100% Pass Axis - ANVE - Axis Network Video Exam Pass-Sure Exam Materials

It is never too late to try new things no matter how old you are. Someone always give up their dream because of their ages, someone give up trying to overcome ANVE exam because it was difficult for them. Now, no matter what the reason you didn't pass the

exam, our study materials will try our best to help you. If you are not sure what kinds of ANVE Exam Question is appropriate for you, you can try our free demo of the PDF version. For instance, our ANVE practice torrent is the most suitable learning product for you to complete your targets.

Axis Network Video Exam Sample Questions (Q149-Q154):

NEW QUESTION # 149

When designing a network video system, which are the benefits of configuring VLANs? (Select two)

- A. It helps avoid network congestion
- B. It increases the network bandwidth
- C. In some cases, it lowers the bandwidth consumption
- D. Interconnectivity between networks is enabled
- E. It keeps the network traffic separated from other networks

Answer: A,E

Explanation:

Configuring VLANs (Virtual Local Area Networks) in a network video system has several benefits. Firstly, VLANs keep network traffic separated from other networks, enhancing security and ensuring that video data does not mix with other types of traffic. This separation is crucial for maintaining the integrity and security of the video streams. Secondly, VLANs help avoid network congestion by logically segmenting the network, which improves overall network performance and reduces the likelihood of traffic bottlenecks. Axis documentation supports the use of VLANs to enhance network efficiency and security in video surveillance systems.

NEW QUESTION # 150

What advantage does Axis Sharpdome technology provide for PTZs?

- A. It enables the PTZ to see above the horizon
- B. It maximizes the IR range
- C. It uses a laser to maintain focus
- D. It prevents damage during cold weather startup

Answer: A

Explanation:

Axis Sharpdome technology provides the advantage of enabling PTZ cameras to see above the horizon. This innovative design allows for 360-degree coverage and significantly enhances the field of view, making it possible to monitor areas both above and below the camera's position without distortion. This feature is particularly beneficial for applications requiring extensive coverage and flexible monitoring angles. Axis Communications' product details on Sharpdome technology highlight this capability.

NEW QUESTION # 151

IP51 and IP52 means that the camera

- A. Is designed for tough environments.
- B. Can be placed in or outdoors.
- C. Is vandal resistant.
- D. Is resistant to dust and dripping water.

Answer: D

Explanation:

The IP51 and IP52 ratings indicate that the camera is protected against dust and dripping water. IP51 means the camera is protected against dust ingress to a level that would interfere with the operation and against vertically dripping water. IP52 offers the same dust protection but also protects against dripping water when tilted up to 15 degrees. These ratings make the cameras suitable for indoor use where dust and minor water exposure might occur. Axis Network Video documentation specifies the IP rating system and the levels of protection provided by different ratings.

NEW QUESTION # 152

Which of the following statements are true for H.264? (Choose two)

- A. The size of an I-frame depends on the preceding P-frame
- **B. Longer GOV length means reduced bit rate**
- C. A P-frame references preceding and succeeding P-frames
- **D. Increased motion in a scene means increased bit rate**
- E. Group of Video (GOV) length is directly affected by the sizes of the I- and P-frames

Answer: B,D

NEW QUESTION # 153

Which of the following conditions has to be met to use multicast streaming?

- A. The client has to run AXIS Camera Management or AXIS Camera Station
- B. The video device needs to run on firmware version 5.20 or higher
- **C. The network infrastructure has to support multicast**
- D. The client has to support streaming over RTSP

Answer: C

NEW QUESTION # 154

.....

You will notice the above features in the Axis ANVE Web-based format too. But the difference is that it is suitable for all operating systems. There is no need to go through time-taking installations or agitating plugins to use this format. It will lead to your convenience while preparing for the Axis Network Video Exam (ANVE) certification test. Above all, it operates on all browsers.
