## Unparalleled Oracle - Exam 1Z0-770 Torrent

A calm judgment is worth more than a thousand hasty discussions. I know that when you choose which our 1Z0-770 exam materials to buy, it will be very tangled up. This is a responsible performance for you. But you can't casually make a choice because of tangle. And our 1Z0-770 Study Materials won't let you regret. You can just free download the demos of the 1Z0-770 practice guide to

have a check our quality.

Oracle 1Z0-770 (Oracle APEX Developer Professional) Exam is a certification exam designed to test the skills and knowledge of professionals who work with Oracle Application Express (APEX) technology. APEX is a low-code development platform that enables developers to build web-based applications quickly and efficiently using SQL and PL/SQL. 1Z0-770 Exam is intended for professionals who have experience with APEX and want to demonstrate their proficiency in designing, developing, and deploying APEX applications.

## Oracle APEX Developer Professional Sample Questions (Q26-Q31):

### NEW QUESTION # 26

When a button is pressed, an overlay window is positioned within the viewport. What kind of page mode is it?

- A. Help Page
- B. Non-Modal Dialog
- C. Normal Page
- **D. Modal Dialog**

**Answer: D**

Explanation:

Explanation

A modal dialog is a type of page mode that displays an overlay window within the viewport when a button is pressed. A modal dialog is a stand-alone page that does not interact with the base page where it was launched.

A modal dialog blocks access to the base page until it is closed by the user. A modal dialog can be used for various purposes, such as displaying additional information, confirming an action, or collecting user input.

### NEW QUESTION # 27

Let's say that there are two select lists on a page. Making a selection in the DEPARTMENT select list, determines which individuals display in the Employees select list. This type of LOV is called:

- A. Dynamic LOV
- B. Static LOV
- C. Popup LOV
- **D. Cascading LOV**

**Answer: D**

Explanation:

Explanation

A cascading LOV is a type of list of values (LOV) that depends on another parent LOV to determine its values. For example, if there are two select lists on a page, one for DEPARTMENT and one for EMPLOYEES, you can create a cascading LOV for EMPLOYEES that only shows the employees who belong to the selected department in the DEPARTMENT select list. To create a cascading LOV, you need to specify the parent item name and use bind variables in the SQL query for the child item.

### NEW QUESTION # 28

Which two statements are TRUE about Dynamic Actions?

- A. Dynamic Actions require complex client side Javascript code
- **B. Dynamic actions provide a way to define complex client-side behavior declaratively without the need for JavaScript.**
- C. It is not possible to debug Dynamic Actions from the Developer Toolbar
- **D. More dynamic actions you add to a page, the greater your overall page size.**

**Answer: B,D**

Explanation:

Explanation

Dynamic actions provide a way to define complex client-side behavior declaratively without the need for JavaScript. You can create dynamic actions on items, buttons, or regions of a page by specifying an event, a condition, an action, and other properties.

However, more dynamic actions you add to a page, the greater your overall page size. This can affect the performance and user experience of your application<sup>2</sup>. It is possible to debug dynamic actions from the Developer Toolbar by using the Debug option<sup>3</sup>. Dynamic actions do not require complex client-side JavaScript code, but they can optionally include custom JavaScript code as an action or a condition<sup>1</sup>.

#### NEW QUESTION # 29

Which two statements are true about REST Data Sources?

- A. REST Data Sources doesn't support any authentication
- **B. Oracle APEX supports the REST Enabled SQL Query REST Data Source type**
- C. Oracle APEX doesn't provide direct integration of REST Data Sources in interactive reports
- **D. A REST Data Source can contain one or many Operations which are the references to a concrete external web service**

**Answer: B,D**

Explanation:

Explanation

A REST Data Source is a logical representation of an external web service in Oracle APEX. It can contain one or many Operations, which are the references to a concrete external web service endpoint. Oracle APEX supports three types of REST Data Sources: REST Enabled SQL Query, Web Source Module, and Generic REST Data Source. Oracle APEX provides direct integration of REST Data Sources in interactive reports and grids, as well as other components. REST Data Sources can support various authentication methods, such as Basic, OAuth2, or Custom. References: [Understanding REST Data Sources] and [Creating a REST Data Source]

#### NEW QUESTION # 30

Which is NOT a valid Geometry Column Data Type available for maps region?

- A. GeoJSON
- B. Latitude/Longitude
- C. SDO\_GEOMETRY
- **D. JSON\_OBJECT**

**Answer: D**

Explanation:

Explanation

The valid Geometry Column Data Types for maps region are Latitude/Longitude, GeoJSON, and SDO\_GEOMETRY. These types represent different ways of storing spatial data in Oracle Database.

Latitude/Longitude uses two numeric columns for longitude and latitude values. GeoJSON uses a VARCHAR2 or CLOB column that contains geometry information in GeoJSON format. SDO\_GEOMETRY uses an object type that stores spatial data using Oracle Spatial features. JSON\_OBJECT is not a valid Geometry Column Data Type for maps region.
