

# Free PDF Quiz HP - HPE7-A06 - Trustable HPE Campus Access Switching Expert Written Exam Reliable Test Notes

2025 Latest Actual4test HPE7-A06 PDF Dumps and HPE7-A06 Exam Engine Free Share: <https://drive.google.com/open?id=1tgJOWr83gukBPpWinBv5Y00Bw0Uri9tI>

Our HPE7-A06 study materials are easy to be mastered and boost varied functions. We compile Our HPE7-A06 preparation questions elaborately and provide the wonderful service to you thus you can get a good learning and preparation for the HPE7-A06 exam. Now there are introduces on the web for you to know the characteristics and functions of our HPE7-A06 Training Materials in detail. And we also have free demo on the web for you to have a try on our HPE7-A06 exam questions. You will be touched by our great quality of HPE7-A06 study guide.

You only need 20-30 hours to learn our HPE7-A06 test braindumps and then you can attend the exam and you have a very high possibility to pass the exam. For many people whether they are the in-service staff or the students they are busy in their job, family lives and other things. But you buy our HPE7-A06 prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our HPE Campus Access Switching Expert Written Exam exam torrent. Our answers and questions are compiled elaborately and easy to be mastered. Because our HPE7-A06 Test Braindumps are highly efficient and the passing rate is very high you can pass the exam fluently and easily with little time and energy needed.

>> **HPE7-A06 Reliable Test Notes** <<

## Fantastic HP - HPE7-A06 Reliable Test Notes

As we all know, the preparation process for an exam is very laborious and time- consuming. We had to spare time to do other things to prepare for HPE7-A06 exam, which delayed a lot of important things. If you happen to be facing this problem, you should choose our HPE7-A06 real exam. With our study materials, only should you take about 20 - 30 hours to preparation can you attend the exam. The rest of the time you can do anything you want to do to, which can fully reduce your review pressure. Saving time and improving efficiency is the consistent purpose of our HPE7-A06 Learning Materials. With the help of it, your review process will no longer be full of pressure and anxiety.

## HPE Campus Access Switching Expert Written Exam Sample Questions (Q25-Q30):

### NEW QUESTION # 25

Match the customer requirement with the relevant commands.

Aggregate links across multiple switches.	Establish redundant links between the aggregation and core layers.
Extend layer 2 across multiple sites.	Identify individual layer 2 segments in an overlay.

**Answer Area**

```

interface vxlan 1
no shutdown
source ip 10.1.0.4

router ospf 1
maximum-paths 2

vni 11
vtep-peer 10.1.0.5
vlan 11

vsx
role primary
inter-switch-link lag 256
keepalive peer 192.168.0.1 source
192.168.0.0 vrf KA

```

**Answer:**

**Explanation:**

Aggregate links across multiple switches.	Establish redundant links between the aggregation and core layers.	<b>Answer Area</b>	Extend layer 2 across multiple sites.
Extend layer 2 across multiple sites.	Identify individual layer 2 segments in an overlay.		Establish redundant links between the aggregation and core layers.
			Identify individual layer 2 segments in an overlay.
			Aggregate links across multiple switches.

**Explanation:**

\* Aggregate links across multiple switches -->

vsx

role primary

inter-switch-link lag 256

keepalive peer 192.168.0.1 source 192.168.0.0 vrf KA

(Snippet 4)

\* Establish redundant links between the aggregation and core layers --> router ospf 1 maximum-paths 2 (Snippet 2)

\* Extend layer 2 across multiple sites -->

interface vxlan 1

no shutdown

source ip 10.1.0.4

(Snippet 1)

\* Identify individual layer 2 segments in an overlay -->

vni 11

vtep-peer 10.1.0.5

vlan 11

(Snippet 3)

Comprehensive Detailed Explanation along with All References available from related to the HPE Campus Access Switching Expert certification objectives at end of each question below:

\* **Aggregate links across multiple switches:** This requirement describes Multi-Chassis Link Aggregation (MC-LAG), where a device forms a LAG to two separate upstream switches that act as a logical pair. In AOS-CX, VSX (Virtual Switching Extension) enables this functionality. Snippet 4 shows commands related to setting up VSX (vsx, role primary, inter-switch-link, keepalive), which is the foundation for MC-LAG.

References: AOS-CX VSX Guide. Relates to "Network Resiliency and virtualization" (8%), "Switching" (19%).

**Establish redundant links between the aggregation and core layers:** This often involves Layer 3 routing protocols utilizing multiple paths. Snippet 2 (router ospf 1, maximum-paths 2) configures OSPF to use up to two Equal Cost Multi-Paths (ECMP). If redundant links between aggregation and core result in equal OSPF costs, this command enables load sharing and redundancy at Layer 3.

References: AOS-CX IP Routing Guide (OSPF, ECMP). Relates to "Routing" (16%), "Network Resiliency and virtualization" (8%).

**Extend layer 2 across multiple sites:** VXLAN (Virtual Extensible LAN) is the standard overlay technology for extending Layer 2 segments over an underlying Layer 3 network, enabling L2 adjacency across different physical locations (sites, racks, pods). Snippet 1 shows the basic configuration of a VXLAN tunnel interface (interface vxlan 1, source ip), which is the core component for VXLAN tunneling.

References: AOS-CX VXLAN Guide. Relates to "Switching" (19%), "Connectivity" (9%).

**Identify individual layer 2 segments in an overlay:** Within a VXLAN overlay, each separate Layer 2 broadcast domain (typically corresponding to a VLAN) is identified by a unique VXLAN Network Identifier (VNI). This VNI tags the encapsulated traffic.

Snippet 3 shows the configuration associating VNI 11 with the local VLAN 11 (vni 11, vlan 11). The vtep-peer command is relevant when using EVPN as the control plane.

This configuration directly maps an L2 segment (VLAN 11) to its identifier (VNI 11) within the overlay.

References: AOS-CX EVPN Guide, AOS-CX VXLAN Guide. Relates to "Switching" (19%), "Connectivity" (9%).

### NEW QUESTION # 26

Refer to the exhibit.

XYZ Company has deployed a multi-area OSPF AS where all the routers are operating an AOS-CX switches. Engineers want to join their proposed Area 3 to their existing backbone through ABR1 as per the exhibit.

Which script would help facilitate this solution?

ABR3(config)# router ospf 1

- A. ABR3(config-ospf-1)# area 3 virtual-link 10.0.0.0/16 10.255.0.1  
ABR1(config)# router ospf 1  
ABR1(config-ospf-1)# area 1 virtual-link 10.1.128.0/17 10.255.0.3
- B. ABR3(config-ospf-1)# area 1 virtual-link 10.255.0.1  
ABR1(config)# router ospf 1  
ABR1(config-ospf-1)# area 1 virtual-link 10.255.0.3  
ABR3(config)# router ospf 1
- C. ABR3(config-ospf-1)# area 3 virtual-link 10.255.0.1  
ABR1(config)# router ospf 1  
ABR1 (config-ospf-1)# area 1 virtual-link 10.255.0.3  
ABR3(config)# router ospf 1

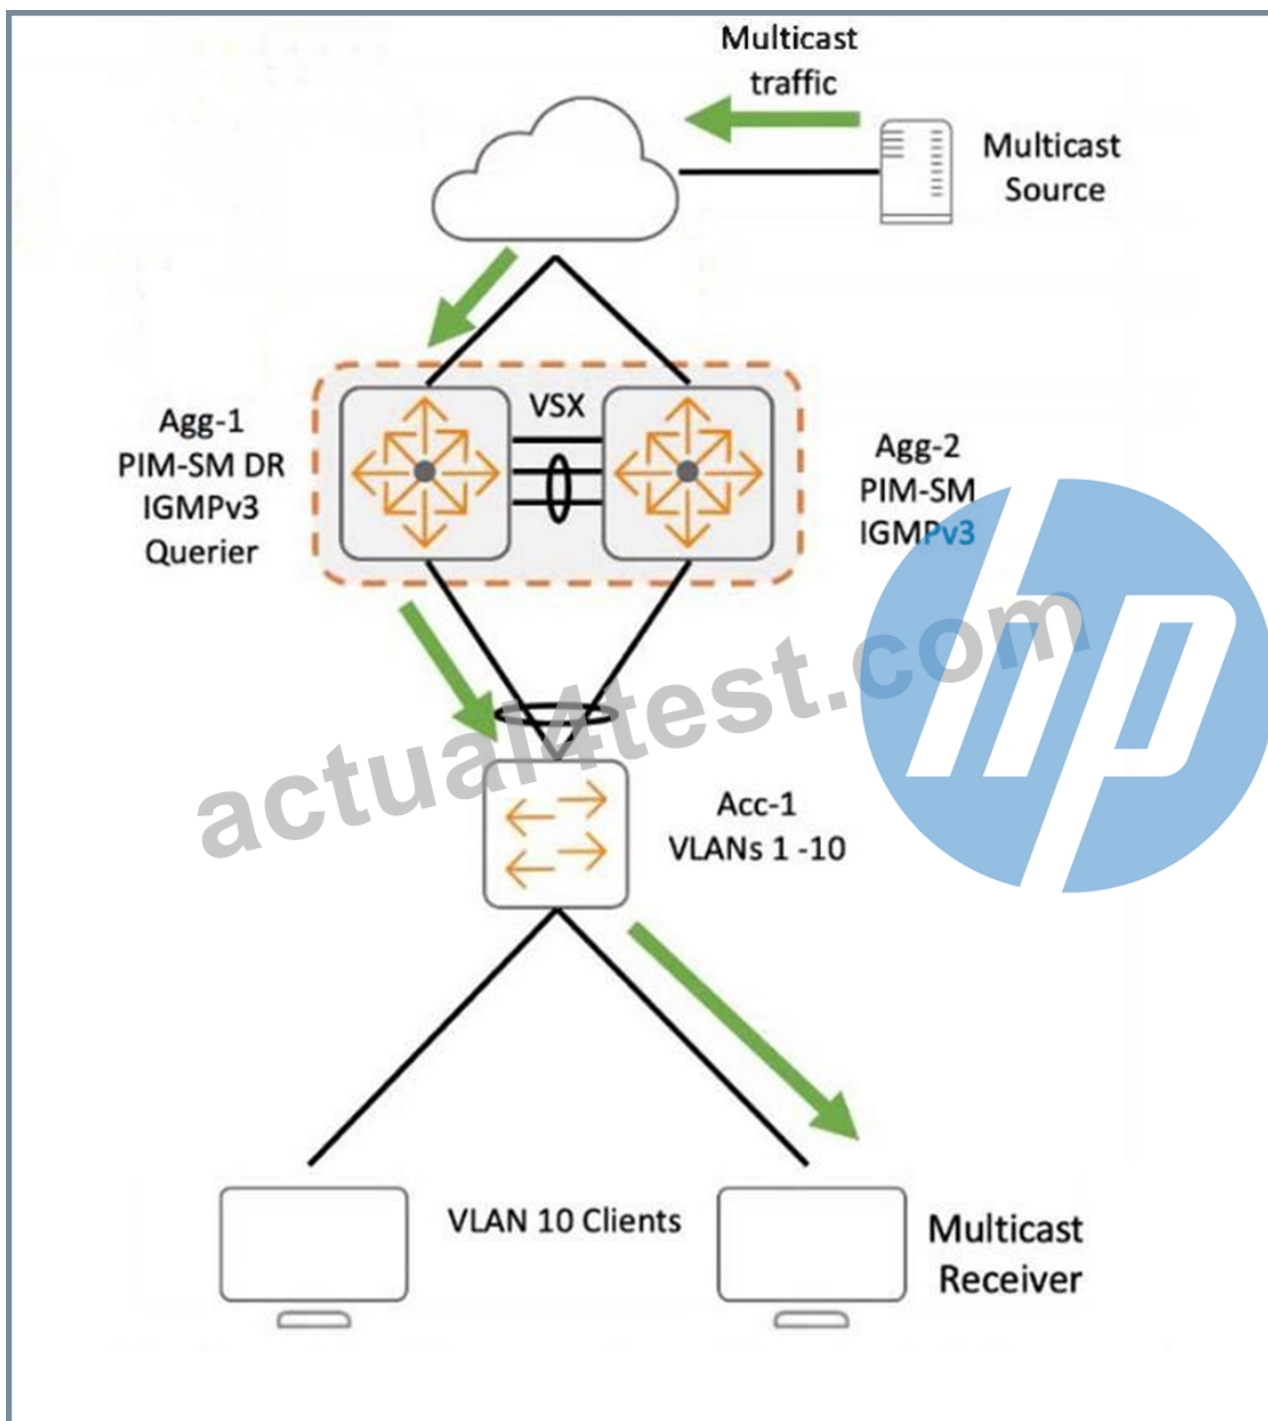

**Answer: B**

Explanation:

An OSPF virtual link must be configured in the common transit area between the two ABRs - in this case, area 1 - pointing to the peer's router ID on each ABR (area 1 virtual-link 10.255.0.1 on ABR3 and area 1 virtual-link 10.255.0.3 on ABR1).

### NEW QUESTION # 27

Refer to the exhibit.

During the update of the aggregation switches, Acc-1 clients were not able to receive multicast traffic for a few seconds. How can you improve the downtime for multicast traffic to a minimum time?

- A. Configure VSX active forwarding on Agg-1 and Agg-2 switches.
- B. Change multicast routing protocol from PIM-SM to PIM-DM.
- **C. Enable PIM active-active feature on both Agg-1 and Agg-2.**
- D. Enable config-sync multicast at the VSX command context.

**Answer: C**

Explanation:

In a VSX environment, only one aggregation switch (Agg-1) is the PIM-SM Designated Router (DR) and IGMP querier. During an upgrade, when Agg-1 is unavailable, multicast traffic forwarding fails until Agg-2 takes over. By enabling the PIM active-active feature on both Agg-1 and Agg-2, multicast forwarding becomes synchronized and seamless across both devices, reducing downtime to the minimum.

### NEW QUESTION # 28

Drag and Drop Question

Match the BGP connection states to the conditions that could have caused that state.

	Answer Area	
active	The last keepalive is less than 3 times the negotiated holddown timer.	
connect	The router has not received a response. The neighbor might be unreachable.	
established	The router is waiting for an initial response from the neighbor.	
idle	The router starts listening for a connection.	

**Answer:**

Explanation:

	Answer Area	
	The last keepalive is less than 3 times the negotiated holddown timer.	established
	The router has not received a response. The neighbor might be unreachable.	active
	The router is waiting for an initial response from the neighbor.	connect
	The router starts listening for a connection.	idle

### NEW QUESTION # 29

You are configuring an HPE Aruba Networking gateway cluster with AOS-10. What is true about gateway functionality? (Choose two.)

- A. PAPI traffic is traversing through an IPSEC tunnel.
- B. AOS-10 only supports high-value client session synchronization for the first failover.
- C. Multiversioning between AP and gateways is not supported.
- D. LACP is not supported when manually provisioning gateways.
- E. User traffic in tunneled mode is encrypted per default.

**Answer:** A,E

Explanation:

PAPI traffic is traversing through an IPSEC tunnel → Correct. In AOS-10, AP-gateway control traffic (PAPI) is protected using IPsec.

User traffic in tunneled mode is encrypted per default → Correct. Client traffic sent in tunneled SSID mode is automatically encrypted over the AP-gateway tunnel.

### NEW QUESTION # 30

.....

Our website provides the most up-to-date and accurate HPE7-A06 dumps torrent which are the best for passing certification test. It will help you to accelerate your knowledge and improve your professional ability by using our HPE7-A06 VCE Dumps. We are so proud of helping our candidates go through HPE7-A06 real exam in their first attempt quickly. The pass rate of our products

increased last year because of its reliability.
