

Free PDF Quiz Cisco First-grade 350-701 - Implementing and Operating Cisco Security Core Technologies Reliable Dumps Free

P.S. Free & New 350-701 dumps are available on Google Drive shared by BrindumpsPrep: <https://drive.google.com/open?id=1d-vxMHDTSMB1h2zjuewRYkKVUTRTsaOJ>

The Cisco 350-701 practice test software also keeps a record of attempts, keeping users informed about their progress and allowing them to improve themselves. This feature makes it easy for 350-701 desktop-based practice exam software users to focus on their mistakes and overcome them before the original attempt. Overall, the Windows-based Implementing and Operating Cisco Security Core Technologies (350-701) practice test software has a user-friendly interface that facilitates candidates to prepare for the Cisco 350-701 exam without facing technical issues.

Earning the Cisco 350-701 Certification demonstrates the candidate's ability to implement and manage Cisco security technologies to protect their organization's network infrastructure against cyber threats. Implementing and Operating Cisco Security Core Technologies certification also validates the candidate's skills in securing cloud environments, securing network access, and implementing advanced threat protection. Implementing and Operating Cisco Security Core Technologies certification opens up new career opportunities in the field of network security and provides a competitive advantage in the job market.

350-701 exam resources & 350-701 test prep & 350-701 pass score

How far is the word from the deed? If you are a man of strong will, victory is at hand. Since you want to pass Cisco 350-701 Exam, you must get the Cisco 350-701 certification. BrindumpsPrep provide you with the latest certification training information and the most accurate tests answers. Real questions and answers can make your dream come true.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q484-Q489):

NEW QUESTION # 484

Refer to the exhibit.

When configuring a remote access VPN solution terminating on the Cisco ASA, an administrator would like to utilize an external token authentication mechanism in conjunction with AAA authentication using machine certificates. Which configuration item must be modified to allow this?

- A. Group Policy
- B. DHCP Servers
- C. Method
- D. SAML Server

Answer: C

Explanation:

In order to use AAA along with an external token authentication mechanism, set the "Method" as "Both" in the Authentication.

NEW QUESTION # 485

Refer to the exhibit.

What does the number 15 represent in this configuration?

- A. number of possible failed attempts until the SNMPv3 user is locked out
- B. privilege level for an authorized user to this router
- C. interval in seconds between SNMPv3 authentication attempts
- D. access list that identifies the SNMP devices that can access the router

Answer: D

NEW QUESTION # 486

What does the Cloudlock Apps Firewall do to mitigate security concerns from an application perspective?

- A. It allows the administrator to quarantine malicious files so that the application can function, just not maliciously.
- **B. It discovers and controls cloud apps that are connected to a company's corporate environment.**
- C. It deletes any application that does not belong in the network.
- D. It sends the application information to an administrator to act on.

Answer: B

Explanation:

NEW QUESTION # 487

Which two capabilities of Integration APIs are utilized with Cisco DNA center? (Choose two)

- A. Create new SSIDs on a wireless LAN controller
- B. Automatically deploy new virtual routers
- **C. Connect to Information Technology Service Management Platforms**
- D. Upgrade software on switches and routers
- **E. Application monitors for power utilization of devices and IoT sensors**

Answer: C,E

Explanation:

Integration API (Westbound)

Integration capabilities are part of Westbound interfaces. To meet the need to scale and accelerate operations in modern data centers, IT operators require intelligent, end-to-end work flows built with open APIs. The Cisco DNA Center platform provides mechanisms for integrating Cisco DNA Assurance workflows and data with thirdparty IT Service Management (ITSM) solutions. Integration API (Westbound)

Integration capabilities are part of Westbound interfaces. To meet the need to scale and accelerate operations in modern data centers, IT operators require intelligent, end-to-end work flows built with open APIs. The Cisco DNA Center platform provides mechanisms for integrating Cisco DNA Assurance workflows and data with thirdparty IT Service Management (ITSM) solutions. Reference:

-> Therefore answer D is correct.

Westbound-Integration APIs

Cisco DNA Center platform can power end-to-end IT processes across the value chain by integrating various domains such as ITSM, IPAM, and reporting. By leveraging the REST-based Integration Adapter APIs, bidirectional interfaces can be built to allow the exchange of contextual information between Cisco DNA Center and the external, third-party IT systems. The westbound APIs provide the capability to publish the network data, events and notifications to the external systems and consume information in Cisco DNA Center from the connected systems.

Therefore the most suitable choice is Integration APIs can monitor for power utilization of devices and IoT sensors -> Answer C is correct.

The westbound APIs provide the capability to publish the network data, events and notifications to the external systems and consume information in Cisco DNA Center from the connected systems.

Therefore the most suitable choice is Integration APIs can monitor for power utilization of devices and IoT sensors -> Answer C is correct.

NEW QUESTION # 488

An organization recently installed a Cisco WSA and would like to take advantage of the AVC engine to allow the organization to create a policy to control application specific activity. After enabling the AVC engine, what must be done to implement this?

- A. Use security services to configure the traffic monitor, .
- B. Use web security reporting to validate engine functionality
- **C. Use an access policy group to configure application control settings.**
- D. Use URL categorization to prevent the application traffic.

Answer: C

Explanation:

The Application Visibility and Control (AVC) engine lets you create policies to control application activity on the network without having to fully understand the underlying technology of each application. You can configure application control settings in Access Policy groups. You can block or allow applications individually or according to application type. You can also apply controls to particular application types.

NEW QUESTION # 489

.....

We also fully consider the characteristics of the user on studying the 350-701 exam questions. For example, many people who choose to obtain a 350-701 certificate don't have a lot of time to prepare for the exam. Based on this point, our team of experts really took a lot of thought in the layout of the content. The contents of 350-701 Exam Materials are carefully selected by experts. We hope you can get the most effective knowledge in the shortest possible time.
