

# Free PDF Quiz Oracle - 1Z1-182 - Authoritative Oracle Database 23ai Administration Associate Dumps Reviews

DOWNLOAD the newest Prep4sureExam 1Z1-182 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1TWQONoYAmojZOM6VJGgRGa7vITZPGnZF>

Regular practice can give you the skills and confidence needed to perform well on your 1Z1-182 exam. By practicing your Oracle Database 23ai Administration Associate (1Z1-182) exam regularly, you can increase your chances of success and make sure that all of your hard work pays off when it comes time to take the test. We understand that every Oracle Database 23ai Administration Associate (1Z1-182) exam taker has different preferences. To make sure that our Oracle 1Z1-182 preparation material is accessible to everyone, we made it available in three different formats.

We provide three versions to let the clients choose the most suitable equipment on their hands to learn the 1Z1-182 study materials such as the smart phones, the laptops and the tablet computers. We provide the professional staff to reply your problems about our study materials online in the whole day and the timely and periodical update to the clients. So you will definitely feel it is your fortune to buy our 1Z1-182 Study Materials.

## 1Z1-182 100% Exam Coverage & 1Z1-182 Latest Exam Papers

Contending for the success fruit of 1Z1-182 exam questions, many customers have been figuring out the effective ways to pass it. And that is why we have more and more customers and everyday the hot hit and high pass rate as well. It is all due to the advantage of our useful 1Z1-182 practice materials, and we have these versions of our 1Z1-182 study materials for our customers to choose according to their different study habits: the PDF, the Software and the APP online.

## Oracle 1Z1-182 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Managing Tablespaces and Datafiles: This section assesses the abilities of Storage Administrators in creating, modifying, and describing tablespaces. It also covers recognizing data storage requirements and understanding datafile placement for efficient storage management.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Employ Oracle-Supplied Database Tools: This section evaluates the abilities of Database Engineers and Support Specialists in identifying and using Oracle-supplied tools for managing databases. It focuses on leveraging tools to monitor, troubleshoot, and optimize database performance effectively.</li> </ul>

## Oracle Database 23ai Administration Associate Sample Questions (Q90-Q95):

### NEW QUESTION # 90

Examine this command: SQL> ALTER TABLE ORDERS SHRINK SPACE COMPACT; Which two statements are true?

- A. The SHRINK operation causes rows to be moved to empty space starting toward the end of the ORDERS segment.
- B. Dependent indexes become UNUSABLE.
- C. Queries and DML statements are allowed on ORDERS while the SHRINK is executing.
- D. The SHRINK operation causes rows to be moved to empty space starting from the beginning of the ORDERS segment.
- E. The high-water mark (HWM) of ORDERS is adjusted.
- F. Only queries are allowed on ORDERS while SHRINK is executing.

**Answer: C,D**

Explanation:

A . Dependent indexes become UNUSABLE.False. SHRINK SPACE COMPACT does not affect index usability; only SHRINK SPACE without COMPACT may require index maintenance if CASCADE is omitted.

B . ... starting toward the end of the ORDERS segment.False. Rows are compacted toward the beginning of the segment, not the end.

C . Only queries are allowed ...False. Both queries and DML are allowed during SHRINK SPACE COMPACT as it's an online operation.

- D . The high-water mark (HWM) of ORDERS is adjusted.False. COMPACT moves rows but doesn't adjust the HWM; the full SHRINK SPACE command is needed for HWM adjustment.
- E . Queries and DML statements are allowed ...True. This is an online operation in 23ai, allowing concurrent access.
- F . ... starting from the beginning of the ORDERS segment.True. Rows are moved to fill free space from the segment's start.

#### NEW QUESTION # 91

Which three statements are true about a dedicated server configuration?

- A. A dedicated server process can be spawned by the listener when using local clients.
- B. A dedicated server process may be reused by a new session after the session using that process terminates.
- C. The DBA configures the maximum number of dedicated server processes that can share the samedispatcher process.
- D. Each dedicated server process has its own dispatcher process.
- E. A dedicated server process can be spawned without a listener when using local clients.
- F. A dedicated server process communicates directly with a client or middle-tier process once the session is established.

**Answer: A,E,F**

Explanation:

- A .False. Dispatchers are for shared servers, not dedicated.
- B .False. Dedicated processes die with the session.
- C .True. Direct client-server communication occurs.
- D .False. No dispatchers in dedicated mode.
- E .True. Listener spawns for local/remote clients.
- F .True. Local logins (e.g., sqlplus /) bypass the listener.

#### NEW QUESTION # 92

Which two statements are true about the tools used to configure Oracle Net Services?

- A. The Oracle Net Configuration Assistant is only used when running the Oracle installer.
- B. The lsnrctl utility requires a listener.ora file to exist before it is started.
- C. Oracle Net Manager can be used to centrally configure listeners on any database server target.
- D. Oracle Net Manager can be used to locally configure naming methods on a database server.
- E. Enterprise Manager Cloud Control can be used to centrally configure net service names for any database server target.

**Answer: D,E**

Explanation:

- A .False. lsnrctl can start a default listener without listener.ora.
- B .True. EMCC provides centralized Net Services configuration.
- C .False. NetCA can run standalone, not just during installation.
- D .True. Net Manager configures local naming (e.g., TNSNAMES.ORA).
- E .False. Net Manager is local, not centralized like EMCC.

#### NEW QUESTION # 93

Which two methods can be used to purge audit records of the Unified Audits?

- A. Use DBMS\_AUDIT\_MGMT.CLEAN\_AUDIT\_TRAIL as a privileged user to manually purge audit records.
- B. Only viewed audit records can be purged from Unified Audits.
- C. Only the owner of a Unified Audit Policy can purge audit records by resetting the policy.
- D. Use DBMS\_AUDIT\_MGMT.DELETE\_AUDIT\_RECORDS('POLICY\_NAME') as a privileged user to manually purge audit records of a specified Unified Policy.
- E. Use DBMS\_AUDIT\_MGMT.CREATE\_PURGE\_JOB as a privileged user to schedule an automatic purge job.
- F. Use DBMS\_AUDIT\_MGMT.DELETE\_AUDIT\_RECORDS('POLICY\_NAME') as a privileged user to manually purge audit records of a specified Unified Policy.

**Answer: A,E**

Explanation:

False. No such procedure exists in DBMS\_AUDIT\_MGMT. The package offers CLEAN\_AUDIT\_TRAIL and CREATE\_PURGE\_JOB, but nothing targets a specific policy's records by name in this format. You can filter records in UNIFIED\_AUDIT\_TRAIL by policy (e.g., SELECT \* WHERE UNIFIED\_AUDIT\_POLICIES = 'POLICY\_NAME'), but purging is all-or-nothing or time-based, not policy-specific via a single command.

Why Incorrect: This appears to be a fabricated or misinterpreted option, possibly confusing audit policy management with trail purging.

Explanation:

Unified Auditing in Oracle 23ai consolidates audit records into a single trail, managed via the DBMS\_AUDIT\_MGMT package. Let's evaluate each option with extensive detail:

A : Only viewed audit records can be purged from Unified Audits.

False. There's no concept of "viewed" audit records restricting purging. Unified Audit records (stored in UNIFIED\_AUDIT\_TRAIL) can be purged based on time, policy, or manual intervention, regardless of whether they've been viewed. This option misrepresents audit management capabilities.

Mechanics: Purging is controlled by retention policies or explicit commands, not view status. For example, records older than a set retention period (e.g., 90 days via DBMS\_AUDIT\_MGMT.SET\_AUDIT\_TRAIL\_PROPERTY) are eligible for purging.

Why Incorrect: No Oracle documentation ties purging to viewing, making this a fabricated limitation.

B : Use DBMS\_AUDIT\_MGMT.CREATE\_PURGE\_JOB as a privileged user to schedule an automatic purge job.

True. This procedure creates a scheduled job to automatically purge audit records based on a retention policy or custom criteria. It's a standard method for ongoing audit trail maintenance, requiring privileges like AUDIT\_ADMIN.

Mechanics: Example: BEGIN DBMS\_AUDIT\_MGMT.CREATE\_PURGE\_JOB(AUDIT\_TRAIL\_TYPE => DBMS\_AUDIT\_MGMT.AUDIT\_TRAIL\_UNIFIED, JOB\_FREQUENCY => 'DAILY', JOB\_STATUS => DBMS\_AUDIT\_MGMT.JOB\_ENABLED); END;. This schedules daily purges of old records, using the retention period set by SET\_AUDIT\_TRAIL\_PROPERTY.

Practical Use: Ideal for production environments to prevent the audit trail from growing indefinitely (e.g., avoiding tablespace exhaustion in SYSAUX).

Edge Case: If no retention period is set, the job purges nothing until configured, highlighting the need for prior setup.

C : Only the owner of a Unified Audit Policy can purge audit records by resetting the policy.

False. Audit policies don't have "owners" in the traditional sense; they're created by users with AUDIT\_ADMIN and managed globally. Resetting or disabling a policy (e.g., NOAUDIT POLICY my\_policy) stops auditing but doesn't purge existing records. Purging is a separate operation via DBMS\_AUDIT\_MGMT.

Why Incorrect: This conflates policy management with audit trail cleanup, which are distinct in Oracle.

D : Use DBMS\_AUDIT\_MGMT.CLEAN\_AUDIT\_TRAIL as a privileged user to manually purge audit records.

True. This procedure manually purges all Unified Audit records up to the current timestamp (or a specified time), requiring AUDIT\_ADMIN privileges. It's a one-time cleanup tool.

Mechanics: Example: BEGIN DBMS\_AUDIT\_MGMT.CLEAN\_AUDIT\_TRAIL(AUDIT\_TRAIL\_TYPE => DBMS\_AUDIT\_MGMT.AUDIT\_TRAIL\_UNIFIED, USE\_LAST\_ARCH\_TIMESTAMP => FALSE); END;. This clears the entire trail unless restricted by a timestamp.

Practical Use: Useful for immediate space reclamation or post-incident cleanup, unlike scheduled jobs.

Edge Case: If the audit trail is large, this may require significant undo space and time, potentially impacting performance.

## NEW QUESTION # 94

You unplugged a PDB to plug it into another CDB with the following command: SQL> ALTER PLUGGABLE DATABASE pdb1 UNPLUG INTO '/tmp/pdb1.pdb'; Which statement is true prior to plugging the PDB into the other CDB?

- A. The PDB manifest, the data files, and the PDB archive file must be copied to the target CDB.
- B. The PDB manifest and all the datafiles must be copied to the target CDB.
- C. PDB archive file and only the user-defined tablespaces must be copied to the target CDB.
- D. The PDB archive file must be copied to the target CDB.

**Answer: A**

Explanation:

D . True. The .pdb file (archive) contains the manifest and data files; all must be copied to the target CDB for plugging.

A-C . False. The archive alone isn't enough; all components are needed.

## NEW QUESTION # 95

.....

The paper materials students buy on the market are often not able to reuse. After all the exercises have been done once, if you want to do it again you will need to buy it again. But with 1Z1-182 test question, you will not have this problem. All customers who purchased 1Z1-182 Study Tool can use the learning materials without restrictions, and there is no case of duplicate charges. For the PDF version of 1Z1-182 test question, you can print multiple times, practice multiple times, and repeatedly reinforce your unfamiliar knowledge.
