Whether you are just starting out in your career or are a seasoned IT professional, the HP HPE2-T37 Exam is a valuable investment in your future.

HP Using HPE OneView Sample Questions (Q111-Q116):

NEW QUESTION # 111

Your customer wants to configure Quality of Service (QoS) on HPE Synergy frames equipped with HPE Virtual Connect SE 700Gb F32 Modules for Synergy. Which HPE OneView object can be used to define QoS settings?

- A. Enclosure group
- B. Fabric manager
- C. Logical interconnect group
- D. Logical enclosure

Answer: C

Explanation:

To configure Quality of Service (QoS) on HPE Synergy frames equipped with HPE Virtual Connect SE

700Gb F32 Modules, you use the Logical Interconnect Group in HPE OneView. The Logical Interconnect Group (LIG) serves as a template that defines the networking configurations for interconnect modules, including QoS settings, network uplinks, and stacking.

- * Option B (Correct): QoS settings are defined within the Logical Interconnect Group, ensuring consistent network configurations across multiple enclosures.
- * Option A: Fabric Manager is not an HPE OneView object used for this purpose.
- * Option C: Logical Enclosure represents a collection of enclosures but does not define QoS settings.
- * Option D: Enclosure Group defines the physical configuration but not the network-specific QoS settings.

NEW QUESTION #112

Click the option that will prevent the appliance from sending any email notifications or forwarding any SNMP traps that are related to the server hardware.

Answer:

Explanation:

NEW QUESTION #113

How is HPE Storage Integration Pack for VMware vCenter deployed?

- A. It is deployed as a virtual appliance to the supported hypervisor.
- B. It is deployed as an agent on any supported and managed array.
- C. It is deployed as an application on Windows system running in the virtual machine.
- D. It is the part of the standard HPE OneView appliance, but it must be activated.

Answer: A

Explanation:

The HPE Storage Integration Pack for VMware vCenter is deployed as a virtual appliance to the supported hypervisor. This means it is delivered as a pre-configured virtual machine image that you import into your VMware environment. Deploying it as a virtual appliance simplifies installation and integration, allowing for seamless management of HPE storage resources directly within VMware vCenter.

NEW QUESTION #114

Refer to the exhibit.

After adding SAN Manager to HPE OneView. you noticed that all SANs are in the discovered state. How will this affect HPE OneView storage management capabilities?

- A. Auto-zoning functionality will not work until SANs are associated with networks.
- B. Volume provisioning will only work for arrays that ate accessible through these SANs.

- C. Snapshot functionality will be limited only to the volumes not using these SANs.
- D. Volume presentation through server profile will work with the discovered state.

Answer: D

NEW QUESTION #115

You plan to update HPE OneVew to the latest version What Should you do Mora starting HPE OneView update?

- A. Create a support dump for the appliance and for all managed logical interconnects
- B. Disable HPE Remote Support at toe HPE OneView appliance level
- C. Run the Update Readiness checker tool to evaluate HPE OneView health status
- D. Put all servers managed through HPE OneView to maintenance state

Answer: C
