Free 1Z0-1055-25 Download Pdf & 1Z0-1055-25 Valid Test Guide

Most people spend much money and time to prepare the 1Z0-1055-25 exam tests but the result is bad. Maybe you wonder how to get the Oracle certification quickly and effectively? Now let ITPassLeader help you. It just takes one or two days to prepare the 1Z0-1055-25 VCE Dumps and real questions, and you will pass the exam without any loss.

Oracle Fusion Cloud Financials: Payables and Expenses 2025

Implementation Professional Sample Questions (Q10-Q15):

NEW QUESTION # 10

Your company wants to maximize early payment discount opportunities and will be using the "Campaign Management for Early Payment Discount Offers" feature, which allows them to on board suppliers into an early payment discounts program via email-based campaigns. Suppliers can respond directly from email and their responses are automatically processed and applied in payment process requests.

Which three response options are available to suppliers when replying to a campaign

- A. Decline the Offer
- B. Reject the Offer
- C. Unsubscribe
- D. Accept All Offers
- E. Subscribe
- F. Enroll in a standing offer.

Answer: A,C,F

NEW QUESTION # 11

In the implementation project you are leading, the customer has a requirement to add new transactional attributes to the Expense Approver Report workflow notification. Which two Business Intelligence catalog objects should you copy (or customize) and edit?

- A. The Data Model
- B. The layout template
- C. The Original Source
- D. The Output types

Answer: A,B

Explanation:

Comprehensive and Detailed In-Depth

To incorporate new transactional attributes into the Expense Approver Report workflow notification in Oracle Financials Cloud, you need to customize specific Business Intelligence Publisher (BI Publisher) catalog objects. The two primary objects that require customization are:

The Data Model (Option B):

Purpose: The Data Model defines the data structure and sources for the report. It determines which attributes from the application's data sources are available for inclusion in the report.

Customization Process:

Navigate to the BI Catalog: Shared Folders > Financials > Workflow Notifications > Expenses.

Locate the Expense Approval Data Model.

Use the Customize option to create a copy of the data model in the Custom folder.

Edit the copied data model to include the new transactional attributes required for the notification.

Reference:

The Layout Template (Option A):

Purpose: The Layout Template defines the visual presentation of the notification, including which data fields are displayed and their formatting.

Customization Process:

In the same BI Catalog location, find the Expense Report Approval report.

Use the Customize option to create a copy of the report layout template in the Custom folder.

Download the copied layout template (an .rtf file) and open it using Microsoft Word with the BI Publisher Template Builder add-in.

Insert the new transactional attributes into the template as needed.

Upload the modified template back to the BI Catalog and set it as the default layout.

By customizing both the Data Model and the Layout Template, you ensure that the new transactional attributes are not only retrieved from the data source but also properly displayed in the workflow notification.

Note: Options C (The Original Source) and D (The Output types) are not directly involved in the process of adding new attributes to the workflow notification and therefore are not relevant to this requirement.

NEW QUESTION # 12

You implemented the service provider model for Payables payments, where your United Kingdom (UK) headquarters works solely as an outsourced payment processing unit on behalf of your other UK business units. What is this type of payment service provider model known as?

- A. Self-Service
- B. Dedicated and Self-Service
- **C. Dedicated**
- D. Procurement

Answer: C

NEW QUESTION # 13

Oracle Cloud currently offers two invoice scanning solutions: Integrated Imaging and Intelligent Document Recognition (IDR). Both solutions function similarly.

In which two ways do these invoice scanning solutions operate in the cloud?

- A. Customers cannot use invoice imaging in the Cloud.
- B. Customers ask suppliers to send electronic invoices.
- **C. Customers ask their suppliers to scan and email the invoice.**
- D. Customers scan and store the invoice images on-premises and attach them during invoice entry.
- **E. Customers scan the invoice on-premises and email the images.**

Answer: C,E

Explanation:

Comprehensive and Detailed In-Depth

Oracle Cloud's Integrated Imaging and Intelligent Document Recognition (IDR) solutions streamline the processing of supplier invoices by automating data extraction and invoice creation. These solutions support multiple methods for capturing and importing invoice images into the cloud system.

A . Customers scan the invoice on-premises and email the images.

Organizations that receive paper invoices can digitize them by scanning the documents on-premises. Once scanned, these images are emailed to a designated address provided by Oracle Cloud. The Integrated Imaging or IDR system retrieves these images from the email inbox, processes them to extract relevant data, and automatically creates invoices within the Payables module. This method ensures that paper-based invoices are efficiently integrated into the cloud system without manual data entry.

docs.oracle.com

C . Customers ask their suppliers to scan and email the invoice.

To enhance efficiency, customers can request that their suppliers scan physical invoices and send the digital images directly via email. These emailed invoice images are received by the designated email account associated with the customer's Oracle Cloud instance.

The Integrated Imaging or IDR solutions then process these images, extracting the necessary invoice data and creating corresponding entries in the Payables system. This approach reduces processing time and minimizes potential errors associated with manual data entry.

docs.oracle.com

B . Customers ask suppliers to send electronic invoices.

While encouraging suppliers to send electronic invoices (such as XML or EDI formats) is a best practice for streamlining invoice processing, this method does not involve the Integrated Imaging or IDR solutions, which are specifically designed for processing scanned invoice images. Electronic invoices are typically processed through different channels within Oracle Cloud, such as the Supplier Portal or electronic data interchange systems.

blogs.infosys.com

D . Customers scan and store the invoice images on-premises and attach them during invoice entry.

In this scenario, customers manually scan and store invoice images on their local systems and then attach these images during manual invoice entry into the Oracle Cloud Payables module. This process does not utilize the automated capabilities of the Integrated Imaging or IDR solutions, which are designed to handle the import, recognition, and processing of invoice images sent via email.

docs.oracle.com

E . Customers cannot use invoice imaging in the Cloud.

This statement is incorrect. Oracle Cloud provides robust invoice imaging solutions, namely Integrated Imaging and Intelligent Document Recognition, enabling customers to process scanned invoices efficiently within the cloud environment.

docs.oracle.com

By leveraging these solutions, organizations can automate the extraction of invoice data from scanned images, reduce manual intervention, and improve the accuracy and efficiency of their accounts payable processes.

NEW QUESTION # 14

Your company will be utilizing the Campaign Management for Early Payment Discount Offers feature to maximize early payment discounts. This feature allows companies to send email-based campaigns offering suppliers the opportunity to enroll in an early payment discounts program. There is a predefined list of response options that suppliers can choose from, and such supplier responses are then automatically processed and applied in the system.

Which two are predefined response options available to suppliers?

- A. Enroll in a Standing Offer
- B. Decline the Offer
- C. Accept All Offers
- D. Subscribe

Answer: A,B

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Campaign Management for Early Payment Discount Offers feature enables organizations to send email campaigns to suppliers, inviting them to participate in early payment discount programs. Suppliers receiving these offers have predefined response options that are automatically processed by the system.

Predefined Supplier Response Options:

Accept a One-Time Offer:

Suppliers can choose to accept a discount offer for specific invoices that are currently eligible for early payment. This action applies the discount to the selected invoices, and they are processed for early payment accordingly.

Enroll in a Standing Offer:

By selecting this option, suppliers agree to participate in an ongoing early payment discount program. All future invoices that meet the agreed-upon criteria will automatically be eligible for early payment discounts without the need for individual acceptances.

Decline the Offer:

Suppliers may opt to decline the current early payment discount offer. Declining does not prevent them from receiving future offers; it simply indicates that they are not interested in the present offer.

Unsubscribe:

If a supplier chooses to unsubscribe, they will no longer receive email notifications regarding early payment discount offers from the campaign. This action effectively removes them from the current and any future campaigns.

Analysis of the Provided Options:

A . Accept All Offers:

There is no predefined response option that allows suppliers to accept all past and future offers in a single action. Acceptance is either for a specific one-time offer or through enrollment in a standing offer for future invoices.

B . Decline the Offer:

This is a valid predefined response. Suppliers can choose to decline the current offer, indicating they are not interested in the proposed early payment discount for the specified invoices.

C . Subscribe:

While suppliers can unsubscribe from receiving future offers, there isn't a specific "Subscribe" option. Suppliers are considered participants by default and can choose to enroll in standing offers or accept individual offers.

D . Enroll in a Standing Offer:

This is a valid predefined response. Suppliers can enroll in a standing offer, agreeing to early payment discounts on all future eligible invoices automatically.

Conclusion:

The correct predefined response options available to suppliers are B. Decline the Offer and D. Enroll in a Standing Offer. These options provide suppliers with the flexibility to manage their participation in early payment discount programs effectively.
