

Free PDF The Best CMAA - Construction-Manager Book Pdf

Will you feel that the product you have brought is not suitable for you? One trait of our Construction-Manager exam prepare is that you can freely download a demo to have a try. Because there are excellent free trial services provided by our Construction-Manager exam guides, our products will provide three demos that specially designed to help you pick the one you are satisfied. We will inform you that the Construction-Manager Study Materials should be updated and send you the latest version in a year after your payment. We will also provide some discount for your updating after a year if you are satisfied with our Construction-Manager exam prepare.

The product we provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the Construction-Manager study materials by the method which is convenient for you. They check the update every day, and we can guarantee that you can get a free update service from the date of purchase. Once you have any questions and doubts about the Construction-Manager Exam Questions we will provide you with our customer service before or after the sale, you can contact us if you have question or doubt about our exam materials and the professional personnel can help you solve your issue about using Construction-Manager study materials.

Pass Construction-Manager Exam with CMAA's Exam Questions and Achieve 100% Success on Your First Try

Not only our CMAA Construction-Manager study guide has the advantage of high-quality, but also has reasonable prices that are accessible for every one of you. So it is incumbent upon us to support you. On the other side, we know the consumers are vulnerable for many exam candidates are susceptible to ads that boost about CMAA Construction-Manager skills their practice with low quality which may confuse exam candidates like you, so we are trying hard to promote our high quality Construction-Manager study guide to more people.

CMAA Certified Construction Manager (CCM) Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which delivery method, if not properly coordinated, introduces the strong possibility of work scope being duplicated or even omitted?

- A. Multi-Prime
- B. Design Build (DB)
- C. Design-Bid-Build (DBB)
- D. CM at Risk (CMAR)

Answer: A

Explanation:

The CMAA Standards of Practice explain that Multi-Prime delivery involves multiple contractors each working under separate contracts directly with the Owner. The absence of a single point of contractual coordination can result in scope overlaps or gaps if the CM or Owner does not maintain tight coordination among all primes.

As noted in the SOP:

"The potential for duplication or omission of work scope is greatest in a multi-prime contracting arrangement, where the responsibility for interfaces between contracts must be clearly defined and managed by the Construction Manager." This risk is unique to the Multi-Prime method because, unlike CMAR or Design-Build, there is no single entity responsible for all construction coordination.

CMAA Study Guide, Project Management Domain, Objective 2.1.

NEW QUESTION # 38

A program management function that promotes the efficient use of completed projects and/or parts of completed projects to maximize the owner's return on investment is called

- A. resource-leveling.
- B. contract packaging.
- C. project financing.
- D. project phasing.

Answer: D

Explanation:

The CMAA Standards of Practice, Chapter 8 - Program Management, defines Project Phasing as a method used to coordinate the sequence and timing of multiple related projects within a program to achieve efficiency and maximize the owner's investment.

CMAA states:

"Phasing is the process of organizing projects or portions of projects to take advantage of existing facilities, expedite beneficial use, or improve overall program efficiency." Project phasing can include early occupancy of completed sections, overlapping design and construction phases, or reusing completed infrastructure to support ongoing work. This strategy enhances financial performance and operational benefit for the owner.

"Project Phasing and Sequencing," pp. 83-85.

CMAA CM Study Guide, Program Management Domain, Objective 8.2: "Implement phasing strategies to optimize program efficiency and ROI."

NEW QUESTION # 39

An agency CM is representing the public owner of a large, complex project with numerous site challenges.

The owner has received numerous differing site condition claims on previous projects on this site. The agency CM has reviewed the bid documents and believes the site challenges are clearly and sufficiently detailed for bidders. This is a design-bid-build, lump sum procurement. The apparent low bid is more than 10% lower than the next lowest bid, and the owner is very concerned that the

apparent low bidder has not included the cost of mitigating the site challenges in its bid. What should the agency CM do?

- A. Ask the designer to verify that the technical specifications describing the site challenges in sufficient detail.
- B. Conduct a post-bid conference to see if all bidders included the cost of mitigating the site challenges in their bids.
- C. Conduct a post-bid interview with the apparent low bidder to determine if the bidder has a clear understanding of the site challenges.
- D. Make the recommendation to the owner to reject all bids and re-advertise the project.

Answer: A

Explanation:

According to CMAA's recommended Owners Risk Reduction Techniques (when using a CM for owner's risk control), one of the CM's roles is to help the owner ensure clarity of site conditions and contract documents especially when prior history on the site includes claims for differing site conditions. The CM should engage the design team to verify whether the contract documents properly capture the known site risks in adequate detail before awarding a bid.

In a design-bid-build, lump sum contract, the contractors rely on the documents and specifications as the basis of their bids. If the apparent low bid is significantly below others (e.g., >10% lower), that discrepancy raises suspicion that the low bidder may have omitted or under-priced site risk mitigation. The CM should not directly interrogate bidders or conduct post-bid interviews that might create unfairness or violate procurement rules. Rather, the correct approach is for the CM to consult with the designer to confirm whether the bid documents adequately and clearly described the site challenges. If deficiencies or ambiguities are found, the owner may need to issue clarifications, addenda, or consider re-advertising.

Thus, the prudent and contract-compliant first step is: A. Ask the designer to verify that the technical specifications describing the site challenges in sufficient detail.

NEW QUESTION # 40

What are the essential components of the Risk Management process?

- A. Communicating and reporting, tracking, mitigation, resolution
- B. Avoiding, tracking, mitigation, transferring
- C. Communicating and reporting, assessing, mitigation, tracking
- D. Avoiding, mitigating, transferring, accepting

Answer: D

Explanation:

According to the CMAA Construction Management Standards of Practice, Chapter 10 - Risk Management, the fundamental components of the risk management process include:

Avoidance- Eliminating the risk entirely by altering plans or scope.

Mitigation- Reducing the likelihood or impact of a risk.

Transfer- Shifting risk responsibility to another party, typically through insurance or contracts.

Acceptance- Recognizing the risk and planning to manage its consequences.

CMAA defines risk management as:

"A systematic process of identifying, analyzing, responding to, and monitoring risks to minimize their impact on project objectives."

These four response strategies-avoid, mitigate, transfer, and accept-are universally recognized as the essential framework for construction risk management.

References:

CMAA Construction Management Standards of Practice, Chapter 10 - Risk Management, Section: "Risk Identification and Response," pp. 96-99.

CMAA CM Study Guide, Risk Management Domain, Objective 10.3: "Develop and apply risk response strategies: avoid, mitigate, transfer, and accept."

NEW QUESTION # 41

Which schedule process determines the earliest times that schedule activities can start and Finish, and the total project duration?

- A. Schedule Update
- B. Forward Pass
- C. Master Schedule Review
- D. Backward Pass

Answer: B

Explanation:

In the CMAA Construction Management Standards of Practice (SOP), under Chapter 4 - Time Management, the process known as the Forward Pass is defined as the method used in Critical Path Method (CPM) scheduling to determine the earliest possible start (ES) and earliest possible finish (EF) dates for all schedule activities. It also calculates the total project duration by progressing through the schedule network from the project start date to the project completion date.

The CMAA explains that:

"A Forward Pass calculates the earliest start and finish times for each activity in a schedule network diagram, thereby identifying the earliest date the project can be completed." This calculation is essential for establishing the critical path-the sequence of activities that determines the project's overall duration. The Forward Pass is always followed by the Backward Pass, which calculates the latest allowable start and finish times to identify float.

References (CMAA Construction Manager Documents / Study Guide):

CMAA Construction Management Standards of Practice, Chapter 4 - Time Management, Section: "Schedule Development and Analysis," pp. 47-50.

CMAA CM Study Guide, Time Management Domain, Objective 4.3: "Perform forward and backward pass calculations to determine the critical path."

NEW QUESTION # 42

.....

Our experts who compiled the Construction-Manager practice materials are assiduously over so many years in this field. They add the new questions into the Construction-Manager study guide once the updates come in the market, so they recompose the contents according to the syllabus and the trend being relentless in recent years. With so accurate information of our Construction-Manager learning questions, we can confirm your success by your first attempt.
