You won't need anything else if you prepare for the exam with our Salesforce Platform-App-Builder Exam Questions. Our experts have prepared Salesforce Platform-App-Builder dumps questions that will eliminate your chances of failing the exam. We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the Salesforce Platform-App-Builder Exam Preparation.

Salesforce Platform-App-Builder (Salesforce Certified Platform App Builder) Certification Exam is designed to test the expertise of individuals in building custom applications on the Salesforce platform. Salesforce Certified Platform App Builder certification is meant for professionals who want to showcase their skills and knowledge in designing, building, and implementing custom applications on the Salesforce platform. Salesforce Certified Platform App Builder certification exam is a great way to validate your skills and demonstrate your commitment to the Salesforce platform.

Salesforce Platform-App-Builder Exam consists of 60 multiple-choice questions that must be completed within 105 minutes. Platform-App-Builder exam covers a range of topics, including data modeling, security, user interface (UI) design, business logic, and application automation. Salesforce Certified Platform App Builder certification is intended to demonstrate a professional's ability to build and customize applications using declarative tools and techniques, rather than coding.

The Salesforce Platform-App-Builder Exam consists of 60 multiple-choice questions and has a time limit of 105 minutes. The questions are designed to test the individual's knowledge and skills in various areas related to building custom applications on the Salesforce platform. Platform-App-Builder exam is computer-based and can be taken at a testing center or online.

Maybe you will find that the number of its Platform-App-Builder test questions is several times of the traditional problem set, which basically covers all the knowledge points to be mastered in the exam or maybe you will find the number is the same with the real exam questions. You only need to review according to the content of our Platform-App-Builder practice quiz, no need to refer to other materials. With the help of our Platform-App-Builder study materials, your preparation process will be relaxed and pleasant.

Salesforce Certified Platform App Builder Sample Questions (Q163-Q168):

NEW QUESTION # 163

Cloud Kicks (CK) increased its Salesforce development efforts so that it now has multiple custom development efforts happening in parallel. CK's developers and admins perform the custom (rations and have complained that working in one sandbox has led to many problems. They requested a solution in which they can work in at least 20 different sandboxes at once, that all start with the same base configuration and data.

What should an app builder use to solve the problem?

- **A. Partial copy sandboxes**
- B. Sandbox refreshes
- C. Sandbox during
- D. Full copy sandboxes

Answer: A

Explanation:

* Partial Copy Sandboxes are ideal for testing and development purposes as they include a subset of production data and can be refreshed more frequently than Full Copy sandboxes. References:

* Salesforce Help - Types of Sandboxes

NEW QUESTION # 164

What is a true statement in regard to creating custom report types? A. When the primary object is a custom object and is deleted, then the report type and any reports created from it must be deleted manually

- A. When the primary object is a custom object and is deleted, then the report type and any reports created from it must be deleted manually
- B. The detail object in a master-detail relationship cannot be added as a secondary object on a custom report type
- C. Any object can be chosen unless the object is not visible to the person creating the report type through security settings
- **D. Once a report type is saved with a standard or custom primary object, the primary object cannot be changed for the report type**

Answer: D

NEW QUESTION # 165

After utilizing the Lightning Object Creator to create a new object, its fields, and to insert all of the data, an app builder now needs to set up the Lightning Record Page.

Which component should the app builder have on their Lightning Record Page to see all of the fields from the page layout?

- A. Recommendations
- B. Path
- C. Highlights Panel
- **D. Record Detail**

Answer: D

Explanation:

For an app builder who needs to ensure all fields from the page layout are visible on a Lightning Record Page after using the Lightning Object Creator, the correct component to use is:

Record Detail (C). The Record Detail component automatically displays all fields that are included on the assigned page layout for the object. It is designed to reflect the layout configuration and is the simplest way to ensure all fields are presented as configured in the layout editor.

Highlights Panel (A) is used primarily to display key fields at the top of the record page, providing a summary view rather than full field visibility. Recommendations (B) is used for displaying prompts or suggestions and does not display record fields. Path (D) is useful for displaying stages in a process (like sales stages or service processes) and does not show field data directly.

Lightning Record Pages: https://help.salesforce.com/articleView?id=sf.lightning_page_components.htm&type=5

NEW QUESTION # 166

A manager wants to calculate the number of days since an account was last contacted through email. Which field type should be used to accomplish this?

- A. Number
- B. Date
- **C. Formula**
- D. Roll-up Summary

Answer: C

NEW QUESTION # 167

Universal Container wants customers to be able to open cases from a public-facing website.

What should the app builder use to enable visitors to the website?

- A. Outbound message
- B. Screen flow
- C. Web-to-case
- **D. Email-to-case**

Answer: D

NEW QUESTION # 168

.....
