The Prep4cram is a trusted and reliable platform that has been helping the Salesforce Certified Experience Cloud Consultant (Experience-Cloud-Consultant) certification exam candidates for many years. Over this long time period, the Experience-Cloud-Consultant Exam Practice questions have helped the Experience-Cloud-Consultant exam candidates in their preparation and enabled them to pass the challenging exam on the first attempt.

Salesforce Certified Experience Cloud Consultant certification is intended for individuals who have experience in implementing Salesforce Experience Cloud solutions. It is ideal for consultants, developers, and architects who work with customers to design and implement Experience Cloud solutions.

Achieving the Salesforce Certified Experience Cloud Consultant certification demonstrates a candidate's expertise in designing and implementing Experience Cloud solutions. It also demonstrates their ability to work collaboratively with clients to understand their business requirements and provide them with solutions that meet their needs. Salesforce Certified Experience Cloud Consultant certification is recognized globally and is highly valued by employers, making it an excellent career advancement opportunity for professionals in the Salesforce ecosystem.

Salesforce Experience-Cloud-Consultant (Salesforce Certified Experience Cloud Consultant) Exam is designed to test individuals'

knowledge and skills in implementing and managing Salesforce Experience Cloud, which is a platform that enables organizations to create and manage digital experiences for their customers, partners, and employees. Experience-Cloud-Consultant exam validates a candidate's ability to design and implement Experience Cloud solutions that meet the business requirements of clients. Salesforce Certified Experience Cloud Consultant certification exam is ideal for professionals who have experience working with Salesforce and want to enhance their knowledge of Experience Cloud.

Experience-Cloud-Consultant free reference & Salesforce Experience-Cloud-Consultant valid practice torrent are available, no waiting

Testing yourself is an effective way to enhance your knowledge and become familiar with the Experience-Cloud-Consultant exam format. Rather than viewing the Experience-Cloud-Consultant test as a potentially intimidating event, Prep4cram Salesforce Certified Experience Cloud Consultant (Experience-Cloud-Consultant) desktop and web-based practice exams help candidates assess and improve their knowledge. If your Experience-Cloud-Consultant Practice Exams (desktop and web-based) results aren't ideal, it's better to experience that shock during a mock exam rather than the Experience-Cloud-Consultant actual test.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q160-Q165):

NEW QUESTION # 160
The Salesforce Administrator at Ursa Major Solar is trying to create a partner user for their Partner Community that was built using Salesforce Experience Builder. However, the admin is not able to create it from the contact record.
What could be two reason causing this issue?
Choose 2 answers

- A. The Salesforce administrator is not marked as a delegated administrator on the partner account.
- B. The Salesforce Administrator is not a member of the Partner Community
- C. The account record associated with the contact record is not enabled as a partner.
- D. The Salesforce Administrator is not assigned a role in Salesforce.

Answer: C,D

NEW QUESTION # 161
Ursa Major Solar has a customer portal where both customers and employees can log in to view information about the company.
The marketing team has created a special design of their lago and company branding for their Platinum customers, and would like the user interface in the portal to reflect that special design when a Platinum Calculator customer is logged in.
Which functionality should the Experience Cloud manager use to achieve this?

- A. Branding Sets
- B. Templates
- C. Themes
- D. CMS Connect a

Answer: A

NEW QUESTION # 162
The Salesforce Administrator at Ursa Major Solar is trying to create a partner user for their Partner Community that was built using Salesforce Experience Builder. However, the admin is not able to create it from the contact record.
What could be two reason causing this issue?
Choose 2 answers

- A. The Salesforce Administrator is not assigned a role in Salesforce.
- B. The Salesforce Administrator is not a member of the Partner Community
- C. The Salesforce administrator is not marked as a delegated administrator on the partner account.
- D. The account record associated with the contact record is not enabled as a partner.

Answer: C,D

Explanation:
Two reasons causing this issue are C and D. To create a partner user for their Partner Community, the Salesforce administrator needs to have two requirements met: The account record associated with the contact record must be enabled as a partner, which means that it has the Is Partner checkbox checked. This indicates that the account is part of your partner network and can access your Partner Community site. The Salesforce administrator must be marked as a delegated administrator on the partner account, which means that they have limited administrative privileges to perform certain user management tasks on behalf of an administrator. This allows them to create partner users from contact records without having full system administrator access.

NEW QUESTION # 163
Cloud Kicks (CK) uses SSO (Single Sign-on) for its customer portal. The customer portal is built on the Customer Service template which uses LDS (Lightning Design System) and has public pages that use Lightning Web Components. CK gas also set up the Salesforce Content Delivery Network (CDN) for its domain, which CK is planning to change.

- A. Changing the Salesforce CDN impacts definitions of all Lightning Web Components used in public pages.
- B. Changing the Salesforce CDN overwritesLDS defaults.
- C. Changing the Salesforce CDN impacts the AppExchange packages in the org that use Documents object.
- D. Changing the Salesforce CDN affects SAML SSO settings for all custom URLs in that domain.

Answer: A

Explanation:
Salesforce Content Delivery Network (CDN) is a feature that allows you to improve the performance of your site by caching static resources, such as images, JavaScript, and CSS files. However, changing the Salesforce CDN has some implications, such as:
* Changing the Salesforce CDN impacts definitions of all Lightning Web Components used in public pages. You need to redeploy your components after changing the CDN to ensure that they work properly.
* Changing the Salesforce CDN does not affect SAML SSO settings for all custom URLs in that domain.
SAML SSO settings are independent of the CDN settings.
* Changing the Salesforce CDN does not impact the AppExchange packages in the org that use Documents object. Documents object is not affected by the CDN settings.
* Changing the Salesforce CDN does not overwrite LDS defaults. LDS defaults are not affected by the CDN settings.

NEW QUESTION # 164
Ursa Major Solar created a public knowledge base where both authenticated customers and unauthenticated guest users can view Known articles as a self-service option to troubleshoot issues.
When creating a Knowledge article, which checkbox should be selected so that all users can view the articles?

- A. Visible to Public Knowledge Base
- B. Visible to Customer
- C. Visible to Partner
- D. Visible to Anyone

Answer: A
