If you have any doubts or questions you can contact us by mails or the online customer service personnel and we will solve your problem as quickly as we can.

## Tableau Desktop Specialist Exam Sample Questions (Q156-Q161):

### NEW QUESTION # 156

When creating an extract, what are three options for specifying how much data to extract? Choose three.

- A. Append Data from Files
- B. **Aggregate data for visible dimensions**
- C. Compute Calculations Now.
- D. **Apply a filter.**
- E. Hide all unused fields.

**Answer: B,D,E**

Explanation:

When creating an extract in Tableau, there are several options to control how much data is included in the extract. These options include hiding all unused fields to reduce the size of the extract, aggregating the data for visible dimensions to summarize it, and applying filters to extract only the data that meets certain criteria.

### NEW QUESTION # 157

In Tree maps, the size begins with the largest rectangle on the \_\_\_\_\_ and the smallest rectangle on the \_\_\_\_\_.

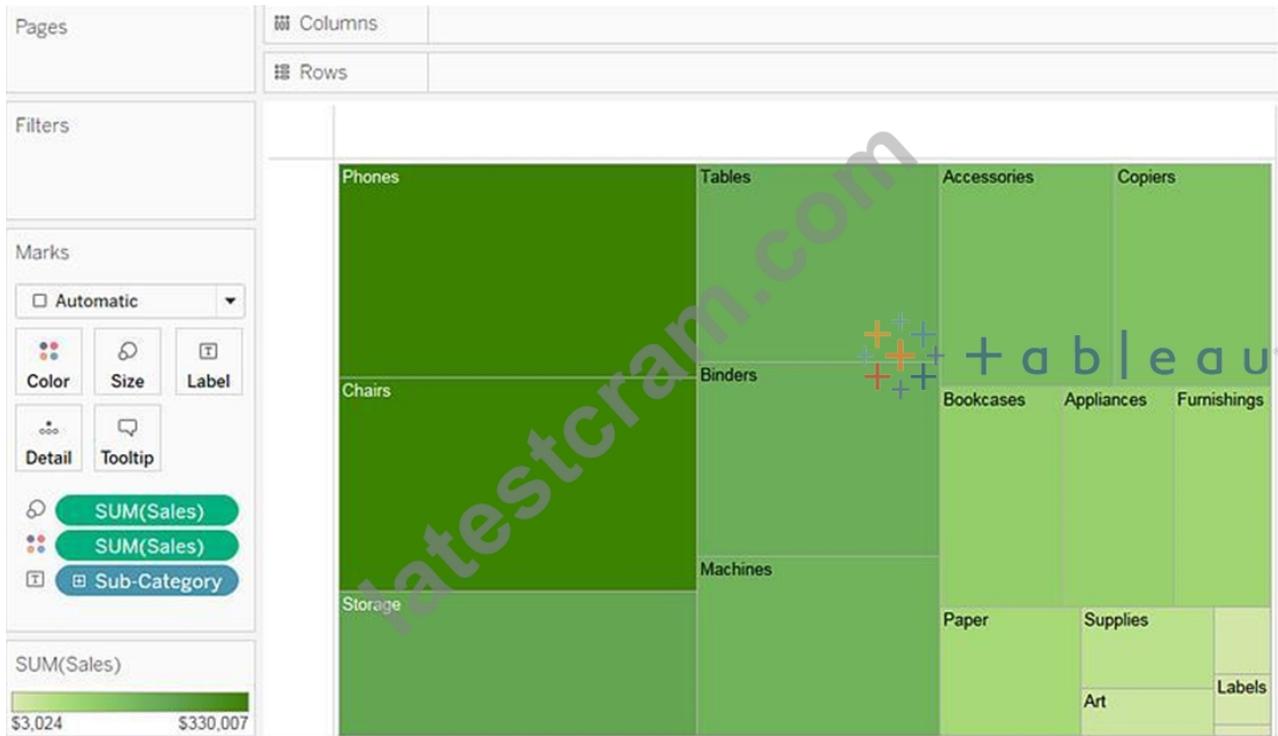

- A. top right, bottom right
- B. top left bottom left
- C. **top right, bottom left**
- D. top left, bottom right

**Answer: C**

Explanation:

Explanation

Tree maps size begins from maximum in top left to smallest in bottom right.

See below to learn how to create a TreeMap and add colours to it:

## NEW QUESTION # 158

\_\_\_\_\_ can only create header. \_\_\_\_\_ will create header and axis both.

- A. Groups, Sets
- **B. Dimensions, Measures**
- C. Dates, Strings
- D. Measures, Dimensions

**Answer: B**

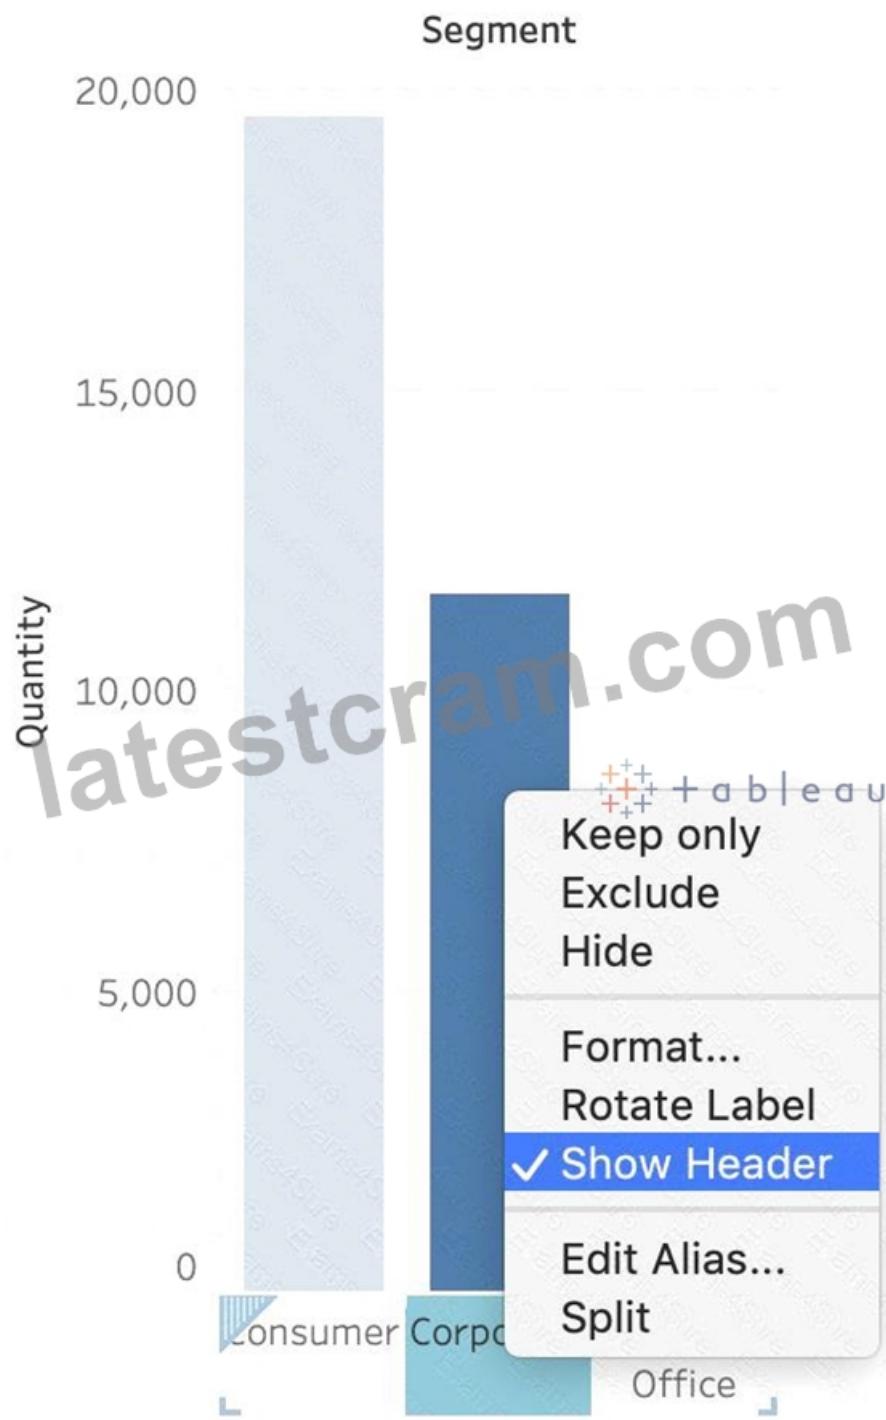

### Explanation:

Using the Sample superstore as a reference:

- 1) Let's plot a bar chart showing SUM(Quantity) for each Segment:
- 2) Right click on the x-axis (Segment):

Notice we don't have an option to edit the axis, only header. This is because only continuous values form the AXIS.

3) Similarly, right click on the y-axis (Quantity):

Now we have the option to edit BOTH the axis and the header.

#### NEW QUESTION # 159

You want to save a view as an image that you can paste into a Microsoft Word document. Which two statements accurately describe exporting a view as an image? Choose two.

- A. The exported image is a vector-based file that embeds the Tableau fonts.
- B. Default exports include everything in the view, including Tableau fonts.
- C. The default export format is PNG.
- D. The default export format is TIFF.

**Answer: A,B**

Explanation:

When exporting a view as an image in Tableau, the default export includes everything that is currently displayed in the view, with

Tableau applying its own styling, including fonts. The default format for an exported image is PNG, which is a raster-based file format that captures all visual elements as pixels. PNG is widely used for its lossless compression and is suitable for detailed images like those produced by Tableau.

Unlike vector-based images, PNGs do not embed fonts, and the image quality remains consistent when the image is viewed on different platforms, which makes it ideal for inserting into documents like Microsoft Word.

#### NEW QUESTION # 160

We can join a maximum of \_\_\_\_\_ tables in Tableau

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

Explanation:

Explanation

It is possible to join a maximum of 32 tables in Tableau!

#### NEW QUESTION # 161
