

Free PDF Quiz Snowflake - DAA-C01 Accurate Book Free

DOWNLOAD the newest Prep4pass DAA-C01 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1PFy0tS7ij0i9ygtES7owe_LSDOIbRsMd

Prep4pass helps you reach your objective by offering SnowPro Advanced: Data Analyst Certification Exam updated test questions. These Snowflake DAA-C01 Dumps questions are enough to get knowledge necessary to crack the examination on the first attempt. Our SnowPro Advanced: Data Analyst Certification Exam practice material is designed by considering the content published by Snowflake. Relevancy of valid questions with the actual exam's syllabus helps you understand the pattern of the exam. Prep4pass offers its SnowPro Advanced: Data Analyst Certification Exam product in three forms, DAA-C01 PDF, desktop practice exam software, and SnowPro Advanced: Data Analyst Certification Exam web-based practice test.

We are dedicated to providing our clients with the most current and accurate SnowPro Advanced: Data Analyst Certification Exam study material. That is why we provide 1 year of free DAA-C01 questions updates if the Snowflake certification test content changes after your purchase. With this option, our clients can confidently use the most up-to-date and dependable DAA-C01 preparatory material.

New Snowflake DAA-C01 Exam Vce - DAA-C01 Certification Materials

The Snowflake DAA-C01 exam PDF is the collection of real, valid, and updated Snowflake DAA-C01 practice questions. The Snowflake DAA-C01 PDF dumps file works with all smart devices. You can use the DAA-C01 PDF Questions on your tablet, smartphone, or laptop and start DAA-C01 exam preparation anytime and anywhere.

Snowflake SnowPro Advanced: Data Analyst Certification Exam Sample Questions (Q122-Q127):

NEW QUESTION # 122

You are tasked with building a near real-time data pipeline that ingests streaming data from Kafka into Snowflake. The data is semi-structured JSON. The goal is to transform and load only records with a 'status' field equal to 'active' into a table named 'ACTIVE

RECORDS'. Which approach provides the most efficient and scalable solution, minimizing latency and Snowflake resource consumption?

- A. Use a third-party ETL tool to consume the Kafka stream, filter for 'status' = 'active', and then load the data directly into 'ACTIVE RECORDS' using the Snowflake JDBC driver.
- **B. Implement a Snowpipe with a continuous ingest endpoint. Use a transformation defined within the COPY INTO statement to filter for 'status' = 'active' during the load process.**
- C. Ingest all data into a raw table using Snowpipe. Create a materialized view on top of the raw table, filtering for 'status' = 'active', and store the results in 'ACTIVE RECORDS'.
- D. Create an external table pointing to the Kafka topic. Use a Snowflake stream on the external table to track changes, and a task to transform and load 'active' records into 'ACTIVE RECORDS'.
- E. Use Snowflake's Kafka connector to load all data into a staging table, then create a scheduled task that runs every minute to transform and load the 'active' records into 'ACTIVE RECORDS'.

Answer: B

Explanation:

Snowpipe with a transformation in the COPY INTO statement offers the most efficient and scalable near real-time data ingestion solution. This approach allows filtering during the load process, avoiding the need to load all data and then filter later. Option A involves a scheduled task, which introduces latency. Option C's external table + stream approach is generally slower for continuous ingest. Option D adds the overhead and cost of a 3rd party ETL tool, while Option E's materialized view would work, it isn't the most efficient approach for the initial data filtering.

NEW QUESTION # 123

What are important factors to consider when creating tables and views in Snowflake? (Choose three).

- **A. Optimization for query performance**
- B. The color of the tables and views
- **C. Documentation and metadata management**
- **D. Data security and access controls**

Answer: A,C,D

NEW QUESTION # 124

A data analyst is building a dashboard in Tableau connected to Snowflake. The dashboard needs to display the average order value (AOV) for each product category over the last quarter. The Snowflake table 'ORDERS' contains columns: 'ORDER ID', 'ORDER DATE', 'PRODUCT CATEGORY', and 'ORDER VALUE'. The analyst wants to minimize data transfer from Snowflake to Tableau and optimize dashboard performance. Which of the following approaches is MOST efficient?

- A. Create a Snowflake stored procedure to calculate the AOV and call the stored procedure from Tableau using ODBC connection.
- **B. Use Tableau's Custom SQL feature to execute a query that calculates the AOV directly in Snowflake and retrieves only the aggregated results.**
- C. Schedule a daily task to export AOV data from Snowflake into a CSV file, and use Tableau to read from the CSV file.
- D. Extract all data from the 'ORDERS' table into Tableau and calculate the AOV within Tableau.
- **E. Create a Snowflake view that calculates the AOV and connect Tableau to the view.**

Answer: B,E

Explanation:

Both using Tableau's Custom SQL and creating a Snowflake view are efficient options. Custom SQL allows pushing the calculation to Snowflake, minimizing data transfer and leveraging Snowflake's compute power. Creating a view is also a very good approach since it pre-calculates and store the result set as a view. Extracting all data into Tableau is inefficient due to high data transfer. Using a CSV file adds complexity and latency. Stored procedures are typically not designed for direct dashboard interaction; they are better suited for data transformation pipelines.

NEW QUESTION # 125

A logistics company needs to determine which warehouses are within a 50km radius of a new distribution center. The warehouse

locations are stored in a table 'WAREHOUSES' with columns 'WAREHOUSE ID' (INT), (GEOGRAPHY) and the distribution center's location is stored in a variable of type GEOGRAPHY. Which query will efficiently identify all warehouses within the specified radius, returning the 'WAREHOUSE ID and distance in kilometers?

```

○ SELECT WAREHOUSE_ID, ST_DISTANCE(@distribution_center, LOCATION)/1000 AS DISTANCE_KM FROM WAREHOUSES WHERE ST_DWITHIN(@distribution_center, LOCATION, 50000) ORDER BY DISTANCE_KM;
○ SELECT WAREHOUSE_ID, ST_DISTANCE(LOCATION, @distribution_center)/1000 AS DISTANCE_KM FROM WAREHOUSES WHERE ST_DISTANCE(LOCATION, @distribution_center) <= 50000 ORDER BY DISTANCE_KM;
○ SELECT WAREHOUSE_ID, ST_DISTANCE(@distribution_center, LOCATION)/1000 AS DISTANCE_KM FROM WAREHOUSES WHERE ST_DWITHIN(LOCATION, @distribution_center, 50) ORDER BY DISTANCE_KM;
○ SELECT WAREHOUSE_ID, ST_DISTANCE(@distribution_center, LOCATION)/1000 AS DISTANCE_KM FROM WAREHOUSES WHERE ST_DISTANCE(@distribution_center, LOCATION) <= 50 ORDER BY DISTANCE_KM;
○ SELECT WAREHOUSE_ID, ST_DISTANCE(LOCATION, @distribution_center)/1000 AS DISTANCE_KM FROM WAREHOUSES WHERE ST_DWITHIN(LOCATION, @distribution_center, 50000) ORDER BY DISTANCE_KM;

```

- A. Option E
- B. Option A
- C. Option C
- D. Option B
- E. Option D

Answer: A

Explanation:

The correct answer uses 'ST DWITHIN' with the correct parameters and unit. 'ST DWITHIN(LOCATION, @distribution_center, 50000)' correctly filters the warehouses based on the 50km (50000 meters) radius. ST_DISTANCE calculates the distance in meters, which is then converted to kilometers by dividing by 1000. The warehouse location should come first followed by the distribution centre in the DWITHIN' Function.

NEW QUESTION # 126

In Snowsight, why is it significant to create various chart types (e.g., bar charts, scatter plots, heat grids) for data visualization?

- A. Snowsight doesn't support multiple chart types for visualization.
- B. Different chart types offer varied data representation for better analysis.
- C. It restricts users to specific chart types for simplicity.
- D. It limits data presentation options for complex datasets.

Answer: B

Explanation:

Diverse chart types offer varied data representation, facilitating better analysis in Snowsight.

NEW QUESTION # 127

.....

The three versions of our DAA-C01 training materials each have its own advantage. On the one hand, the software version can simulate the real DAA-C01 examination for all of the users in windows operation system. By actually simulating the real test environment. On the other hand, if you choose to use the software version, you can download our DAA-C01 ExamPrep only for Windows system. We strongly believe that the software version of our DAA-C01 study materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success.

New DAA-C01 Exam Vce: https://www.prep4pass.com/DAA-C01_exam-braindumps.html

Hurry to click Prep4pass New DAA-C01 Exam Vce to download our certification training materials, Snowflake DAA-C01 Book Free Including 365 days updates, It has been widely recognized that the DAA-C01 exam can better equip us with a newly gained personal skill, which is crucial to individual self-improvement in today's computer era, In addition to the comprehensive Snowflake DAA-C01 practice exams, our product also includes SnowPro Advanced: Data Analyst Certification Exam (DAA-C01) PDF questions developed by our team to help you get prepared in a short time.

To build successful smart mobile applications, developers DAA-C01 Reliable Braindumps Questions must understand the special characteristics of mobile devices and networks, Also, it seems poorly written;

Hurry to click Prep4pass to download our certification DAA-C01 Certification Exam Cost training materials, Including 365 days updates, It has been widely recognized that theDAA-C01 Exam can better equip us with a newly gained personal skill, which is crucial to individual self-improvement in today's computer era.

Authentic DAA-C01 exam materials: SnowPro Advanced: Data Analyst Certification Exam bring you the latest exam questions - Prep4pass

In addition to the comprehensive Snowflake DAA-C01 practice exams, our product also includes SnowPro Advanced: Data Analyst Certification Exam (DAA-C01) PDF questions developed by our team to help you get prepared in a short time.

Nowadays everyone is interested in DAA-C01 the field of Snowflake because it is growing rapidly day by day.
