

Free PDF The Best AZ-120 - Planning and Administering Microsoft Azure for SAP Workloads Real Dumps

2025 Latest VCETorrent AZ-120 PDF Dumps and AZ-120 Exam Engine Free Share: <https://drive.google.com/open?id=14uZ7RA8hjbM9WzV3wfhSeHFta348EZ68>

Improve your professional ability with our AZ-120 certification. Getting qualified by the Microsoft certification will position you for better job opportunities and higher salary. Now, let's start your preparation with AZ-120 training material. The AZ-120 practice pdf offered by VCETorrent latest pdf is the latest and valid study material which suitable for all of you. The AZ-120 free demo is especially for you to free download for try before you buy. You can get a lot from the AZ-120 simulate exam dumps and get your AZ-120 certification easily.

We all know that in the fiercely competitive IT industry, having some IT authentication certificates is very necessary. IT authentication certificate is a best proof for your IT professional knowledge and experience. Microsoft AZ-120 is a very important certification exam in the IT industry and passing Microsoft certification AZ-120 exam is very difficult. But in order to let the job position to improve spending some money to choose a good training institution to help you pass the exam is worthwhile. VCETorrent's latest training material about Microsoft Certification AZ-120 Exam have 95% similarity with the real test. If you use VCETorrent's training program, you can 100% pass the exam. If you fail the exam, we will give a full refund to you.

>> AZ-120 Real Dumps <<

1 year Of Free Microsoft AZ-120 Exam Questions Updates

Our goal is to help you save both time and money by providing you with the AZ-120 updated exam questions. Keep up the good work on preparing for the Microsoft AZ-120 test with our actual Microsoft AZ-120 Dumps. We are so confident that you will succeed on the first try that we will return your money according to the terms and conditions if you do not.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q121-Q126):

NEW QUESTION # 121

You have an SAP production landscape on Azure that contains the virtual machines shown in the following table.

Name	Subnet	Network security group (NSG)	Route table
VM1	Subnet1	VM1-NSG	None
VM2	Subnet1	VM2-NSG	None

VM1 cannot connect to an employee self-service application hosted on VM2.

You need to identify what is causing the issue.

Which two options in Azure Network Watcher should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point

- A. Connection monitor
- B. Network Performance Monitor
- C. Connection troubleshoot

- D. IP flow verify

Answer: C,D

NEW QUESTION # 122

You have an SAP environment on Azure.

our on-premises network connects to Azure by using a site-to-site VPN connection.

You need to alert technical support if the network bandwidth usage between the on-premises network and Azure exceeds 900 Mbps 10 minutes.

What should you use?

- A. Azure Enhanced Monitoring for SAP
- B. Azure Monitor
- C. Azure Network Watcher
- D. NIPING

Answer: B

Explanation:

You set up alerts on Azure VPN Gateway metrics. Azure Monitor provides the ability to set up alerts for Azure resources. You can set up alerts for virtual network gateways of the "VPN" type.

Metric: AverageBandwidth: Average combined bandwidth utilization of all site-to-site connections on the gateway.

Reference:

<https://docs.microsoft.com/bs-latn-ba/azure/vpn-gateway/vpn-gateway-howto-setup-alerts-virtual-network-gatew>

NEW QUESTION # 123

You plan to deploy multiple SAP HANA virtual machines to Azure by using an Azure Resource Manager template.

How should you configure Accelerated Networking and Write Accelerator in the template? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values

"false",

"none",

"true",

      },
      "osDisk": {
        "createOption": "FromImage"
      },
      "dataDisks": [
        {
          "lun": 7,
          "name": "[concat(parameters('vmName'), '-log')]",
          "createOption": "Empty",
          "writeAcceleratorEnabled": "true",
          "diskSizeGB": 2048,
          "managedDisk": {
            "storageAccountType": "Premium_LRS"
          }
        }
      ]
    }
  }
},
{
  "networkProfile": {
    "networkInterfaces": [
      {
        "id": "[resourceId('Microsoft.Network/networkInterfaces', concat(parameters('vmName'), '-static'))]"
      }
    ]
  }
}
}
```

Explanation:

Box 1: true

enableAcceleratedNetworking: If the network interface is accelerated networking enabled.

To further reduce network latency between Azure VMs, we [Microsoft] recommend that you choose Azure Accelerated Networking. Use it when you deploy Azure VMs for an SAP workload, especially for the SAP application layer and the SAP DBMS layer.

Box 2: true

Write Accelerator should be used for the volumes that contain the transaction log or redo logs of a DBMS. It is not recommended to use Write Accelerator for the data volumes of a DBMS as the feature has been optimized to be used against log disks.

NEW QUESTION # 124

You deploy an Azure Internal load balancer.

You deploy a node of an SAP NetWeaver 7.4 ABAP system named SP1.

You plan to deploy a second node.

You need to verify that the health probe port is configured for the cluster. The cluster IP address resource name is SAP SP1 IP. How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Get-ClusterResource

Example:

```
Get-ClusterResource -Name $SAPIResourceName | Get-ClusterParameter
```

```
Write-Output ""
```

```
Write-Output "Current probe port property of the SAP cluster resource '$SAPIResourceName' is '$OldProbePort'."
```

```
Write-Output ""
```

```
Write-Output "Setting the new probe port property of the SAP cluster resource '$SAPIResourceName' to '$ProbePort' ..."
```

```
Write-Output ""
```

Box 2: Get-ClusterParameter

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/workloads/sap/sap-high-availability-installation- wsfc-shared-disk>

NEW QUESTION # 125

You have an on-premises SAP environment. Application servers run on SUSE Linux Enterprise Server (SLES) servers. Databases run on SLES servers that have Oracle installed.

You need to recommend a solution to migrate the environment to Azure. The solution must use currently deployed technologies whenever possible and support high availability.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Application server operating system: ▼

Oracle Linux
SLES
Windows Server 2016

Database server operating system: ▼

Oracle Linux
SLES
Windows Server 2016

Database platform: ▼

Azure SQL Database
Microsoft SQL Server
Oracle
SAP HANA

Answer:

Explanation:

Application server operating system: ▼

Oracle Linux
SLES
Windows Server 2016

Database server operating system: ▼

Oracle Linux
SLES
Windows Server 2016

Database platform: ▼

Azure SQL Database
Microsoft SQL Server
Oracle
SAP HANA

NEW QUESTION # 126

.....

AZ-120 practice exam will provide you with wholehearted service throughout your entire learning process. This means that unlike other products, the end of your payment means the end of the entire transaction our Microsoft AZ-120 Learning Materials will provide you with perfect services until you have successfully passed the Planning and Administering Microsoft Azure for SAP

Workloads AZ-120 exam.
