AVIXA Certified Technology Specialist Sample Questions (Q242-Q247):

NEW QUESTION # 242

A client wants to upgrade tire AV system in a boardroom and add control of the lights and shades to the control panel. What information is MOST relevant to gather to enable this integration?

- A. communications protocols
- B. number of IR ports

- C. color temperature
- D. warranty information

Answer: A

NEW QUESTION # 243

What should be identified during a project's needs analysis?

- A. the timeline for completion
- B. the overall budget
- C. stakeholders involved
- D. key activities to be performed

Answer: C

Explanation:

A needs analysis should identify all stakeholders involved, as they influence project requirements, decision-making, and the approval process. Understanding stakeholders ensures that all perspectives are considered, leading to a more comprehensive solution.

CTS Technology Specialist Reference

CTS guidelines stress identifying stakeholders early to ensure project alignment with all key parties and address specific needs or preferences.

NEW QUESTION # 244

What should an AV integrator provide to a general contractor to ensure the supporting trades get the AV information that is needed?

- A. construction drawings
- B. as-built drawings
- C. bid drawings
- D. permit drawings

Answer: A

Explanation:

AV integrators should provide construction drawings to a general contractor. These drawings contain detailed information about the AV system layout, including locations of equipment, wiring paths, and installation requirements. Construction drawings ensure that all supporting trades, such as electrical and carpentry, have the necessary details to accommodate AV system installations. They coordinate the work of different trades to avoid conflicts and ensure proper implementation. Construction drawings are essential for aligning the AV system installation with the overall building construction process, ensuring accuracy and efficiency.

NEW QUESTION # 245

When planning video content with a client, it is important to get their Pantone data (PMS) to ensure

- A. their confidence monitor size is large enough.
- B. the displayed colors match printed colors.
- C. the displayed type face is the correct size and style.
- D. the displayed logo is the proper size and style.

Answer: B

Explanation:

Pantone data (PMS) is used to ensure color consistency between digital displays and printed materials. This is critical in branding to maintain accurate color representation across different mediums, particularly for logos and brand colors.

CTS Technology Specialist Reference CTS guidelines on content creation emphasize color matching as a key consideration for client branding, often involving Pantone color standards to achieve consistency.

NEW QUESTION # 246

When should preventive maintenance be undertaken?

- A. when there is more than one failure in the system
- B. when a projector lamp has failed
- C. after a customer has reported a system failure
- **D. at scheduled times independent of system failures**

Answer: D

Explanation:

Preventive maintenance is planned maintenance conducted at regular intervals to ensure system reliability and prevent issues before they occur, rather than in response to system failures.

CTS Technology Specialist Reference

CTS training on maintenance highlights the importance of scheduled preventive maintenance to keep systems operating smoothly and extend equipment lifespan.

NEW QUESTION # 247

.....

We are engaged in IT certification examinations guide torrent many years, most our products are similar with the real test.
