By focusing on how to help you more effectively, we encourage exam candidates to buy our UiPath-TAEPv1 study braindumps with high passing rate up to 98 to 100 percent all these years. Our experts designed three versions for you rather than simply congregate points of questions into UiPath-TAEPv1 Real Questions. Efforts conducted in an effort to relieve you of any losses or stress. So our activities are not just about profitable transactions to occur but enable exam candidates win this exam with the least time and get the most useful contents.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.
Topic 2	• Environments, Applications, and • or Tools: This section of the exam measures the skills of RPA Developers and evaluates comfort with various tools and environments commonly used with UiPath. These include Microsoft Excel, JSON, XML, ERPs, web elements, browsers, virtual machines, version control systems, and UiPath components such as Studio, Orchestrator, and Robots.
Topic 3	• CI • CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI • CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.
Topic 4	• UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.

Topic 5	• UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 6	• UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:

Test UiPath-TAEPv1 Centres & Reliable UiPath-TAEPv1 Source

Using our UiPath-TAEPv1 practice engine may be the most important step for you to improve your strength. You know, like the butterfly effect, one of your choices may affect your life. And our UiPath-TAEPv1 exam questions are definitely the exact effect that will change your life. In fact, our UiPath-TAEPv1 Study Materials have been tested and proved to make it. Many of our customers gave our feedbacks to say that our UiPath-TAEPv1 training guide helped them lead a better life and brighter future.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q84-Q89):

NEW QUESTION # 84

What happens once a Test Set execution starts in Test Manager?

- A. A Test Case log is created for each executed Test Case, and an empty test result entry is added to an unnamed test execution container.
- B. A test execution container is created without a name, and an empty test result entry, called a test case log, is added for each Test Case.
- C. An empty test result, called a Test Case log, is created, but no test execution container is formed.
- **D. A test execution container with the same name as the Test Set is created, and for each Test Case, an empty test result entry, called a test case log, is added.**

Answer: D

Explanation:

Once a Test Set execution starts in UiPath Test Manager, a test execution container with the same name as the Test Set is created. Additionally, for each Test Case in the Test Set, an empty test result entry, called a test case log, is added. This structure helps track the execution results for each individual test case under the overall test set.

NEW QUESTION # 85

What is application testing in the context of UiPath?

- A. An application testing creates test cases that verify RPA workflow outputs.
- B. An application testing works with large data sets to verify workflow execution and covers corner cases.
- **C. An application testing executes an RPA process and verifies the results.**
- D. An application testing invokes different test frameworks and retrieves the results.

Answer: C

Explanation:

In the context of UiPath, application testing refers to executing an RPA process and verifying the results to ensure that the application

or workflow behaves as expected under various conditions.

NEW QUESTION # 86

What are the possible scenarios where Test Manager API can be used to integrate UiPath Test Manager with other tools?

- A. Fetch results into external tools.
- B. Synchronize test sets with external automations.
- C. Create requirements in external tools.
- D. Assign test cases to external automations.

Answer: A

Explanation:

The Test Manager API can be used to fetch test execution results into external tools, enabling integration with dashboards, reporting systems, or other ALM platforms for analysis and traceability.

NEW QUESTION # 87

There is a test case that performs multiple verifications.

How can the test case be configured so that the execution stops when a verification fails?

- A. Use a Terminate Workflow activity after each verification.
- B. Set the property ContinueOnFailure of the Verify activities to False.
- C. Use a Stop Job activity after each verification.
- D. Set the property ContinueOnFailure of the first Verify activity to False.

Answer: B

Explanation:

To ensure that the test case stops execution when a verification fails, you should set the ContinueOnFailure property of the Verify activities to False. This way, any failed verification will halt the test case immediately.

NEW QUESTION # 88

What is the sequence of execution of the main blocks of a Test Case that has Test Automation Framework attached?

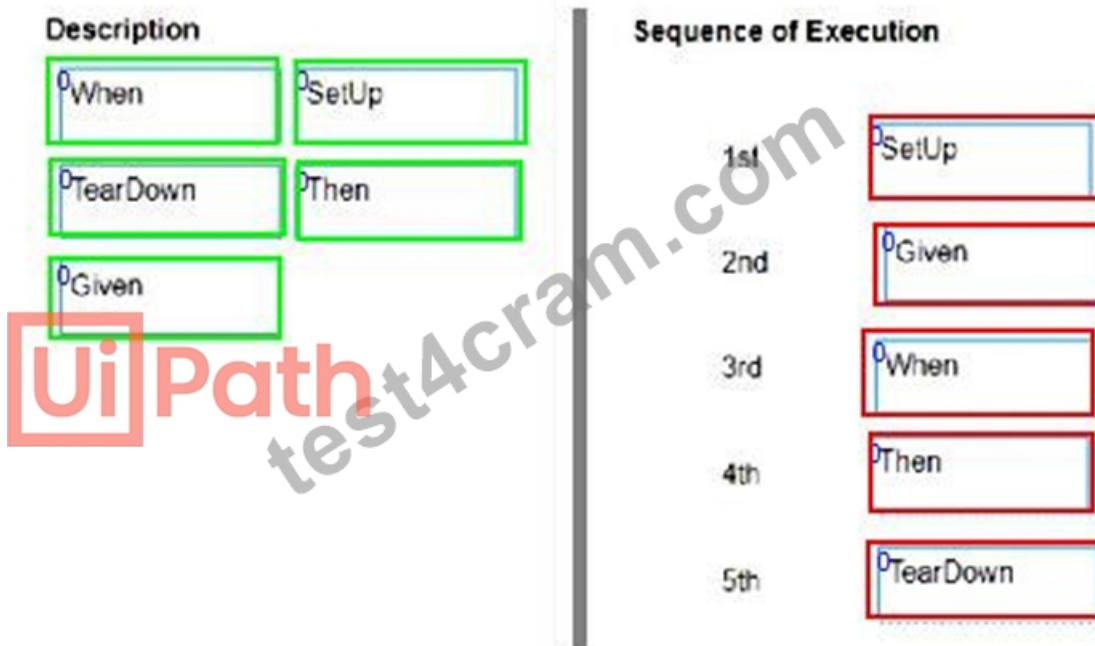

Instructions: Drag the Description found on the left and drop on the correct Sequence of Execution found on the right.

Answer Area

Description	Sequence of Execution
When	1st
TearDown	2nd
Given	3rd
SetUp	4th
Then	5th

Answer:

Explanation:

NEW QUESTION # 89

.....

As you know, we are now facing very great competitive pressure. We need to have more strength to get what we want, and UiPath-TAEPv1 exam dumps may give you these things. After you use our study materials, you can get UiPath-TAEPv1 certification, which will better show your ability, among many competitors, you will be very prominent. The 99% pass rate is the proud result of our study materials. If you join, you will become one of the 99%. I believe that pass rate is also a big criterion for your choice of products, because your ultimate goal is to obtain UiPath-TAEPv1 Certification. In UiPath-TAEPv1 exam dumps, you can do it.
