ATLASSIAN ACP-100 (Jira Administrator) Exam is a certification exam designed for professionals who have experience in administering and configuring Jira Software. Jira Software is a project management tool that is widely used by software development teams to plan, track, and release software. The ACP-100 exam is designed to test the knowledge and skills of individuals who are responsible for managing Jira Software environments.

The ACP-100 certification exam covers a wide range of topics related to Jira administration, including user management, project configuration, workflow management, issue types, schemes, and permissions. ACP-100 exam is designed to test the candidate's knowledge of Jira administration best practices, as well as their ability to troubleshoot and resolve common issues that arise in Jira instances.

ATLASSIAN ACP-100: Jira Administrator exam is one of the popular certifications that validates the skills and knowledge required to become a successful Jira administrator. ACP-100 Exam is designed to test the candidate's proficiency in major areas such as configuring Jira, managing user access, creating workflows, setting up dashboards, and reports. ACP-100 is an expert-level certification that is highly valued by organizations who use Jira as their project management tool.

ATLASSIAN Jira Administration for Data Center Sample Questions (Q45-Q50):

NEW QUESTION # 45

Sundar's development projects are falling behind. He wants to write a JQL query to find issues that meet all three of these criteria:

- * He is the project lead of the project or the project is DEV.
- * fixVersion had been set to 4.3 at some point but was later removed.
- * Issues were created in the first 15 days of this month.

The Exhibit shows the JQL query he created.

Which statement about Sundar's query is true?

- A. The query will not return the right set of issues because line 2 only is wrong.
- B. The query will return the right set of issues, but it is inefficient.
- C. The query is valid, but it will not run without a Jira Marketplace app.
- D. The query will not return the right set of issues because the parentheses are wrong.
- E. The query is well written and will return the right set of issues.
- F. The query will not return the right set of issues because lines 2 and 3 are wrong.

Answer: C

NEW QUESTION # 46

You are setting up a new Jira instance and three new projects with shared configuration.

There are many managers at the company and you need to structure their permissions accordingly.

Which requirement can only be met with a Managers project role?

- A. Different managers need to delete issues in different projects.
- B. Managers need to be able to create shared dashboards.
- C. Only some managers must be selectable from a custom field, depending on the project.
- D. Any manager should be able to view the development tools in any project.
- E. Only managers who are project leads can see the restricted security level in their own projects.

Answer: E

NEW QUESTION # 47

Users often change The reporter and add a comment To explain why.
