Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

How does Identity Resolution select attributes for Unified Individuals when there is conflicting information in the Data Model?

- **A. Leverage Reconciliation Rules**
- B. Leverage Match Rules
- C. Create additional Rule Sets
- D. Create additional Contact Points

Answer: A

Explanation:

Reconciliation rules are used to select attributes for Unified Individuals when there is conflicting information in the Data Model. Reconciliation rules can use different methods to prioritize values, such as source sequence, most recent value, or most frequent value. For example, if two profiles have different first names, reconciliation rules can determine which one to use for the unified profile based on the source sequence or the most recent value. NEW QUESTION # 37

A customer has requested that their personal data be deleted. Which action should be performed to accommodate this request in Data Cloud?

- A. Use Ingestion API to request deletion of the customer's information
- B. Manually delete customer and related records using the Profile Explorer
- C. Use Consent API to request deletion of the customer's information
- D. Utilize the Data Rights Subject Request tool to request deletion of the customer's information

Answer: C

Explanation:

This action should be performed to accommodate the request to delete personal data in Data Cloud. The Consent API allows you to set a consent flag for an individual that prevents further processing of their data and deletes their records from source data streams. NEW QUESTION # 38

The leadership team at Cumulus Financial has declared that customers who have deposited more than \$250,000 in the last 5 years and who are not using advisory services, will be the central focus for all new campaigns in the next year. Which two features support this need?

- A. Dashboard
- B. Report
- C. Segment
- D. Calculated Insight

Answer: C,D

Explanation:

These two features support the need to calculate each customer's lifetime value (LTV) and create breakdowns of the revenue sourced by different channels. Calculated Insight allows you to create complex calculations based on stored data, such as LTV. Segment allows you to create audiences based on different criteria, such as revenue source.
