We are engaging in this line to provide efficient reliable C-AIG-2412 practice materials which is to help you candidates who are headache for their C-AIG-2412 exams. They spend a lot of time and spirits on this exam but waste too much exam cost. Our C-AIG-2412 quiz question torrent can help you half work with double results. Sometimes choice is more important than choice. After purchasing our exam C-AIG-2412 Training Materials, you will have right ways to master the key knowledge soon and prepare for C-AIG-2412 exam easily, you will find clearing C-AIG-2412 exam seems a really easily thing.

The world is changing rapidly and the requirements to the employees are higher than ever before. If you want to find an ideal job and earn a high income you must boost good working abilities and profound major knowledge. Passing C-AIG-2412 certification can help you realize your dreams. If you buy our product, we will provide you with the best SAP Certified Associate study materials and it can help you obtain C-AIG-2412 certification. Our product is of high quality and our service is perfect.

First-grade SAP C-AIG-2412 - Valid SAP Certified Associate - SAP Generative AI Developer Test Cram

The best practice indicates that people who have passed the C-AIG-2412 exam would not pass the exam without the help of the C-AIG-2412 reference guide. So the study materials will be very important for all people. If you also want to pass the C-AIG-2412 exam and get the related certification in a short, our C-AIG-2412 Study Materials are the best choice for you. After studing with our C-AIG-2412 exam questions, you will be able to pass the C-AIG-2412 exam with confidence. We sincerely hope that our C-AIG-2412 study materials will help you achieve your dream.

SAP Certified Associate - SAP Generative AI Developer Sample Questions

(Q41-Q46):

NEW QUESTION # 41
What are some examples of generative AI technologies? Note: There are 2 correct answers to this question.

- A. Rule-based algorithms
- B. Foundation models
- C. Robotic process automation
- D. AI models that generate new content based on training data

Answer: B,D

Explanation:
Generative AI encompasses technologies that create new content by learning from existing data.
1. AI Models That Generate New Content Based on Training Data:
* Definition:These models analyze large datasets to produce original outputs, such as text, images, or music, that resemble the patterns found in the training data.
* Examples:Models like GPT-4 generate human-like text, while DALL E creates images from textual descriptions.
2. Foundation Models:
* Definition:Foundation models are large-scale AI models trained on extensive data across various domains. They serve as a base for fine-tuning on specific tasks, enabling versatility in applications.
* Examples:Models such as BERT and GPT-3 are foundation models that can be adapted for tasks like translation, summarization, or content generation.

NEW QUESTION # 42
What is the purpose of splitting documents into smaller overlapping chunks in a RAG system?

- A. To reduce the storage space required for the vector database
- B. To enable the matching of different relevant passages to user queries
- C. To improve the efficiency of encoding queries into vector representations
- D. To simplify the process of training the embedding model

Answer: B

NEW QUESTION # 43
What are some benefits of the SAP AI Launchpad? Note: There are 2 correct answers to this question.

- A. Integration with non-SAP platforms like Azure and AWS.
- B. Centralized AI lifecycle management for all AI scenarios.
- C. Direct deployment of AI models to SAP HANA.
- D. Simplified model retraining and performance improvement.

Answer: B,D

Explanation:
SAP AI Launchpad offers several benefits that enhance the development, deployment, and management of AI models within an organization.
1. Centralized AI Lifecycle Management for All AI Scenarios:
* Unified Platform:SAP AI Launchpad provides a centralized platform to manage the entire AI lifecycle, including model development, training, deployment, monitoring, and maintenance.
* Efficiency:This centralized approach streamlines workflows, reduces complexity, and ensures consistency across various AI projects and scenarios.

NEW QUESTION # 44
How can Joule improve workforce productivity? Note: There are 2 correct answers to this question.

- A. By offering generic task recommendations unrelated to specific roles.

- B. By maintaining strict adherence to data privacy regulations.
- C. By resolving hardware malfunctions.
- D. By providing context-based role-specific task assistance.

Answer: B,D

Explanation:
SAP's AI copilot, Joule, enhances workforce productivity through several key features:
1. Adherence to Data Privacy Regulations:
* Data Security and Privacy:Joule is designed with a strong emphasis on data security and privacy, ensuring compliance with data protection regulations. This adherence builds user trust and allows employees to utilize AI tools confidently, knowing that their data is handled responsibly.
2. Context-Based Role-Specific Task Assistance:
* Personalized Assistance:Joule provides context-aware support tailored to individual roles within an organization. By understanding the specific needs and responsibilities of each user, Joule offers relevant insights and automates routine tasks, thereby enhancing efficiency and allowing employees to focus on higher-value activities.

NEW QUESTION # 45
What is the primary function of the embedding model in a RAG system?

- A. To generate responses based on retrieved documents and user queries
- B. To evaluate the faithfulness and relevance of generated Answers
- C. To store vector representations of documents and search for relevant passages
- D. To encode queries and documents into vector representations for comparison

Answer: D

Explanation:
In a Retrieval-Augmented Generation (RAG) system, the embedding model plays a crucial role in encoding textual data into vector representations, facilitating efficient retrieval and comparison.
1. Function of the Embedding Model:
* Vector Encoding:The embedding model transforms both user queries and documents into high- dimensional vector representations. This numerical encoding captures the semantic meaning of the text, enabling the system to assess similarities between different pieces of text effectively.
* Facilitating Retrieval:By encoding text into vectors, the system can perform efficient similarity searches within a vector database, identifying documents or passages that are most relevant to the user's query.
2. Importance in RAG Systems:
* Semantic Matching:The vector representations allow the system to match user queries with relevant documents based on semantic content rather than mere keyword overlap, enhancing the relevance of retrieved information.
* Efficiency:Vector-based retrieval is computationally efficient, enabling rapid identification of pertinent information from large datasets, which is essential for real-time applications.
3. Application in SAP's Generative AI Hub:
* Integration with HANA Vector Search:SAP's Generative AI Hub integrates embedding models with HANA's vector search capabilities, allowing for efficient storage and retrieval of vector embeddings.
This integration supports the development of RAG systems that can effectively utilize SAP's data assets.
* Generative AI Hub SDK:SAP provides an SDK that facilitates the implementation of embedding models within RAG systems, enabling developers to encode queries and documents into vector representations seamlessly.
