Free PDF Quiz NCP-CN - Nutanix Certified Professional - Cloud Native v6.10–High-quality Exam Experience

Each of us is dreaming of being the best, but only a few people take that crucial step. The key step is to work hard to make yourself better. Our NCP-CN study materials may become your right man. Perhaps you have heard of our NCP-CN Exam Braindumps. A lot of our loyal customers are very familiar with their characteristics. And our NCP-CN learning quiz have become a very famous brand in the market and praised for the best quality.

Nutanix NCP-CN Exam Syllabus Topics:

Topic	Details
Topic 1	• Conduct NKP Fleet Management: This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment.
Topic 2	• Perform Day 2 Operations: This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance.

Topic 3	• Prepare the Environment for an NKP Deployment: This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider.
Topic 4	• Manage Building an NKP Cluster: This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities.

Braindumps NCP-CN Torrent - Latest NCP-CN Exam Camp

People always want to prove that they are competent and skillful in some certain area. The ways to prove their competences are varied but the most direct and convenient method is to attend the NCP-CN certification exam and get some certificate. Passing the NCP-CN certification can prove that you are very competent and excellent and you can also master useful knowledge and skill through passing the NCP-CN test. Purchasing our NCP-CN guide torrent can help you pass the NCP-CN exam and it costs little time and energy.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q50-Q55):

NEW QUESTION # 50
A Kubernetes administrator needs to deploy a new NKP deployment for a DR Datacenter. Cluster information:
AOS 6.10
Hypervisor is AHV
Six NX-8170-G9 NodesWhich command should the administrator use to invoke the prompt-based CLI deployment method?

- A. nkp create nodepool nutanix
- B. nkp create cluster nutanix
- C. nkp create cluster ahv
- D. nkp install kommander

Answer: C

NEW QUESTION # 51
A Cloud Engineer is deploying an NKP cluster into an AWS environment. By default, when deploying NKP on AWS infrastructure, it generates the supporting infrastructure necessary for the cluster (VPC, subnets, ELBs). However, the AWS team has insisted that the NKP cluster be deployed on existing AWS infrastructure. How can the engineer meet this requirement?

- A. When using the nkp create cluster aws command set, include the valid parameters with the pre-existing VPC, subnets, and ELB to use.
- B. When using the nkp adopt infrastructure aws command set, include the valid parameters with the pre-existing VPC, subnets, and ELB to use. Deploy the NKP cluster using the nkp create cluster aws command set.
- C. Create an overrides file with the pre-existing VPC, subnets, and ELB to use. When using the nkp create cluster aws command set, include the overrides parameter with the overrides file that was created.
- D. Create an NKP infrastructure provider for AWS in the NKP UI. When deploying the NKP cluster through the UI, specify the pre-existing VPC, subnets, and ELB to use in the appropriate fields of the 'Infrastructure' section of the Create Cluster page.

Answer: C

NEW QUESTION # 52

Using an NKP Ultimate license, a Platform Engineer has created a new workspace and needs to create a new Kubernetes cluster within this workspace. However, the engineer discovers that the Create Cluster option is grayed out, as shown in the exhibit. How should the engineer resolve this issue?

- A. Create an Infrastructure provider for the workspace.
- B. Create the cluster only using YAML and not the GUI.
- C. Attach existing clusters instead of creating a new cluster.
- D. Ensure NKP is upgraded to a minimum version of 2.12.

Answer: A

NEW QUESTION # 53

Recently, the reliability of some developer platforms has been impacted by out-of-memory errors, causing pods to crash and then remain in a pending state. A Cloud Engineer has been tasked with collecting and reviewing centralized metrics across the various platform environments to identify differences between them and better understand what is causing these performance issues. What should the engineer do to address this request?

- A. Utilize Thanos to collect and present centralized metrics on NKP attached and managed clusters. Then visualize these collected and centralized metrics in Grafana.
- B. Utilize Fluentd and Fluent Bit to collect and present centralized metrics on NKP attached and managed clusters. Then configure Thanos Query to monitor and send out alerts based on the metric thresholds that have been configured within it.
- C. Utilize Fluentd and Fluent Bit to collect and present centralized metrics on NKP attached and managed clusters. Then visualize these collected and centralized metrics in Grafana.
- D. Utilize Prometheus to collect and present centralized metrics on NKP attached and managed clusters. Then configure Thanos Query to monitor and send out alerts based on the metric thresholds that have been configured within it.

Answer: D

NEW QUESTION # 54

A Cloud Engineer is deploying an NKP management cluster and plans to deploy multiple NKP workload clusters from it. The management cluster will be on Nutanix infrastructure, but the NKP workload clusters may be deployed in multiple provisioning environments, such as:
Nutanix
AWS
AzureWhen the engineer deploys an NKP workload cluster in AWS, which two default behaviors will be performed by NKP on this newly-deployed cluster? (Choose two.)

- A. The NKP workload cluster will receive all of the GitOps sources that have been assigned to the NKP workspace.
- B. The NKP workload cluster will receive all of the NKP RBAC policy that has been assigned to this NKP workspace.
- C. The NKP workload cluster will be deployed all of the applications that have been enabled on this NKP workspace.
- D. The NKP workload cluster will also be assigned to all of the NKP projects that have been created within the NKP workspace.

Answer: A,C
