-backup location 2.2.2.2 admin /Volume/home/admin FTD408566513.zip` on a Cisco FMC. After connecting to the repository, the Cisco FTD device is unable to accept the backup file. What is the reason for this failure?

- **A. The backup file extension was changed from .tar to .zip.**

- B. The wrong IP address is used.
- C. The backup file is not in .cfg format.
- D. The directory location is incorrect.

Answer: A

Explanation:

NEW QUESTION # 353

An administrator receives reports that users cannot access a cloud-hosted web server. The access control policy was recently updated with several new policy additions and URL filtering.

What must be done to troubleshoot the issue and restore access without sacrificing the organization's security posture?

- A. Create a new access control policy rule to allow ports 80 and 443 to the FQDN of the web server.
- B. Verify the blocks using the packet capture tool and create a rule with the action monitor for the traffic.
- C. Download a PCAP of the traffic to verify the blocks and use the FlexConfig to override the existing policy.
- D. Review the output in connection events to validate the block, and modify the policy to allow the traffic.

Answer: D

NEW QUESTION # 354

.....

We are concentrating on the reform on the 300-710 exam material that our candidates try to get aid with. We own the profession experts on compiling the 300-710 practice questions and customer service on giving guide on questions from our clients. Our 300-710 Preparation materials contain three versions: the PDF, the Software and the APP online. They give you different experience on trying out according to your interests and hobbies. And they can assure your success by precise information.
