initiative to find you. Next, let's take a look at what is worth choosing from NCA-6.10 learning question.

Nutanix Certified Associate v6.10 Sample Questions (Q15-Q20):

NEW QUESTION # 15

When creating a new storage container, what is the default configuration for Compression?

- A. Inline
- **B. Disabled**
- C. Post-process (60 minutes)
- D. Post-process (15 minutes)

Answer: B

Explanation:

The correct answer is B. Disabled.

When creating a new storage container in Prism Element or Prism Central, compression is disabled by default. The administrator must explicitly enable one of the available compression options:

* Inline Compression

* Post-process Compression

If no compression type is selected, the container remains uncompressed.

UI Navigation Path:

Storage > Storage Containers > Create Container > Compression Settings

Clarifications:

* A (60 mins) and C (15 mins): Not standard default post-process intervals.

* D (Inline): Must be manually selected.

Official Reference:

* Nutanix Storage Administration Guide - Creating and Configuring Containers

* Excerpt: "Compression is disabled by default during container creation. Admins must select inline or post-process if desired."

NEW QUESTION # 16

What is the purpose of the Recycle Bin?

- **A. Keeps deleted VMs for 24 hours for recovery.**
- B. Stores the OpLog's most recent deleted data in case of a CVM failure.
- C. Centralizes the deleted data from the different VMs in the cluster.
- D. Allows administrators to undo the last five actions.

Answer: A

Explanation:

The Recycle Bin in Nutanix clusters temporarily stores deleted VMs for 24 hours, allowing administrators to recover them if needed.

This feature helps protect against accidental deletions by providing a grace period for recovery before permanent deletion occurs.

* A. Stores the OpLog's most recent deleted data in case of a CVM failure: Incorrect, as the OpLog pertains to write operations, not VM deletion.

* B. Keeps deleted VMs for 24 hours for recovery: Correct, as the Recycle Bin's purpose is temporary VM recovery.

* C. Allows administrators to undo the last five actions: Incorrect, as there is no such feature for undoing multiple actions in Prism.

* D. Centralizes the deleted data from the different VMs in the cluster: Incorrect, as the Recycle Bin is specifically for deleted VMs, not generalized data centralization.

References:

Nutanix Administration Guide: Recycle Bin Functionality.

Nutanix Support Knowledge Base Article on VM Recovery via Recycle Bin.

NEW QUESTION # 17

Nutanix Support has asked an administrator to provide an NCC output, but there is no access to the command line.

What should the administrator do to provide the requested NCC output?

- A. Configure email in Alert Settings and Run Health Checks in the Health Dashboard.
- B. Run Health Checks in the Alert Dashboard and enter an email to send it to.

- C. Run Health Checks in the Event Dashboard.
- **D. Configure email in Alert Settings and Run Health Checks in the Alert Dashboard.**

Answer: D

NEW QUESTION # 18

An administrator is using LCM at a connected site to update various components on a Nutanix cluster and notices that the LCM Framework is not updated to the current version.

What step should the administrator take to ensure LCM is updated to the latest release?

- A. Upgrade AOS
- B. Restart genesis across the cluster.
- **C. Perform an inventory.**
- D. Run an NCC health check.

Answer: C

Explanation:

The correct answer is C. Perform an inventory.

To ensure the LCM Framework and its associated component metadata are updated, the administrator must perform a fresh LCM inventory. This process:

- * Retrieves the latest metadata and framework version from the Nutanix support portal (if the cluster is connected).
- * Detects current component versions and identifies available updates.

Clarifications:

- * A (Upgrade AOS): LCM is independent of AOS version updates.
- * B (Restart genesis): Unnecessary and not relevant to LCM framework versioning.
- * D (NCC): Useful for cluster health, but does not affect LCM updates.

Prism Central UI Navigation Path:

Operations > LCM > Perform Inventory

Official Reference:

- * Nutanix LCM Guide - Updating the LCM Framework
- * Excerpt: "To receive the latest framework version and component metadata, perform an LCM inventory on a connected cluster."

NEW QUESTION # 19

Which Nutanix Disaster Recovery component or feature provides the best Recovery Time Objective (RTO)?

- **A. Metro Availability**
- B. Availability Zone
- C. NearSync
- D. Async

Answer: A

NEW QUESTION # 20

.....
