Practice Assessment for Exam AZ-900: Microsoft Azure Fundamentals

Question 1 of 50

Select the answer that correctly completes the sentence.

[Answer choice] is the logical container used to combine and organize Azure resources.

☐ a resource group
✓ This answer is correct.

☐ Azure Resource Manager (ARM)

☒ a management group
This answer is incorrect.

☐ an Azure region

Resources are combined into resource groups, which act as a logical container into which Azure resources like web apps, databases, and storage accounts, are deployed and managed.

Most candidates who register for Microsoft Power Platform Fundamentals (PL-900) certification lack the right resources to help them achieve it. As a result, they face failure, which causes them to waste time and money, and sometimes even lose motivation to repeat their Microsoft PL-900 exam. PrepAwayETE will solve such problems for you by providing you with PL-900 Questions. The Microsoft PL-900 certification exam is undoubtedly a challenging task, but it can be made much easier with the help of PrepAwayETE's reliable preparation material.

Objectives of Microsoft Power Platform Fundamentals PL-900 Certification Exam :

The exam will test your skills in managing and designing a private cloud infrastructure for Microsoft Azure. It will test your skills in versioning and virtualization for different Microsoft products and also, it will measure your knowledge in designing an infrastructure capable of supporting applications and services, along with the experiences of managing them.

Designing a private cloud solution with Windows Server and Linux machines, using the Azure Stack to support Office 365 workloads.

Selecting the correct hardware for a private cloud. Statement of the problem statements with Data Stewardship in mind, along with the storage design principles.

- Prove your skills in deploying a cloud infrastructure by using Windows Server and Linux.
- Personalized guidance to architecting Microsoft Azure Stack solutions. Benefit from the cloud-based implementation process.
- Creating hybrid networks. Automating the deployment of a private cloud with Azure Stack.
- Upgrading Microsoft SQL Server and upgrading Azure VM to different versions. Connecting servers to TCP/IP Networks.
- Migrating from on-premises to cloud-like functionality using hybrid network technologies and design considerations.

Getting detailed knowledge in designing an enterprise hosting environment capable of providing SQL Server services for different customers and organizations. Sales and Service organizations can use the capability to host and manage SQL databases for their clients.

Designing an enterprise Server Infrastructure as a Service (IaaS) solution, where you can build private clouds on top of the Azure platform with Linux and Windows Server machines. **PL-900 Dumps** is designed to help you prepare for taking the exam. Then, designing and implementing virtual machines on Linux or Windows Server to use as guest operating systems. This will help you design a private cloud solution that supports different services and apps for different potential customers and organizations. The dashboard will be reported using Power BI, where you can measure the performance of your private cloud solution.

PrepAwayETE Real Microsoft PL-900 Questions PDF

We provide the best resources for the preparation of all the PL-900 exams. We have curated guides for PL-900 certifications. PL-900 practice exam questions can be challenging and technical for sure. However, we have PL-900 certified experts who curated the best study and practice materials for passing the PL-900 exams with higher success rate. Our PL-900 answers are verified and up to date products will help you prepare for the PL-900 exams. All those professional who looking to find the best practice material for passing the PL-900 exams should consider checking out our test products for better understanding.

Certification Path

The tremendous hard work and dedication to professional growth will ultimately pay off after passing PL-900 Exam. But one's journey should not stop there. For tech-savvy geeks who are ready to advance, this might just be the starting point. If you want to soar to greater heights by attaining more skills along the same track, you will know the benefits of pursuing advanced level IT certificates. These can be Microsoft Certified: Power Platform Functional Consultant Associate, Microsoft Certified: Power Platform Developer Associate, or Microsoft Certified: Power Platform App Maker Associate. For professionals aiming to achieve the top level, there is the Microsoft Certified: Dynamics 365 + Power Platform Solution Architect Expert certification available.

Microsoft Power Platform Fundamentals Sample Questions (Q249-Q254):

NEW QUESTION # 249

You need to create a mobile application which will allow sales associates to enter customer sales leads.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Save the app.	
Add components to the app.	
Publish the app.	
Add flows to the app.	
Go to the Office 365 admin center.	
Create a new Power Apps app.	

Answer:

Explanation:

Answer Area

Create a new Power Apps app.
Add components to the app.
Save the app.
Public the app.

- 1 - Create a new Power Apps app.
- 2 - Add components to the app.
- 3 - Save the app.
- 4 - Public the app.

NEW QUESTION # 252

Your coworkers create Power Apps and Power Automate flows to improve business processes. You need to prevent your coworkers from using the YouTube connector in the company tenant. What should you create?

- A. dataflow
- B. business rule
- C. data loss prevention policy
- D. security role

Answer: C

Explanation:

A Power Platform administrator can create and enforce Data Loss Prevention (DLP) policies in the Power Platform admin center to block specific connectors for Power Apps and Power Automate flows in an environment. These policies, which can be set for different environments, control which connectors can be used, preventing data exposure and leakage.

How DLP Policies Work

1. Admin Action: An administrator signs in to the Power Platform admin center.
2. Access Control: They navigate to Security > Identity and access > App access control, or more commonly, they manage Data Policies to define connector behavior.

3. Policy Creation: Administrators create a DLP policy for a specific environment or tenant.

4. Connector Classification: Within the policy, they classify connectors into categories:

Business: For internal, approved data services.

Non-business: For third-party services that can be used but not combined with business data.

Blocked: To prevent any usage of that connector.

5. Enforcement: When a user tries to use a connector that is classified as "Blocked" in a Power App or Power Automate flow, they will receive an error, preventing the flow or app from functioning with that connector.

NEW QUESTION # 253

A company is implementing Power BI to track sales.

Each of the company's regions has specific quarterly and yearly sales goals.

You need to build a Power BI dashboard for various reporting requirements.

Which chart types should you use? To answer, drag the appropriate chart types to the correct requirements.

Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Chart types	Requirement	Chart type
 Donut	Show the quarterly sales total to date in relation to the sales goal.	
 KPIs	View the sales trend by month of the sales year to date for all regions.	
 Line chart	View the year-to-date sales as a percentage by region.	
 Matrix
