Are you considering taking the Salesforce Industries-CPQ-Developer exam? Passing this exam can be a challenge if you don't prepare with the right study material. Itcertmaster provides accurate and authentic Salesforce Industries-CPQ-Developer Exam Questions to help you prepare for the Salesforce Certified Industries CPQ Developer. Itcertmaster strives to provide quality information and a comfortable learning environment for Salesforce Industries-CPQ-Developer Exam candidates. The study material is available in two formats: Salesforce Industries-CPQ-Developer exam questions in pdf format and an online Salesforce Industries-CPQ-Developer practice test engine. Both formats are designed to help you clear the Salesforce Certified Industries CPQ Developer (Industries-CPQ-Developer) with ease.

Salesforce Industries-CPQ-Developer is a certification exam designed for developers who specialize in implementing Salesforce CPQ solutions for various industries. CPQ stands for Configure, Price, and Quote, which is a software solution that helps companies to automate their sales processes. Salesforce Industries-CPQ-Developer certification exam tests a candidate's knowledge and skills in configuring, developing, and deploying Salesforce CPQ solutions for different industries.

To pass the Salesforce Industries-CPQ-Developer exam, candidates must demonstrate proficiency in a range of topics related to Salesforce CPQ, including product configuration, pricing, quoting, and order management. They must also be knowledgeable about industry-specific use cases and best practices for implementing CPQ solutions in these contexts. In addition, candidates must have experience with Salesforce CPQ APIs and integrations, as well as an understanding of data modeling and security considerations. With this certification, professionals can demonstrate their expertise in Salesforce CPQ and their ability to implement customized solutions for specific industries.

If you encounter difficulties in installation or use of Industries-CPQ-Developer study materials, we will provide you with remote assistance from a dedicated expert.

Salesforce Certified Industries CPQ Developer Sample Questions (Q145-

Q150):

NEW QUESTION # 145

To price a promotion with a flat charge and ignore the rolled up total of the child product prices, you can:

Note: This question displayed answer options in random order when taking this Test.

- A. Limit the minimum amount of purchase on all child products to zero.
- B. Include in the promotion only child products with a base price of zero.
- C. Adjust the base price of all child products to zero and assign a charge to the parent product of the promotion.
- D. Go to the order and change the price list you are using.

Answer: C

NEW QUESTION # 146

Rules are triggered:

Note: This question displayed answer options in random order when taking this Test.

- A. When the "Validate Cart" button is clicked
- B. Based on user language settings
- C. When the interface is triggered
- D. Inalphabetical order
- E. Only when they are in a flow

Answer: A

Explanation:

Rules in Salesforce Industries CPQ are triggered when the "Validate Cart" button is clicked. This mechanism ensures that all the business rules and validations are enforced at a critical point in the transaction process, specifically when finalizing the configurations and selections in the cart.

* When the "Validate Cart" button is clicked (D): This trigger is crucial for ensuring that the cart meets all business, product, and regulatory requirements before proceeding to checkout or final approval, providing a safeguard against incorrect or incomplete configurations.

NEW QUESTION # 147

Which three ways can a developer filter the list of products when using the getCartproducts method?

Choose 3 answers

Using a value that is contrained witing a productattribute

- A. Using a value that will be matched exactly to a value in a Products field
- B. Using a value that is contained within a Product2 field
- C. Using a product category
- D. Using a context rule that qualifies a set of products

Answer: A,B,C

Explanation:

When using the getCartProducts method in Salesforce Industries CPQ to filter the list of products, developers have multiple criteria they can apply: A. Using a value that is contained within a Product2 field:

This allows filtering based on specific Salesforce fields within the Product2 object, such as name, SKU, or custom fields that store product attributes. B. Using a value that will be matched exactly to a value in a Product field: Enables precise filtering based on exact matches in product fields, ensuring that only products that meet the exact criteria are included. D. Using a product category: This method allows for filtering based on the category assigned to products, making it easier to group and display products that fall into specific, predefined categories, such as electronics, apparel, etc.

These filters help in efficiently narrowing down product lists based on specific attributes or classifications, enhancing the user experience by displaying relevant products to the customers.

NEW QUESTION # 148

Which are the primary user interface components that make up Vlocity Cart?

Note: This question displayed answer options in random order when taking this Test.

- A. Cart Header, Product Catalog, Cart Line Items, Total Bar
- **B. Cart Header, Product List, Cart Line Items, Total Bar**
- C. Product List, Cart Line Items, Total Bar, Configuration Modal Bar
- D. Cart Header, Product List, Cart Line Items, Pricing Window

Answer: B

Explanation:

The primary user interface components that make up the Vlocity Cart are:

* Cart Header, Product List, Cart Line Items, Total Bar (A): These components represent the main areas of interaction within the Vlocity Cart.

* Cart Header: Shows the overall information about the cart like customer details or context.

* Product List: Lists all the products available for selection.

* Cart Line Items: Displays the products that have been added to the cart along with their configurations.

* Total Bar: Provides a summary of the total costs, including any discounts or adjustments.

NEW QUESTION # 149

A developer has updated the price of a product but still sees the previous price in the Digital Commerce API response.

What job should the developer run to correct this?

- A. Migrate Cache Records job
- B. Delete Expired API Cache job
- C. Populate API Cache job
- **D. Regenerate Cached API Records job**

Answer: D
