Secure High Grades in Exam using Splunk SPLK-4001 Questions

Our SPLK-4001 training dumps are deemed as a highly genius invention so all exam candidates who choose our SPLK-4001 exam questions have analogous feeling that high quality our practice materials is different from other practice materials in the market. So our SPLK-4001 study braindumps are a valuable invest which cost only tens of dollars but will bring you permanent reward. So many our customers have benefited form our SPLK-4001 preparation quiz, so will you!

Splunk O11y Cloud Certified Metrics User Sample Questions (Q50-Q55):

NEW QUESTION # 50
When installing OpenTelemetry Collector, which error message is indicative that there is a misconfigured realm or access token?

- A. 404 (NOT FOUND)
- B. 401 (UNAUTHORIZED)
- C. 403 (NOT ALLOWED)
- D. 503 (SERVICE UNREACHABLE)

Answer: B

Explanation:

Explanation
The correct answer is C. 401 (UNAUTHORIZED).
According to the web search results, a 401 (UNAUTHORIZED) error message is indicative that there is a misconfigured realm or access token when installing OpenTelemetry Collector1. A 401 (UNAUTHORIZED) error message means that the request was not authorized by the server due to invalid credentials. A realm is a parameter that specifies the scope of protection for a resource, such as a Splunk Observability Cloud endpoint.
An access token is a credential that grants access to a resource, such as a Splunk Observability Cloud API. If the realm or the access token is misconfigured, the request to install OpenTelemetry Collector will be rejected by the server with a 401 (UNAUTHORIZED) error message.
Option A is incorrect because a 403 (NOT ALLOWED) error message is not indicative that there is a misconfigured realm or access token when installing OpenTelemetry Collector. A 403 (NOT ALLOWED) error message means that the request was authorized by the server but not allowed due to insufficient permissions. Option B is incorrect because a 404 (NOT FOUND) error message is not indicative that there is a misconfigured realm or access token when installing OpenTelemetry Collector. A 404 (NOT FOUND) error message means that the request was not found by the server due to an invalid URL or resource. Option D is incorrect because a 503 (SERVICE UNREACHABLE) error message is not indicative that there is a misconfigured realm or access token when installing OpenTelemetry Collector. A 503 (SERVICE UNREACHABLE) error message means that the server was unable to handle the request due to temporary overload or maintenance.

NEW QUESTION # 51
Which of the following statements are true about the datatable on a chart? (select all that apply)

- A. A user can choose which of the output dimensions are displayed.
- B. By default all dimensions on the output signal are displayed.
- C. Properties cannot be displayed.
- D. By default all metadata on the output signal are displayed.

Answer: A,B

NEW QUESTION # 52
An SRE came across an existing detector that is a good starting point for a detector they want to create. They clone the detector, update the metric, and add multiple new signals. As a result of the cloned detector, which of the following is true?

- A. The new signals will not be added to the original detector.
- B. You can only monitor one of the new signals.
- C. The new signals will be reflected in the original detector.
- D. The new signals will be reflected in the original chart.

Answer: A

Explanation:
Explanation
According to the Splunk O11y Cloud Certified Metrics User Track document1, cloning a detector creates a copy of the detector that you can modify without affecting the original detector. You can change the metric, filter, and signal settings of the cloned detector. However, the new signals that you add to the cloned detector will not be reflected in the original detector, nor in the original chart that the detector was based on. Therefore, option D is correct.
Option A is incorrect because the new signals will not be reflected in the original detector. Option B is incorrect because the new signals will not be reflected in the original chart. Option C is incorrect because you can monitor all of the new signals that you add to the cloned detector.

NEW QUESTION # 53
A customer wants to share a collection of charts with their entire SRE organization. What feature of Splunk Observability Cloud makes this possible?

- A. Public dashboards
- B. Shared charts
- C. Dashboard groups
- D. Chart exporter

Answer: C

Explanation:
Explanation
According to the web search results, dashboard groups are a feature of Splunk Observability Cloud that allows you to organize and share dashboards with other users in your organization1. You can create dashboard groups based on different criteria, such as service, team, role, or topic. You can also set permissions for each dashboard group, such as who can view, edit, or manage the dashboards in the group. Dashboard groups make it possible to share a collection of charts with your entire SRE organization, or any other group of users that you want to collaborate with.

NEW QUESTION # 54
Which analytic function can be used to discover peak page visits for a site over the last day?

- A. Maximum: Aggregation (Id)
- B. Lag: (24h)
- C. Maximum: Transformation (24h)
- D. Count: (Id)

Answer: C

Explanation:
According to the Splunk Observability Cloud documentation1, the maximum function is an analytic function that returns the highest value of a metric or a dimension over a specified time interval. The maximum function can be used as a transformation or an aggregation. A transformation applies the function to each metric time series (MTS) individually, while an aggregation applies the function to all MTS and returns a single value. For example, to discover the peak page visits for a site over the last day, you can use the following SignalFlow code:
maximum(24h, counters("page.visits"))
This will return the highest value of the page.visits counter metric for each MTS over the last 24 hours. You can then use a chart to visualize the results and identify the peak page visits for each MTS.

NEW QUESTION # 55
......

Maybe you have desired the SPLK-4001 certification for a long time but don't have time or good methods to study. Maybe you always thought study was too boring for you. Our SPLK-4001 study materials will change your mind. With our products, you will soon feel the happiness of study. Thanks to our diligent experts, wonderful study tools are invented for you to pass the SPLK-4001 Exam. You can try the demos first and find that you just can't stop studying if you use our SPLK-4001 training guide.
