FCSS_ADA_AR-6.7 Free Sample, FCSS_ADA_AR-6.7 Latest Training

How our FCSS_ADA_AR-6.7 study questions can help you successfully pass your coming FCSS_ADA_AR-6.7 exam? The answer lies in the outstanding FCSS_ADA_AR-6.7 exam materials prepared by our best industry professionals and tested by our faithful clients. Our exam materials own the most authentic and useful information in questions and answers. For our FCSS_ADA_AR-6.7 practice material have been designed based on the format of real exam questions and answers that you would surely find better than the other exam vendors'.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q11-Q16):

NEW QUESTION # 11

A service provider purchases a licensed EPS of 520. The guaranteed EPS allocated to three customers is 50, 100, and 150

respectively. At the end of every three-minute interval, incoming EPS is calculated at every collector and the value is sent to the central decision-making engine on the supervisor node.

The incoming EPS for the first collector is 25, the incoming EPS for the second collector is 50, and the incoming EPS for the third collector is 75.

Based on the information provided, what is the unused events total calculated by the supervisor?

- A. 76.000
- B. 35.960
- C. 75.960
- D. 71.460

Answer: C

NEW QUESTION # 12

Refer to the exhibit.

```
<Name>Failed Logon profile</Name>
<CustomerScope groupByEachCustomer="true">
  <Include all="true"/>
  <Exclude/>
</CustomerScope>
<Description>This profile captures failed logons at the various servers and network devices.</Description>
<SelectClause numEntries="All">
  <AttrList>
    reptDevName, reptDevIpAddr, COUNT(*), COUNT(DISTINCT user), COUNT(DISTINCT srcIpAddr)
  </AttrList>
</SelectClause>
<OrderByClause>
  <AttrList>
    COUNT(*) DESC
  </AttrList>
</OrderByClause>
<ReportInterval>window unit="Hourly" val="1"</ReportInterval>
<PatternClause window="3600">
  <SubPattern displayName="Filter 1" name="Filter 1">
    <SingleEvtConstr> eventType IN (GroupPH SYS_EVENT HostLogonFailure) </SingleEvtConstr>
    <GroupByAttr> reptDevName, reptDevIpAddr </GroupByAttr>
  </SubPattern>
</PatternClause>
</DataRequest>
```

This is an example of a baseline profile that is configured in the backend of FortiSIEM.

Which two Group By attributes are configured for this profile? (Choose two.)

- A. Distinct User
- B. Reporting Device
- C. Logon Failure
- D. Reporting IP

Answer: B,D

Explanation:

From the provided XML configuration, we need to focus on the <GroupByAttr> section, which defines the attributes used for grouping.

In the SelectClause, the following attributes are listed:

reptDevName, reptDevAddr, COUNT(*), COUNT(DISTINCT user), COUNT(DISTINCT srcIpAddr)

*reptDevName represents the reporting device.

*reptDevAddr represents the reporting IP.

*COUNT(DISTINCT user) tracks unique users.

*COUNT(DISTINCT srcIpAddr) tracks distinct source IPs.

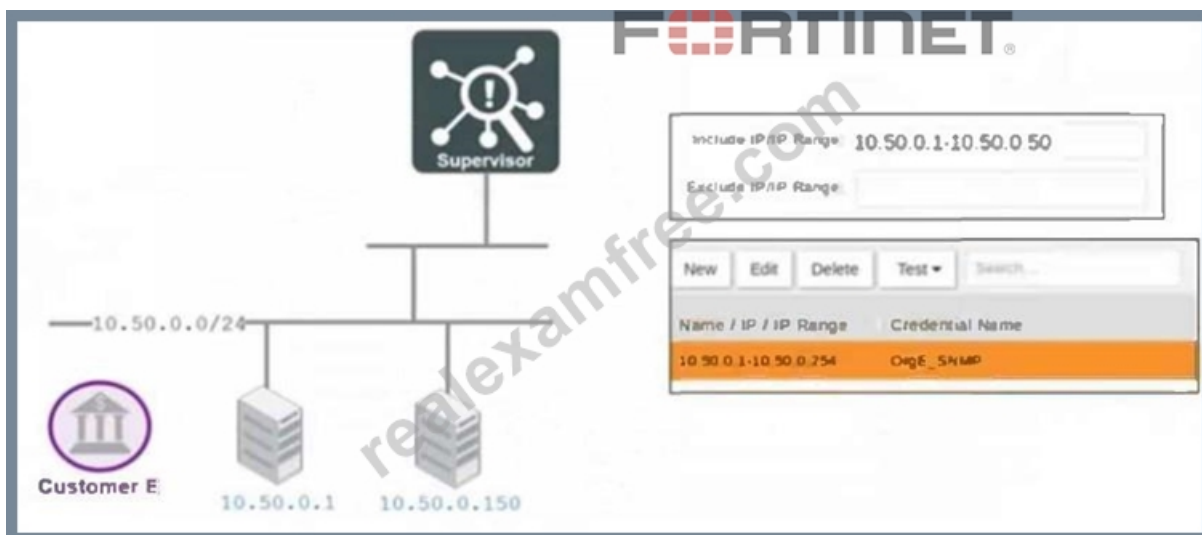

In the GroupByAttr section:

<GroupByAttr>reptDevName, reptDevAddr</GroupByAttr>

This confirms that the grouping is performed by Reporting Device (reptDevName) and Reporting IP (reptDevAddr).

NEW QUESTION # 13

Refer to the exhibit.

Which devices will be added to the CMDB and mapped to Customer E?

- A. 10.50.0.149
- B. 10.50.0.1
- C. 10.60.0.1
- D. 10.50.0.150

Answer: A,B

Explanation:

From the exhibit, we can determine the IP range that will be added to the CMDB and mapped to Customer E.

*The included IP range is 10.50.0.1 - 10.50.0.50.

*This means any device within this range (10.50.0.1 to 10.50.0.50) will be added to the CMDB.

10.50.0.1 → Falls within the included range (10.50.0.1 - 10.50.0.50) → Added to CMDB.

10.50.0.149 → Falls within the 10.50.0.1 - 10.50.0.50 range → Added to CMDB.

NEW QUESTION # 14

Which function of Linux is used by FortiSIEM for collecting logs?

- A. auditd
- B. aureport
- C. autrace
- D. ausearch

Answer: A

NEW QUESTION # 15

Refer to the exhibit.

```
psql -U phoenix phoenixdb
select cust_org_id, name, ip_addr, natural_id, collector_id from ph_sys_connector;
```

cust_org_id	name	ip_addr	natural_id	collector_id
2000	OrgA_Collector	10.10.2.91	564DA6D2-1D90-1483-23F9-43F2AC4A3ABF	1000

The exhibit shows the output of an SQL command that an administrator ran to view the `natural_id` value, after logging into the Postgres database.

What does the `natural_id` value identify?

- A. An agent
- B. The collector
- C. The supervisor
- D. The worker

Answer: B

Explanation:

The natural_id value in the ph_sys_connect table of the FortiSIEM PostgreSQL database uniquely identifies a collector.

The SQL query retrieves details from ph_sys_connector, which stores information about registered collectors.

The cust_org_id field indicates the organization ID the collector belongs to.

The name field shows the collector's name (OrgA_Collector).

The ip_addr field lists the collector's IP address (10.10.2.91).

The natural_id value uniquely identifies the collector in the system.

NEW QUESTION # 16

.....

One of the top features of Fortinet FCSS_ADA_AR-6.7 exam dumps is the FCSS_ADA_AR-6.7 exam passing a money-back guarantee. In other words, your investments with Fortinet FCSS_ADA_AR-6.7 exam questions are secured with the 100 FCSS—Advanced Analytics 6.7 Architect FCSS_ADA_AR-6.7 exam passing a money-back guarantee. Due to any reason, if you did not succeed in the final Fortinet FCSS_ADA_AR-6.7 exam despite using Fortinet FCSS_ADA_AR-6.7 PDF Questions and practice tests, we will return your whole payment without any deduction. While practicing on FCSS—Advanced Analytics 6.7 Architect FCSS_ADA_AR-6.7 practice test software you will experience the real-time FCSS—Advanced Analytics 6.7 Architect FCSS_ADA_AR-6.7 exam environment for preparation.
