D-NWR-DY-01 Torrent Pdf & D-NWR-DY-01 Latest Vce & D-NWR-DY-01 Valid Study Material

If you are confusing while preparing for your test, you can choose to trust our information resource and experienced experts rather than waste a lot of time on learning aimlessly. Our EMC D-NWR-DY-01 exam guide materials are edited by professional experts based on latest and exact information about the real test. Generally the passing rate is high up to 99.79%. If you want to pass exam as soon as possible, our D-NWR-DY-01 Exam Guide Materials will be most useful product for you.

EMC Dell NetWorker Deploy v2 Exam Sample Questions (Q386-Q391):

NEW QUESTION # 386

An EMC NetWorker administrator created a backup schedule consisting of a full backup every Sunday, an incremental on Monday, and a cumulative incremental on Wednesday. All clients are backed up according to this schedule every evening. The backup client has two files, A and B, on Sunday.

Files C and D are created on Monday, file B is deleted on Tuesday. All file activity occurs during the day. On Friday morning, the administrator wants to restore this client to a point-in-time of Thursday morning.

Which operation(s) will be required?

- A. Two recoveries using the full backup and the cumulative backup

- B. Two recoveries using the full backup and the cumulative backup, and then a manual deletion
- C. Three recoveries using the full backup, the incremental backup, and then the cumulative backup
- D. One recovery using the cumulative backup

Answer: B

NEW QUESTION # 387

Which daemon controls the library resources?

- A. nsrctld
- B. nsrlcpd
- C. nsrmmdbd
- D. nsrmmmd

Answer: B

NEW QUESTION # 388

Which three features of CloudBoost provide replication to the cloud services? (Choose three.)

- A. Low-cost cloud object storage for all backup copies
- B. Fast restore from long-term, in-cloud copies
- C. No on-premises infrastructure required
- D. Fast restore from short-term, on-premises copies
- E. encryption, and compression before transfer to the cloud

Answer: A,C,E

Explanation:

Deduplication, encryption, and compression before transfer to the cloud CloudBoost performs inline deduplication, compression and AES#256 encryption on the client side (or in#appliance) so that only minimal, secure data is sent to the cloud object store.

Low#cost cloud object storage for all backup copies

All backup copies - both short#term and long#term - are written to inexpensive, deduplicated cloud object storage (e.g. AWS S3, Azure Blob, ECS), driving down retention costs.

No on#premises infrastructure required

You can deploy CloudBoost as a virtual appliance directly in public clouds (AWS, Azure, VMware), so no dedicated on#prem hardware is needed to replicate backups into cloud services.

NEW QUESTION # 389

Which EMC NetWorker software component is responsible for storing metadata in the form of hash IDs for a deduplication backup?

- A. NetWorker client
- B. Storage node
- C. Deduplication node
- D. NetWorker server

Answer: B

NEW QUESTION # 390

What happens when an EMC NetWorker file type device becomes full while backups are running?

- A. Backups span to another volume.
- B. Backups fail; simultaneous restore jobs continue.
- C. Backups are paused; the oldest save sets are staged.
- D. Backups are paused; aborted and expired save sets are deleted.

Answer: A

NEW QUESTION # 391
