Realistic Microsoft Reliable PL-600 Dumps Questions Are Leading Materials & Trusted PL-600: Microsoft Power Platform Solution Architect

TrainingDumps is the trustworthy platform for you to get the reference study material for PL-600 exam preparation. The PL-600 questions and answers are compiled by our experts who have rich hands-on experience in this industry. So the contents of PL-600 pdf cram cover all the important knowledge points of the actual test, which ensure the high hit-rate and can help you 100% pass. Besides, we will always accompany you during the PL-600 Exam Preparation, so if you have any doubts, please contact us at any time. Hope you achieve good result in the PL-600 real test.

Microsoft PL-600 Certification Exam consists of multiple-choice questions that assess a candidate's knowledge of the Power Platform and their ability to design and implement solutions using its various applications. PL-600 exam covers topics such as data modeling, user experience design, automation workflows, and security configurations. Earning this certification can help professionals advance their career in the technology field and demonstrate their expertise to potential employers and clients.

Microsoft PL-600 Certification Exam is an excellent opportunity for professionals who want to enhance their career in the field of Microsoft Power Platform. Microsoft Power Platform Solution Architect certification validates the skills of professionals who can design and implement solutions that leverage the platform's technologies. With the increasing demand for professionals who can work on the Microsoft Power Platform, this certification can help professionals stand out in the job market and advance their careers.

Microsoft Power Platform Solution Architect Sample Questions (Q36-Q41):

NEW QUESTION # 36

You need to recommend methods for assigning security to each group of users.

The customer provides the following requirements:

- * Customers need the ability to submit a case through an online portal.
- * Portal must handle 75 concurrent users submitting cases.
- * Service data must be retained for at least six years.

You need to determine which requirements are functional or non-functional.

Which requirements are functional or non-functional? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types	Requirement	Type
Functional	Customers need the ability to submit a case through an online portal.	
Non-functional	Portal must handle 75 current users submitting cases.	
	Service data must be retained for at least six years.	

Answer:

Explanation:

Types	Requirement	Type
Functional	Customers need the ability to submit a case through an online portal.	Functional
Non-functional	Portal must handle 75 current users submitting cases.	Non-functional
	Service data must be retained for at least six years.	Non-functional

Explanation:

Requirement	Type
Customers need the ability to submit a case through an online portal.	Functional
Portal must handle 75 current users submitting cases.	Non-functional
Service data must be retained for at least six years.	Non-functional

Box 1: Functional

Functional requirements describe what the solution needs to do or its behaviors.

Box 2: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 3: Non-functional

Examples of common non-functional requirement types include:

- * Availability
- * Compliance/regulatory
- * Data retention/residency
- * Performance (response time, and so on)
- * Privacy
- * Recovery time
- * Security
- * Scalability

Reference:

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements>

NEW QUESTION # 37

You are designing tables and columns for a Microsoft Power Platform solution.

The solution will contain an interactive experience dashboard.

You need to ensure that the columns you create can be used as global filters for the dashboard.

Which two data types can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point

- **A. Choice**
- B. Lookup
- C. Text
- D. Multiline Text
- **E. Yes/No**

Answer: A,E

Explanation:

With interactive dashboards, a chart uses the color assigned to the categories that make up the different values, even if the chart is configured to use random colors, when the chart is configured to be grouped by any of the following column types:

Choice

Yes/No

Status Reason

NEW QUESTION # 38

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process.

The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Upload the activity data stored in the Excel sheet to the process advisor feature. Use task mining to discover inefficiencies in the process.

Does the solution meet the goal?

- **A. Yes**
- B. No

Answer: A

NEW QUESTION # 39

A company plans to create a Power Apps portal to manage support cases for customers. The company has an account hierarchy for customers. The hierarchy supports accounts, cases, and contacts where both contacts and cases belong to their relevant account.

The company has the following requirements:

* Portal users must only see the notes for the cases that they manage.

* Portal users must only see cases that are submitted by their colleagues.

You need to design the security model for the portal.

Which entity permission scope should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Scope

Portal users must only see the notes for the cases that they manage.

	▼
Self	
Parent	
Contact	
Account	

Portal users must only see cases that are submitted by their colleagues.

	▼
Self	
Global	
Contact	
Account	

Answer:

Explanation:

Requirement

Scope

Portal users must only see the notes for the cases that they manage.

	▼
Self	
Parent	
Contact	
Account	

Portal users must only see cases that are submitted by their colleagues.

	▼
Self	
Global	
Contact	
Account	

Explanation:

Requirement	Scope										
Portal users must only see the notes for the cases that they manage.	<table><tr><td></td><td>▼</td></tr><tr><td colspan="2">Self</td></tr><tr><td colspan="2">Parent</td></tr><tr><td colspan="2">Contact</td></tr><tr><td colspan="2">Account</td></tr></table>		▼	Self		Parent		Contact		Account	
	▼										
Self											
Parent											
Contact											
Account											
Portal users must only see cases that are submitted by their colleagues.	<table><tr><td></td><td>▼</td></tr><tr><td colspan="2">Self</td></tr><tr><td colspan="2">Global</td></tr><tr><td colspan="2">Contact</td></tr><tr><td colspan="2">Account</td></tr></table>		▼	Self		Global		Contact		Account	
	▼										
Self											
Global											
Contact											
Account											

Box 1: Contact

With Contact scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user's contact record via a defined relationship.

Box 2: Account

With Account Scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user's parent account record via a defined relationship.

This scope means that the entity list will only show the records of the selected entity that are associated to the user's parent account.

For example, if an entity permission allows Read access to Lead entity with the Account scope, the user having this permission can view all the leads of only the parent account of the user.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/assign-entity-permissions>

NEW QUESTION # 40

You are designing a Power Platform solution.

During quality assurance testing the API limits are reached.

You need to identify and resolve the issue.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. In the Power Platform admin center, review the Usage section of the Power Apps analytics dashboard.
- B. In the Power Platform admin center, review the Runs section of the Power Automate analytics dashboard.
- C. Use the out-of-the-box User Summary report from the Reports section of the solution's model-driven app.
- D. Review the Home tab Dataverse analytics dashboard.
- E. Allocate Microsoft Dataverse capacity add-on subscriptions.

Answer: D,E

Explanation:

A: When users exceed their limits, administrators can see this in the admin center (see below). You can do either one of the following:

Adjust the app or flow to use fewer API requests

Purchase the Power Apps and Power Automate capacity add-on for your organization.

C: Home (default) Dashboard.

This is the default dashboard that provides information on the number of active Dataverse users, storage usage, the most active workflows, and more.

API Calls: API Calls Number of API calls that were made by the Dataverse environment for the selected time period.
