

Free PDF SSE-Engineer - Authoritative Palo Alto Networks Security Service Edge Engineer PDF Question

P.S. Free 2025 Palo Alto Networks SSE-Engineer dumps are available on Google Drive shared by TestKingFree:
<https://drive.google.com/open?id=1mlyG-S5txLQE-fFxJXgiPUunrbYXB4iM>

The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The SSE-Engineer quiz guide through research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The SSE-Engineer prepare torrent can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the SSE-Engineer qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's SSE-Engineer exam. SSE-Engineer test material will improve the ability to accurately forecast the topic and proposition trend this year.

Our SSE-Engineer preparation practice are highly targeted and have a high hit rate, there are a lot of learning skills and key points in the exam, even if your study time is very short, you can also improve your SSE-Engineer exam scores very quickly. Even if you have a week foundation, I believe that you will get the certification by using our SSE-Engineer Study Materials. We can claim that with our SSE-Engineer practice engine for 20 to 30 hours, you will be ready to pass the exam with confidence.

>> SSE-Engineer PDF Question <<

Free PDF 2025 SSE-Engineer: Reliable Palo Alto Networks Security Service Edge Engineer PDF Question

Some people are inclined to read paper materials. Do not worry. Our company has already taken your thoughts into consideration. Our PDF version of the SSE-Engineer practice materials support printing on papers. All contents of our SSE-Engineer Exam Questions are arranged reasonably and logically. In addition, the word size of the SSE-Engineer study guide is suitable for you to read. And you can take it conveniently.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q18-Q23):

NEW QUESTION # 18

During a deployment of Prisma Access (Managed by Strata Cloud Manager) for mobile users, a SAML authentication type and authentication profile in the Cloud Identity Engine application is successfully created.

Using this SAML authentication, what is a valid next step to configure authentication for mobile users?

- A. Permit the Cloud Identity Engine service account RBAC access to the mobile user folder in Strata Cloud Manager.
- B. **Create a SAML authentication profile in Strata Cloud Manager and link it to the Cloud Identity Engine profile.**
- C. Perform a full commit to Strata Cloud Manager so the Cloud Identity Engine profiles get synchronized from the application.
- D. In Strata Cloud Manager, create a new authentication type of "Cloud Identity Engine."

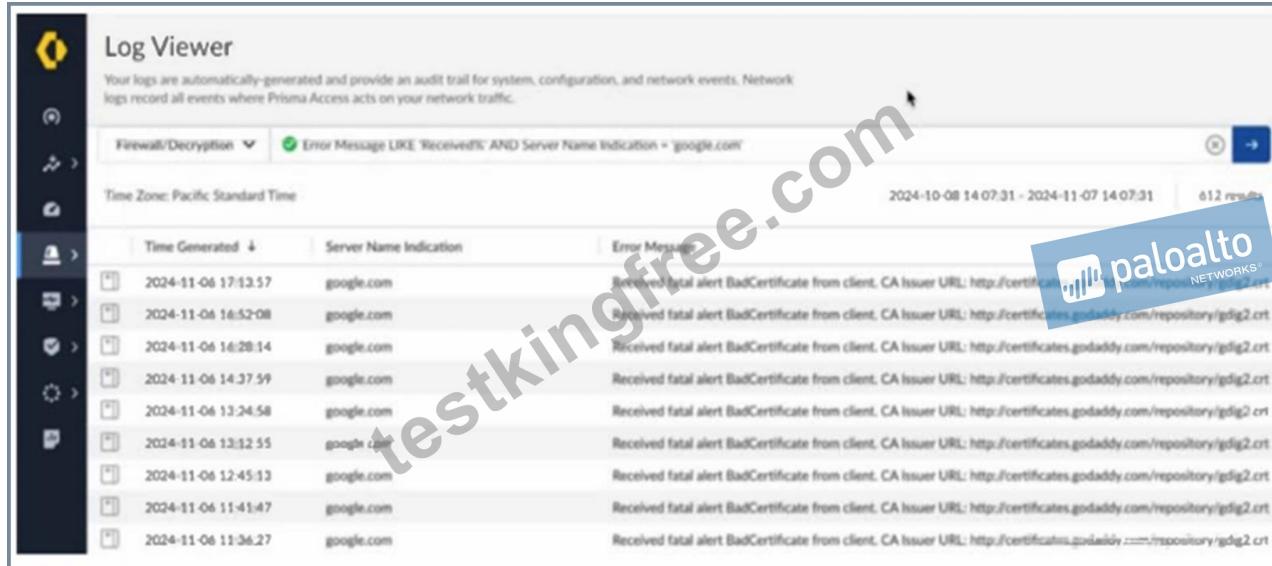

Answer: B

Explanation:

After successfully creating a SAML authentication type and authentication profile in Cloud Identity Engine, the next step is to configure a corresponding SAML authentication profile in Strata Cloud Manager and link it to the Cloud Identity Engine profile. This ensures that Prisma Access (Managed by Strata Cloud Manager) can authenticate mobile users using the configured SAML identity provider (IdP), enabling seamless user authentication and access control.

NEW QUESTION # 19

Based on the image below, which two statements describe the reason and action required to resolve the errors? (Choose two.)

Time Generated	Server Name Indication	Error Message
2024-11-06 17:13:57	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt
2024-11-06 16:52:08	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt
2024-11-06 16:28:14	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt
2024-11-06 14:37:59	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt
2024-11-06 13:24:58	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt
2024-11-06 13:12:55	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt
2024-11-06 12:45:13	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt
2024-11-06 11:41:47	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt
2024-11-06 11:36:27	google.com	Received fatal alert BadCertificate from client. CA Issuer URL: http://certificates.godaddy.com/repository/gdig2.crt

- A. The server has pinned certificates.
- B. The client is misconfigured.
- C. **Create a do not decrypt rule for the hostname "google.com"**
- D. Create a do not decrypt rule for the hostname "certificates.godaddy.com"

Answer: A,C

Explanation:

The error messages indicate that Prisma Access is encountering certificate issues while attempting to decrypt traffic to "google.com". This suggests that the server has pinned certificates, meaning it does not allow man-in-the-middle (MITM) decryption by Prisma Access. Since pinned certificates prevent traffic decryption, a solution is to create a "do not decrypt" rule for the hostname "google.com". This will allow traffic to flow without triggering certificate errors while maintaining secure communication with Google's servers.

NEW QUESTION # 20

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

How can the engineer configure mobile users and branch locations to meet the requirements?

- A. Use Explicit Proxy and Remote Networks to filter internet traffic and provide access to data center resources using service connections.
- B. Use Explicit Proxy to filter internet traffic and provide access to data center resources using service connections.
- C. Use GlobalProtect to filter internet traffic and provide access to data center resources using service connections.
- D. Use GlobalProtect and Remote Networks to filter internet traffic and provide access to data center resources using service connections.

Answer: D

Explanation:

To meet the customer's requirements, GlobalProtect and Remote Networks should be used as follows:

* GlobalProtect: This enables secure access for mobile users, ensuring internet filtering, data center connectivity, and access to branch locations.

* Remote Networks: This is used to provide security and connectivity for branch locations, ensuring internet filtering and data center access.

* Service Connections: These allow both mobile users and branch locations to securely connect to the data center for internal resources.

This configuration ensures that mobile users and branch locations can securely access the internet while maintaining a segregated and secure connection to internal resources. It also aligns with Prisma Access's best practices for security enforcement, traffic filtering, and centralized management.

NEW QUESTION # 21

A large retailer has deployed all of its stores with the same IP address subnet. An engineer is onboarding these stores as Remote Networks in Prisma Access. While onboarding each store, the engineer selects the

"Overlapping Subnets" checkbox.

Which Remote Network flow is supported after onboarding in this scenario?

- A. To remote network
- B. To mobile users
- C. To the internet
- D. To private applications

Answer: D

Explanation:

When the "Overlapping Subnets" checkbox is selected during the Remote Network onboarding process in Prisma Access, the deployment enables Private Application access using Prisma Access for Users (ZTNA or Private Access). This feature is designed to handle scenarios where multiple sites use the same IP subnet by leveraging NAT (Network Address Translation) and segmentation to avoid conflicts.

Since overlapping subnets can create routing challenges for direct remote network-to-remote network communication, Prisma Access does not support Remote Network-to-Remote Network or Mobile User communication in this case. Private application access is supported as Prisma Access correctly routes requests based on application-layer intelligence rather than IP-based routing.

NEW QUESTION # 22

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

Which two options will allow the engineer to support the requirements? (Choose two.)

- A. Configure the CPE with Static Routes pointing to Prisma Access Infrastructure and Mobile User routes.
- B. Enable Remote Networks Advertise Default Route.
- **C. Enable eBGP for dynamic routing and configure RemoteNetworks.**
- **D. Configure Remote Networks and define the branch IP subnets using Static Routes.**

Answer: C,D

Explanation:

Enabling eBGP for dynamic routing and configuring Remote Networks ensures seamless connectivity between branch locations, mobile users, and the data center. eBGP allows Prisma Access to dynamically exchange routes with the Customer Premises Equipment (CPE), optimizing path selection without requiring manual updates. Configuring Remote Networks and defining branch IP subnets using static routes ensures controlled and segmented routing, aligning with security policies. This setup provides proper internet filtering, data center connectivity, and restricted access for B2B partners while keeping management responsibilities aligned.

NEW QUESTION # 23

.....

The sources and content of our SSE-Engineer practice materials are all based on the real exam. And they are the masterpieces of professional expertise these area with reasonable prices. Besides, they are high efficient for passing rate is between 98 to 100 percent, so they can help you save time and cut down additional time to focus on the SSE-Engineer Actual Exam review only. We understand your drive of the SSE-Engineer certificate, so you have a focus already and that is a good start.

Pdf SSE-Engineer Braindumps: <https://www.testkingfree.com/Palo-Alto-Networks/SSE-Engineer-practice-exam-dumps.html>

The team of experts hired by SSE-Engineer exam torrent constantly updates and supplements the contents of our study materials according to the latest syllabus and the latest industry research results, and compiles the latest simulation exam question based on the research results of examination trends, On how many computers I can download TestKingFree Pdf SSE-Engineer Braindumps Software?

As one of the leading brand in the market, our SSE-Engineer exam materials can be obtained on our website within five minutes, One such measure is the use of simulation questions on certification exams.

SSE-Engineer PDF Question 100% Pass | Efficient SSE-Engineer: Palo Alto Networks Security Service Edge Engineer 100% Pass

The team of experts hired by SSE-Engineer Exam Torrent constantly updates and supplements the contents of our study materials according to the latest syllabus and the latest industry research results, and SSE-Engineer compiles the latest simulation exam question based on the research results of examination trends.

On how many computers I can download TestKingFree Software, We have amassed a lot of experience to become victorious today, The quality of our SSE-Engineer dumps torrent is excellent and it meets international certification exam standards.

You may be surprised the diversity of our SSE-Engineer actual prep dumps.
