## Valid Exam 220-1201 Registration | 220-1201 Valid Exam Voucher

Our 220-1201 test prep embrace latest information, up-to-date knowledge and fresh ideas, encouraging the practice of thinking out of box rather than treading the same old path following a beaten track. As the industry has been developing more rapidly, our 220-1201 exam dumps have to be updated at irregular intervals in case of keeping pace with changes. To give you a better using environment, our experts have specialized in the technology with the system upgraded to offer you the latest 220-1201 Exam practices. And you can enjoy free updates of our 220-1201 learning prep for one year.

## CompTIA A+ Certification Exam: Core 1 Sample Questions (Q169-Q174):

### NEW QUESTION # 169

A user reports that the print quality of their desk printer is poor. A technician replaces the ink cartridge, but this does not resolve the issue. Which of the following should the technician do next?

- A. Change the ribbon
- B. Switch the paper type
- **C. Clean the printheads**
- D. Replace the pickup rollers

**Answer: C**

Explanation:

If print quality remains poor after replacing the ink cartridge, the next step is to clean the printheads.

Printheads can become clogged with dried ink, especially in inkjet printers, causing streaks or faded output.

From the CompTIA A+ 220-1101 Official Study Guide, Objective 4.3 - Troubleshoot printing problems:

"Poor print quality after replacing cartridges is commonly caused by clogged or dirty printheads. Use the printer's cleaning cycle or manually clean the printheads as needed." Verified Source:

\* CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 4: Printer Troubleshooting

\* CompTIA Exam Objectives 220-1101, Domain 4.3

### NEW QUESTION # 170

Which of the following provides electricity to devices through network cables?

- **A. PoE switch**
- B. Patch panel
- C. Edge router
- D. Access point

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A PoE (Power over Ethernet) switch transmits both data and electrical power over Ethernet cables to devices like wireless access points or VoIP phones. This is especially useful in areas where separate power sources are not available.

#Reference: "CompTIA A+ Complete Study Guide" by Quentin Docter - Chapter 5, pages 319-321.

### NEW QUESTION # 171

A user is having issues when charging a device with a Lightning cable. The cable is not recognized when it is plugged into the device. This issue is usually resolved by flipping the cable over. This issue does not occur with other devices of the same type. Which of the following would most likely cause the issue?

- A. The cable is failing and needs to be replaced
- B. The device needs to be restarted.
- **C. The charging port is dirty or damaged**
- D. The battery may be swelling and needs inspection.

**Answer: C**

Explanation:

If flipping the cable helps but the problem is isolated to this device (not others of the same type), the most likely cause is a dirty or damaged charging port on the device itself. Dirt or debris inside the port can prevent a good electrical connection, causing the cable to work intermittently.

1.6: Troubleshoot common mobile device issues.

### NEW QUESTION # 172

A user returns from a trip and discovers a computer that is connected to the LAN times out intermittently. Upon investigation, a technician finds the RJ45 pin is not properly terminated. Which of the following networking tools is most appropriate to fix the issue?

- A. Punchdown
- **B. Crimper**
- C. Cable tester
- D. Toner probe

**Answer: B**

Explanation:

D: Crimper:

A crimper is used to terminate an RJ45 cable properly by attaching the connector to the twisted-pair wires.

If the termination is not done correctly, the connection will be intermittent or fail entirely.

Incorrect Options:

A: Toner probe: Used to locate cables or trace their path, not for terminating RJ45 connectors.

B: Cable tester: Useful for testing connectivity but does not fix termination issues.

C: Punchdown: Used to connect wires to a patch panel or keystone jack, not for RJ45 connectors.

Key Takeaway: A crimper is the proper tool for fixing an improperly terminated RJ45 connection.

### NEW QUESTION # 173

Which of the following DNS record types is used to direct email to a mail server?

- A. CNAME
- B. SOA
- **C. MX**
- D. SRV

**Answer: C**

Explanation:

An MX (Mail Exchange) record specifies the mail server responsible for receiving email for a domain.

Why Not A (CNAME): CNAME is used for domain aliasing, not for email delivery.

Why Not B (SRV): SRV records are used to locate specific services, not mail servers.

Why Not D (SOA): SOA records provide domain information but do not handle email.

CompTIA A+ Exam Reference: Core 1 (220-1201), Section 2.6, DNS record types.

### NEW QUESTION # 174

.....

In order to make you confirm the quality of our 220-1201 Dumps and let you know whether the dumps suit you, pdf and software version in DumpsTests exam dumps can let you download the free part of our 220-1201 training materials. We will offer free the part of questions and answers for you and you can visit DumpsTests.com to search for and download these certification training materials. You cannot buy the dumps until you experience it so that you can avoid buying ignorantly the exam dumps without fully understanding the quality of questions and answers.
