

Free PDF Quiz Perfect 1z0-1093-25 - Oracle Cloud Database Services 2025 Professional Exam Quick Prep

P.S. Free 2025 Oracle 1z0-1093-25 dumps are available on Google Drive shared by DumpsTests: <https://drive.google.com/open?id=1SJDHcjLTV7VDdA5iQmpANeyOAZMqdbYz>

By offering the most considerate after-sales services of 1z0-1093-25 exam torrent materials for you, our whole package services have become famous and if you hold any questions after buying Oracle Cloud Database Services 2025 Professional prepare torrent, get contact with our staff at any time, they will solve your problems with enthusiasm and patience. They do not shirk their responsibility of offering help about 1z0-1093-25 Test Braindumps for you 24/7 that are wary and considerate for every exam candidate's perspective. Understanding and mutual benefits are the cordial principles of services industry. We know that tenet from the bottom of our heart, so all parts of service are made due to your interests.

Our company provide free download and tryout of the 1z0-1093-25 study materials and update the 1z0-1093-25 study materials frequently to guarantee that you get enough test bank and follow the trend in the theory and the practice. We provide 3 versions for you to choose thus you can choose the most convenient method to learn. Our 1z0-1093-25 Study Materials are compiled by the experienced professionals elaborately. Our product boosts many advantages and to gain a better understanding of our 1z0-1093-25 study materials please read the introduction of the features and the functions of our product as follow.

Oracle 1z0-1093-25 Study Reference & 1z0-1093-25 Test Discount Voucher

If only you provide the scanning copy of the 1z0-1093-25 failure marks we will refund you immediately. If you have any doubts about the refund or there are any problems happening in the process of refund you can contact us by mails or contact our online customer service personnel and we will reply and solve your doubts or questions timely. We provide the best service and 1z0-1093-25 Test Torrent to you to make you pass the exam fluently but if you fail in we will refund you in full and we won't let your money and time be wasted. Our questions and answers are based on the real exam and conform to the popular trend in the industry.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	• NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
Topic 2	• Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.
Topic 3	• MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 4	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
Topic 5	• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which database lifecycle management operation in BaseDB requires the creation of a new database home and is non-reversible after completion?

- A. Enabling Automatic Storage Management (ASM).
- B. Scaling the compute shape of the VM.
- C. Upgrading the Oracle Grid Infrastructure.
- **D. Upgrading the Oracle Database software version.**
- E. Applying an operating system patch.

Answer: D

Explanation:

Database Software Upgrade:

When upgrading the Oracle Database software version on a BaseDB VM, a new Oracle Home is created to house the upgraded software. Once the database is moved to this new home, the process is not easily reversible.

* Rolling back would require downgrading, which is a complex and risky process.

* The new Oracle Home ensures that the upgraded database environment is isolated from the previous version, preventing compatibility conflicts.

Why the other options are incorrect:

* A: Grid Infrastructure upgrades can be managed independently of the database upgrade.

* B: Scaling VMs is a reversible operation.

* D: OS patches do not impact the Oracle Home directly.

* E: ASM configuration changes are reversible.

NEW QUESTION # 48

Which statement accurately describes the primary function of a NoSQL Database Cloud Service SDK?

- A. To manage the underlying infrastructure hosting the NoSQL database.
- **B. To provide a programming interface for interacting with the database, abstracting away low-level API details.**
- C. To configure network security policies for accessing the database.
- D. To define the physical storage layout of the database.

Answer: B

Explanation:

SDK Function:

An SDK simplifies database interaction by providing libraries and tools that abstract away the complexities of the underlying API. This allows developers to use familiar programming languages and constructs to interact with the database.

Why the other options are incorrect:

- * A: Physical storage layout is managed by the database service, not the SDK.
- * C: Infrastructure management is handled by cloud providers, not the SDK.
- * D: Network security policies are managed via OCI console or infrastructure tools, not the SDK.

NEW QUESTION # 49

What is the primary processing paradigm employed by the HeatWave query accelerator for analytical workloads?

- A. Key-value pair processing
- **B. Columnar processing**
- C. Disk-based processing
- D. Index-based processing
- E. Row-based processing

Answer: B

Explanation:

HeatWave's Processing Model:

HeatWave uses columnar in-memory processing to optimize analytical workloads. Storing data in columns rather than rows allows HeatWave to process large datasets efficiently, reducing the volume of data scanned and improving query performance. This is crucial for OLAP operations that involve aggregating and analyzing data.

Why the other options are incorrect:

- * A: Row-based processing is typical for OLTP workloads, not analytical.
- * B: HeatWave operates primarily in memory, not disk.
- * D: Indexing enhances performance but is not the primary processing paradigm.
- * E: Key-value processing is typical in NoSQL databases, not analytical systems.

NEW QUESTION # 50

Which of the following is the recommended approach for migrating a large, mission-critical database from an on-premises Exadata system to Exadata Database Service with minimal downtime?

- **A. Creating a physical standby database using Data Guard and switching over to the standby in OCI.**
- B. Traditional export/import using Data Pump over a public network.
- C. Performing a full backup and restore to a new Exadata Database Service instance.
- D. Using SQL Developer to copy the data over a VPN connection.

Answer: A

Explanation:

B: Using Data Guard for physical standby and switchover:

- * This method enables minimal downtime migration.

* Steps:

- * Configure Data Guard to synchronize the standby database with the primary on-premises database.
- * Once synchronized, perform a switchover to make the standby the new primary.

- * Downtime is limited to the switchover duration.
 - * This approach leverages real-time replication to minimize disruption.
- Why the other options are incorrect:
- * A. Export/Import with Data Pump: Too time-consuming for large databases.
 - * C. Full backup and restore: High downtime due to the time required for data transfer and restoration.
 - * D. Copying via SQL Developer: Not feasible for mission-critical and large databases due to slow transfer speeds.

NEW QUESTION # 51

When provisioning an Exadata Database Service, which two networking components are mandatory?

- A. A NAT Gateway for each VM within the VM Cluster to allow outbound internet access for patching.
- B. A public subnet for the Exadata Infrastructure to allow external access for monitoring.
- **C. A private subnet for the client network to ensure secure database access.**
- D. A Service Gateway to allow access to Oracle Services without traversing the public internet.
- **E. A private subnet for database backups to Oracle Cloud Infrastructure Object Storage.**

Answer: C,E

Explanation:

C: Private subnet for client network:

- * Essential for secure access to the databases hosted on the Exadata Database Service instance.
- * Ensures that client connections are restricted and managed through private IPs.

E: Private subnet for database backups:

- * Used to securely connect to Oracle Cloud Infrastructure Object Storage for storing backups.
- * Enables data protection without exposing the backup traffic to the public internet.

Why the other options are incorrect:

- * A. Public subnet for monitoring: Not required; secure access can be configured through private subnets.
- * B. Service Gateway: Optional, used for connecting to Oracle services without using the public internet.
- * D. NAT Gateway: Not mandatory unless specific outbound connectivity is required.

NEW QUESTION # 52

.....

What does it mean to win a competition? Users of our 1z0-1093-25 actual exam can give you good answers. They have improved their strength and proved their strength. Now they have more opportunities and they have the right to choose. Of course, the effective learning methods they learned during the use of our 1z0-1093-25 Preparation materials also greatly enhanced their work. All of them had praised that our 1z0-1093-25 exam questions are the best choice they had made to buy. So what are you waiting for? Just rush to buy our 1z0-1093-25 practice guide!
