

Free PDF Quiz Juniper - JN0-481 - Latest Exam Data Center, Specialist (JNCIS-DC) Collection

BONUS!!! Download part of Lead1Pass JN0-481 dumps for free: <https://drive.google.com/open?id=1cJGtOFmexDOJDS1m4nlObICfFQDqf4mT>

You can enter a better company and improve your salary if you have certificate in this field. JN0-481 training materials of us will help you obtain the certificate successfully. We have a professional team to collect the latest information for the exam, and if you choose us, you can know the latest information timely. In addition, we provide you with free update for 365 days after payment for JN0-481 Exam Materials, and the latest version will be sent to your email address automatically.

Our web-based practice test is accessible from anywhere with an internet connection, which means you can take it at your convenience. This Juniper JN0-481 Practice Test is designed to simulate the actual exam and help you become familiar with the test format. You can access the web-based practice exam from anywhere with an internet connection to study on the go or from the comfort of your own home. You can receive your mock exam result instantly.

JN0-481 Test Pass4sure, JN0-481 Latest Dumps Files

Our veteran professional generalize the most important points of questions easily tested in the JN0-481 practice exam into our practice questions. Their professional work-skill paid off after our JN0-481 training materials being acceptable by tens of thousands of exam candidates among the market. They have delicate perception of the JN0-481 study quiz over ten years. So they are dependable. You will have a big future as long as you choose us!

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q45-Q50):

NEW QUESTION # 45

Multitenancy for applications is achieved by creating virtual networks (VNs) within which construct?

- A. routing zone
- B. routing table

- C. connectivity template
- D. security policy

Answer: A

Explanation:

A routing zone is an L3 domain, the unit of tenancy in multi-tenant networks. You create routing zones for tenants to isolate their IP traffic from one another, thus enabling tenants to re-use IP subnets. In addition to being in its own VRF, each routing zone can be assigned its own DHCP relay server and external system connections. You can create one or more virtual networks within a routing zone, which means a tenant can stretch its L2 applications across multiple racks within its routing zone.

NEW QUESTION # 46

Within Managed Devices in the Juniper Apstra UI, you notice that several devices have the OOS- Quarantined status. The devices cannot be added to any blueprint. Which action would solve this problem?

- A. Upload a new pristine configuration.
- B. Install the agent, even though connectivity is established.
- C. Acknowledge the device.
- D. Fix the hardware issues with the quarantined devices.

Answer: C

Explanation:

When an agent installation is successful, devices are placed into the Out of Service Quarantined (OOS-QUARANTINED) state using the Juniper Apstra UI. This state means that the device is not yet managed by Apstra and has not been assigned to any blueprint. The device configuration at this point is called Pristine Config. To make the device ready for use in a blueprint, you need to acknowledge the device, which is a manual action that confirms the device identity and ownership. Acknowledging the device changes its status to Out of Service Ready (OOS- READY).

NEW QUESTION # 47

In the Juniper Apstra design phase, which object dictates port count, port speed, and how the ports would be used?

- A. network devices
- B. rack type
- C. interface map
- D. logical devices

Answer: C

Explanation:

Interface maps are objects that map interfaces between logical devices and physical hardware devices in the Juniper Apstra design phase. They dictate port count, port speed, and how the ports would be used for achieving the intended network configuration rendering. Interface maps also allow you to select device ports, transformations, and interfaces, provision breakout ports, and disable unused ports.

NEW QUESTION # 48

Which two statements are correct about the graph query output shown in the exhibit? (Choose two.)

```

{
  "count": 1,
  "items": [
    {
      "interface": {
        "id": "0be7ea4e-d691-44ff-aec7-da4fb2836555",
        "type": "interface",
        "label": null,
        "description": "to.cf-l2-esi-access",
        "evpn_esi_mac": null,
        "if_name": "ae2",
        "if_type": "port_channel",
        "ipv4_addr": null,
        "ipv4_addr_type": null,
        "ipv4_enabled": null,
        "ipv6_addr": null,
        "ipv6_addr_type": null,
        "ipv6_enabled": null,
        "lag_mode": "lacp_active",
        "loopback_id": null,
        "mlag_id": null,
        "mode": null,
        "po_control_protocol": null,
        "port_channel_id": 2,
        "property_set": null,
        "protocols": null,
        "ref_count": null,
        "subintf_id": null,
        "tags": null,
        "vlan_id": null
      }
    }
  ]
}

```

JUNIPER
NETWORKS

- A. The output shows a LAG connection.
- B. The interface has tags assigned to it.
- C. The interface has an IP address assigned to it.
- D. The switch in the output is a Juniper device.

Answer: A,D

Explanation:

The graph query output shown in the exhibit is a JSON representation of an interface node and its properties in the Apstra graph database. Based on the output, we can infer the following statements:

The output shows a LAG connection. This is true because the interface node has a property called `lag_mode` which is set to `lacp_active`, indicating that the interface is part of a link aggregation group (LAG) that uses the Link Aggregation Control Protocol (LACP) to negotiate the link state and parameters.

The switch in the output is a Juniper device. This is true because the interface node has a property called `if_name` which is set to `ae`, indicating that the interface name follows the Juniper naming convention for aggregated Ethernet interfaces.

The interface has an IP address assigned to it. This is false because the interface node has properties called `ipv4_addr` and `ipv6_addr` which are both set to `null`, indicating that the interface does not have any IPv4 or IPv6 address configured.

The interface has tags assigned to it. This is false because the interface node has a property called `tags` which is set to `null`, indicating that the interface does not have any tags associated with it.

NEW QUESTION # 49

Using Juniper Apstra, which component is defined in a template?

- A. the definition of IP pools
- B. the number of spine devices in a topology
- C. the leaf-to-spine interconnection

- D. the speed of the links between the spine devices and the leaf devices

Answer: C

Explanation:

A template is a configuration template that defines a network's policy intent and structure. A template can be either rack-based or pod-based, depending on the type and number of racks and pods in the network design. A template includes the following details:

Policies: These are the parameters that apply to the entire network, such as the overlay control protocol, the ASN allocation scheme, and the underlay type.

Structure: This is the physical layout of the network, such as the type and number of racks, pods, spines, and leaves. The structure also defines the leaf-to-spine interconnection, which is the number and type of links between the leaf and spine devices. The leaf-to-spine interconnection can be either single or dual, depending on the redundancy and bandwidth requirements.

Therefore, the correct answer is A. the leaf-to-spine interconnection. This is a component that is defined in a template, as it determines the physical connectivity of the network. The speed of the links, the number of spine devices, and the definition of IP pools are not components that are defined in a template, as they are either derived from the device profiles, the resource pools, or the blueprint settings.

NEW QUESTION # 50

.....

We are popular not only because we own the special and well-designed JN0-481 exam materials but also for we can provide you with well-rounded services beyond your imagination. At the very beginning, we have an authoritative production team and our JN0-481 study guide is revised by hundreds of experts, which means that you can receive a tailor-made JN0-481 Study Material according to the changes in the syllabus and the latest development in theory and breakthroughs. Without doubt, our JN0-481 practice torrent keep up with the latest information.

JN0-481 Test Pass4sure: <https://www.lead4pass.com/Juniper/JN0-481-practice-exam-dumps.html>

It is known that the JN0-481 Test Pass4sure Exam Question Certification has become a global standard for many successful IT companies, After purchasing we will provide you one-year service warranty, you can get the latest JN0-481 pdf practice material or practice exam online and contact us at any time, Juniper Exam JN0-481 Collection Sometimes online shopping is strictly keen on heavy regulation especially for Credit Card.

You'll also learn how to distinguish between the administrative theme and JN0-481 the site theme, install a theme from Drupal.org, turn on and setup a theme, and configure a theme that utilizes modules to provide features.

Quiz 2025 Valid Juniper JN0-481: Exam Data Center, Specialist (JNCIS-DC) Collection

Make sure that you spend plenty of time studying crawl rules and crawler JN0-481 Latest Dumps Files impact rules, It is known that the JNCIS-DC Exam Question Certification has become a global standard for many successful IT companies.

After purchasing we will provide you one-year service warranty, you can get the latest JN0-481 Pdf practice material or practice exam online and contact us at any time.

Sometimes online shopping is strictly keen on heavy regulation especially for Credit Card, Many of you must take part in the JN0-481 exam for the first time, But with JN0-481 exam materials, there is no way for you to waste time.
