Juniper JN0-460 Valid Exam Online | JN0-460 Exams Dumps

Our company is professional brand established for compiling JN0-460 exam materials for candidates, and we aim to help you to pass the examination as well as getting the related certification in a more efficient and easier way. Owing to the superior quality and reasonable price of our JN0-460 Exam Materials, our company has become a top-notch one in the international market. So you can totally depend on our JN0-460 exam torrents when you are preparing for the exam. If you want to be the next beneficiary, just hurry up to purchase.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which two statements are correct about using the Managed option as your Juniper Mist Wired Assurance solution? (Choose two.)

- A. No subscription is required.
- **B. All supported wired devices are fully managed by the Mist AI.**
- **C. A subscription is required.**
- D. All information in the Mist AI for supported wired devices is read-only.

Answer: B,C

Explanation:

When deploying Juniper Mist Wired Assurance in Managed mode, switches are fully integrated with Mist Cloud for configuration, monitoring, and AI-driven operations. Managed mode provides complete cloud-based management, meaning Mist AI handles configuration, templates, telemetry, and SLE tracking.

"In Managed mode, the switch configuration is fully managed by Mist Cloud. Administrators configure switches, templates, and policies directly through the Mist dashboard. A valid Wired Assurance subscription is required for Managed mode operation."

Option A: Incorrect - the "Monitor Only" mode is read-only, not Managed.

Option B: Correct - Managed mode requires a Wired Assurance subscription.

Option C: Incorrect - subscriptions are mandatory for Mist-managed devices.

Option D: Correct - in Managed mode, all supported EX switches are fully managed by Mist AI, including configuration and telemetry.

NEW QUESTION # 41

You want a Juniper cloud-ready switch to connect to the Juniper Mist Cloud.

In this scenario, which two statements are correct? (Choose two.)

- A. The switch must connect to the Juniper Agile Licensing Portal.
- **B. The switch must connect to a DNS server.**
- **C. The switch needs outbound connectivity to the Juniper Mist Cloud using either TCP port 2200 or port 443.**
- D. The switch must be running Junos OS version 23.2 or higher.

Answer: B,C

Explanation:

For Juniper cloud-ready EX Series switches (EX2300, EX3400, EX4100, EX4400, etc.) to successfully onboard to the Juniper Mist Cloud, specific connectivity requirements must be met:

"Cloud-managed EX switches require outbound connectivity to the Mist Cloud on TCP ports 2200 or 443.

Switches must also have access to DNS services to resolve cloud service URLs during onboarding." Option A: Incorrect - minimum version depends on switch model; older models may onboard with earlier releases (e.g., 20.x, 21.x).

Option B: Correct - outbound TCP 2200 or 443 connectivity is required for cloud registration.

Option C: Incorrect - switches connect directly to Mist Cloud, not the Agile Licensing Portal.

Option D: Correct - DNS resolution is mandatory for discovering Mist Cloud endpoints.

NEW QUESTION # 42

Which two steps must be performed when configuring Dynamic Port Configuration (DPC) in the Juniper Mist dashboard? (Choose two.)

- A. Select the Configuration Profile that client devices will be assigned to when matching the DPC.
- B. Define the polling frequency for DPC.
- C. Assign the ports on which you would like to enable Dynamic Configuration.
- D. Define the minimum Junos version.

Answer: A,C

Explanation:

Dynamic Port Configuration (DPC) in Juniper Mist enables automatic switch port configuration based on connected device type (e.g., phones, access points, printers). When setting up DPC, administrators define the matching criteria (such as MAC OUI or LLDP system name) and associate a Configuration Profile that determines which settings are applied.

"To configure Dynamic Port Configuration, you must assign the ports where DPC will run and select the configuration profile that defines how the port will be automatically configured when a matching device is detected." Option A: Correct - you must select the configuration profile to apply once the device type matches.

Option B: Incorrect - DPC does not use polling; it reacts to real-time LLDP/device discovery.

Option C: Correct - you must assign the ports on which DPC operates.

Option D: Incorrect - DPC is supported across EX models running compatible firmware but does not require manually setting a Junos version in configuration.

NEW QUESTION # 43

CRB (Centralized Routing Bridging) versus ERB (Edge Routing Bridging) is a consideration in:

- A. The physical layout of network devices
- B. Determining the color of network cables
- C. The architectural decision on where routing decisions are made
- D. Choosing network device brands

Answer: C

NEW QUESTION # 44

Dynamic port configuration helps in managing which aspect of network operations?

- A. Automatically adjusting port settings based on connected devices
- B. Ensuring ports are permanently disabled
- C. Static IP assignment
- D. Reducing the need for cable management

Answer: A

NEW QUESTION # 45

.....

The customer is God. JN0-460 learning dumps provide all customers with high quality after-sales service. After your payment is successful, we will dispatch a dedicated IT staff to provide online remote assistance for you to solve problems in the process of

download and installation. During your studies, JN0-460 study tool will provide you with efficient 24-hour online services. You can email us anytime, anywhere to ask any questions you have about our JN0-460 Study Tool. At the same time, our industry experts will continue to update and supplement JN0-460 test question according to changes in the exam outline, so that you can concentrate on completing the review of all exam content without having to pay attention to changes in the outside world.
