

Free PDF Quiz NSE7_OT-7.2 - Fortinet NSE 7 - OT Security 7.2—Reliable Certification Dump

What's more, part of that Exam-Killer NSE7_OT-7.2 dumps now are free: https://drive.google.com/open?id=1IS8rFhc9mNotW6XUyI5CayyEH_7-A5Y

With the quick development of the electronic products, more and more electronic devices are designed to apply to our life. Accordingly there are huge changes on the study models of our NSE7_OT-7.2 exam dumps as well. There are three different versions of our NSE7_OT-7.2 Study Guide designed by our specialists in order to satisfy varied groups of people. They are version of the PDF, the Software and the APP online. All these versions of NSE7_OT-7.2 practice materials are easy and convenient to use.

Fortinet NSE7_OT-7.2 exam covers a broad range of topics related to OT security. NSE7_OT-7.2 exam comprises of 60 multiple-choice questions, and the candidate has 120 minutes to complete the test. NSE7_OT-7.2 exam content includes OT security concepts, OT network design, OT security policies, OT security products, and OT security management.

Fortinet NSE7_OT-7.2 certification exam is a highly respected and sought-after certification in the field of cybersecurity. NSE7_OT-7.2 Exam is designed to test an individual's knowledge and skills in the area of operational technology (OT) security. Fortinet NSE 7 - OT Security 7.2 certification is offered by Fortinet, a leading provider of cybersecurity solutions and services.

Efficient Certification NSE7_OT-7.2 Dump by Exam-Killer

If you find someone around has a nice life go wild, it is because that they may have favored the use of study & work method different from normal people. NSE7_OT-7.2 dumps torrent files may be the best method for candidates who are preparing for their IT exam and eager to clear exam as soon as possible. People's success lies in their good use of every change to self-improve. Our NSE7_OT-7.2 Dumps Torrent files will be the best resources for your real test. If you choose our products, we will choose efficient & high-passing preparation materials.

Fortinet NSE7_OT-7.2 Exam is intended for professionals who have a good understanding of OT networks and have experience working in the field of industrial control systems. NSE7_OT-7.2 exam is suitable for IT security professionals, network engineers, system administrators, and anyone else who is responsible for securing OT environments. Fortinet NSE 7 - OT Security 7.2

certification is recognized globally and is highly respected in the cybersecurity industry. By passing NSE7_OT-7.2 Exam, professionals can demonstrate their expertise in OT security and enhance their career prospects.

Fortinet NSE 7 - OT Security 7.2 Sample Questions (Q55-Q60):

NEW QUESTION # 55

Refer to the exhibit. Which statement about the interfaces shown in the exhibit is true?

	Name ▾	Type ▾	IP/Netmask ▾	VLAN ID ▾
Physical Interface 14				
	port1	Physical Interface	10.200.1.1/255.255.255.0	
	port1-vlan10	VLAN	10.1.10.1/255.255.255.0	10
	port1-vlan1	VLAN	10.200.5.1/255.255.255.0	1
	port10	Physical Interface	10.0.11.1/255.255.255.0	
	port2	Physical Interface	10.200.2.1/255.255.255.0	
	port2-vlan10	VLAN	10.0.10.1/255.255.255.0	10
	port2-vlan1	VLAN	10.0.5.1/255.255.255.0	1

- A. port1-vlan10 and port2-vlan10 are part of the same broadcast domain
- B. The VLAN ID of port1-vlan1 can be changed to the VLAN ID 10.
- C. port2, port2-vlan10, and port2-vlan1 are part of the software switch interface.
- D. port1, port1-vlan10, and port1-vlan1 are in different broadcast domains

Answer: D

NEW QUESTION # 56

Refer to the exhibit.

An OT network security audit concluded that the application sensor requires changes to ensure the correct security action is committed against the overrides filters.

Which change must the OT network administrator make?

- A. Remove IEC.60870.5.104 Information.Transfer from the first filter override.
- B. Set the priority of the C.BO.NA.1 signature override to 1.
- C. Change the security action of the industrial category to monitor.
- D. Set all application categories to apply default actions.

Answer: A

Explanation:

According to the Fortinet NSE 7 - OT Security 6.4 exam guide1, the application sensor settings allow you to configure the security action for each application category and network protocol override. The security action determines how the FortiGate unit handles traffic that matches the application category or network protocol override. The security action can be one of the following:

Allow: The FortiGate unit allows the traffic without any further inspection.

Monitor: The FortiGate unit allows the traffic and logs it for monitoring purposes.

Block: The FortiGate unit blocks the traffic and logs it as an attack.

The priority of the network protocol override determines the order in which the FortiGate unit applies the security action to the traffic. The lower the priority number, the higher the priority. For example, a priority of 1 is higher than a priority of 10.

In the exhibit, the application sensor has the following settings:

The industrial category has a security action of allow, which means that the FortiGate unit will not inspect or log any traffic that belongs to this category.

The IEC.60870.5.104 Information.Transfer network protocol override has a security action of block, which means that the FortiGate unit will block and log any traffic that matches this protocol.

The IEC.60870.5.104 Control.Functions network protocol override has a security action of monitor, which means that the FortiGate unit will allow and log any traffic that matches this protocol.

The IEC.60870.5.104 Start/Stop network protocol override has a security action of allow, which means that the FortiGate unit will not inspect or log any traffic that matches this protocol.

The IEC.60870.5.104 Transfer.C.BO.NA.1 network protocol override has a security action of block, which means that the FortiGate unit will block and log any traffic that matches this protocol.

The problem with these settings is that the IEC.60870.5.104 Transfer.C.BO.NA.1 network protocol override has a lower priority than the IEC.60870.5.104 Information.Transfer network protocol override. This means that if the traffic matches both protocols, the FortiGate unit will apply the security action of the higher priority override, which is block. However, the IEC.60870.5.104 Transfer.C.BO.NA.1 protocol is used to transfer binary outputs, which are essential for controlling OT devices. Therefore, blocking this protocol could have negative consequences for the OT network.

To fix this issue, the OT network administrator must set the priority of the IEC.60870.5.104 Transfer.C.BO.

NA.1 network protocol override to 1, which is higher than the priority of the IEC.60870.5.104 Information.

Transfer network protocol override. This way, the FortiGate unit will apply the security action of the lower priority override, which is allow, to the traffic that matches both protocols. This will ensure that the FortiGate unit does not block the traffic that is used to transfer binary outputs, while still blocking the traffic that is used to transfer information.

1: NSE 7 Network Security Architect - Fortinet

NEW QUESTION # 57

Refer to the exhibit.

The IPS profile is added on all of the security policies on FortiGate.

For an OT network, which statement of the IPS profile is true?

- A. All IPS signatures are overridden and must block traffic match signature patterns.
- B. The listed IPS signatures are classified as SCADA equipment.**
- C. The IPS profile inspects only traffic originating from SCADA equipment.
- D. FortiGate has no IPS industrial signature database enabled.

Answer: B

NEW QUESTION # 58

Refer to the exhibit.

```
config system interface
  edit VLAN101_dmz
    set forward-domain 101
  next
  edit VLAN101_internal
    set forward-domain 101
end
```

Given the configurations on the FortiGate, which statement is true?

- A. FortiGate is configured with forward-domains to reduce unnecessary traffic.
- B. FortiGate is configured with forward-domains to forward only domain controller traffic.
- C. FortiGate is configured with forward-domains to forward only company domain website traffic.
- D. FortiGate is configured with forward-domains to filter and drop non-domain controller traffic.

Answer: A

NEW QUESTION # 59

Which three common breach points can you find in a typical OT environment? (Choose three.)

- A. VLAN exploits
- B. Global hat
- C. RTU exploits
- D. Black hat
- E. Hard hat

Answer: C,D,E
