

Free PDF Quiz Palo Alto Networks - NetSec-Generalist - Palo Alto Networks Network Security Generalist High Hit-Rate New Braindumps Sheet

BONUS!!! Download part of SurePassExams NetSec-Generalist dumps for free: <https://drive.google.com/open?id=1B3WbzefKwwdN6oWGMsXU6bie4Fbu4L>

The PDF version of our NetSec-Generalist study tool is very practical, which is mainly reflected on the special function. As I mentioned above, our company are willing to provide all people with the demo for free. You must want to know how to get the trial demo of our NetSec-Generalist question torrent; the answer is the PDF version. You can download the free demo form the PDF version of our NetSec-Generalist exam torrent. Maybe you think it does not prove the practicality of the PDF version, do not worry, we are going to tell us another special function about the PDF version of our NetSec-Generalist Study Tool. If you download our study materials successfully, you can print our study materials on pages by the PDF version of our NetSec-Generalist exam torrent. We believe these special functions of the PDF version will be very useful for you to prepare for your exam. We hope that you will like the PDF version of our NetSec-Generalist question torrent.

Palo Alto Networks NetSec-Generalist Exam Syllabus Topics:

Topic	Details
Topic 1	• Network Security Fundamentals: This section measures the skills of Network Security Engineers and explains application layer inspection for Strata and SASE products. It covers topics such as slow path versus fast path packet inspection, decryption methods like SSL Forward Proxy, and network hardening techniques including Content and Zero Trust. A key skill measured is applying decryption techniques effectively.
Topic 2	• Infrastructure Management and CDSS: This section measures the skills of Infrastructure Managers in managing CDSS infrastructure by configuring profiles • policies for IoT devices or enterprise DLP • SaaS security solutions while ensuring data encryption • access control practices are implemented correctly across these platforms. A key skill measured is securing IoT devices through proper configuration.
Topic 3	• NGFW and SASE Solution Functionality: This section targets Cybersecurity Specialists to understand the functionality of Cloud NGFWs, PA-Series, CN-Series, and VM-Series firewalls. It includes perimeter security, zone segmentation, high availability configurations, security policy implementation, and monitoring • logging practices. A critical skill assessed is implementing zone security policies effectively.

Topic 4	• Platform Solutions, Services, and Tools: This section measures the skills of IT Architects in describing Palo Alto Networks NGFW and Prisma SASE products for enhanced security efficacy. It covers creating security policies with User-ID • App-ID configurations along with monitoring tools like CDSS (Cloud-Delivered Security Services). A key skill measured is configuring cloud-delivered services efficiently.

New NetSec-Generalist Braindumps Sheet - How to Prepare for Palo Alto Networks NetSec-Generalist Efficiently and Easily

It is known to us that the error correction is very important for these people who are preparing for the NetSec-Generalist exam in the review stage. It is very useful and helpful for a lot of people to learn from their mistakes, because many people will make mistakes in the same way, and it is very bad for these people to improve their accuracy. If you want to correct your mistakes when you are preparing for the NetSec-Generalist Exam, the study materials from our company will be the best choice for you. Because our NetSec-Generalist reference materials can help you correct your mistakes and keep after you to avoid the mistakes time and time again. We believe that if you buy the NetSec-Generalist exam prep from our company, you will pass your exam in a relaxed state.

Palo Alto Networks Network Security Generalist Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which statement best demonstrates a fundamental difference between Content-ID and traditional network security methods?

- A. Content-ID inspects traffic at the application layer to provide real-time threat protection.
- B. Traditional methods block specific applications using signatures.
- C. Traditional methods provide comprehensive application layer inspection.
- D. Content-ID focuses on blocking malicious IP addresses and ports.

Answer: A

NEW QUESTION # 15

In conjunction with Advanced URL Filtering, which feature can be enabled after username-to-IP mapping is set up?

- A. Client probing
- B. Credential phishing prevention
- C. Host information profile (HIP)
- D. Indexed data matching

Answer: B

NEW QUESTION # 16

With Strata Cloud Manager (SCM), which action will efficiently manage Security policies across multiple cloud providers and on-premises data centers?

- A. Create and manage separate Security policies for each environment to address specific needs.
- B. Use snippets and folders to define and enforce uniform Security policies across environments.
- C. Allow each cloud provider's native security tools to handle policy enforcement independently.
- D. Use the "Feature Adoption" visibility tab on a weekly basis to make adjustments across the network.

Answer: B

NEW QUESTION # 17

Which functionality does an NGFW use to determine whether new session setups are legitimate or illegitimate?

- A. SYN cookies
- B. SYN bit
- C. Random Early Detection (RED)
- **D. SYN flood protection**

Answer: D

NEW QUESTION # 18

What is the most efficient way in Strata Cloud Manager (SCM) to apply a Security policy to all ten firewalls in one data center?

- A. Create the Security policy at any configuration scope, then clone it to the ten firewalls.
- **B. Create a folder that groups the ten firewalls together, then create the Security policy at that configuration scope.**
- C. Set the configuration scope to "Global" and create the Security policy.
- D. Create the Security policy on each firewall individually.

Answer: B

Explanation:

In Strata Cloud Manager (SCM), the most efficient way to apply a Security policy to multiple firewalls in a single data center is to group the firewalls together into a folder and create the Security policy at that configuration scope.

Grouping Firewalls: By organizing the ten firewalls into a folder, administrators can manage them as a single entity, reducing configuration time and ensuring consistency.

Configuration Scope: SCM allows you to create policies at different scopes, such as Global, Device Group, or Folder level. By applying the policy at the folder scope, it is automatically propagated to all firewalls within the group.

Efficiency: This approach eliminates the need to individually configure each firewall or manually clone policies, which can be time-consuming and error-prone.
