Valid ZDTA Exam Labs, 100% ZDTA Exam Coverage

We have dedicated staff to update all the content of ZDTA exam questions every day. So you don't need to worry about that you buy the materials so early that you can't learn the last updated content. And even if you failed to pass the exam for the first time, as long as you decide to continue to use Zscaler Digital Transformation Administrator torrent prep, we will also provide you with the benefits of free updates within one year and a half discount more than one year. ZDTA Test Guide use a very easy-to-understand language.

Zscaler Digital Transformation Administrator Sample Questions (Q70-Q75):

NEW QUESTION # 70
A user is accessing a private application through Zscaler with SSL Inspection enabled. Which certificate will the user see on the browser session?

- A. Real Server Certificate
- B. Zscaler generated MITM Certificate
- C. No certificate, as the session is decrypted by the Service Edge
- D. A self-signed certificate from Zscaler

Answer: B

Explanation:
When SSL Inspection is enabled and a user accesses a private application through Zscaler, the user will see a Zscaler generated MITM (Man-In-The-Middle) Certificateon their browser session. Zscaler intercepts and decrypts SSL/TLS traffic at the Service Edge and then re-encrypts it before forwarding it to the client, presenting its own certificate to maintain the security of the connection while enabling inspection.
This allows Zscaler to inspect encrypted traffic for threats and policy enforcement transparently without exposing the original server's certificate. The study guide clarifies this mechanism under SSL Inspection details.

NEW QUESTION # 71
What is the recommended minimum number of App connectors needed to ensure resiliency?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:
The recommended minimum number of App connectors to ensure resiliency in Zscaler Private Access is2.
Having at least two App connectors provides redundancy, so if one connector fails or is unavailable, the other can continue to provide access without interruption. This recommendation is critical to maintaining high availability and fault tolerance for internal application access.
The study guide specifies this minimum to ensure continuity and reliability of application access through ZPA.

NEW QUESTION # 72
Which list of protocols is supported by Zscaler for Privileged Remote Access?

- A. RDP, DNS and VNC
- B. RDP, SSH and DHCP
- C. RDP, VNC and SSH
- D. SSH, DNS and DHCP

Answer: C

Explanation:
Zscaler supportsRDP, VNC, and SSHprotocols for Privileged Remote Access. These are commonly used protocols for remote management and privileged user sessions, allowing secure access to internal applications or systems without exposing the network or requiring VPN connections.
The study guide clearly states that Privileged Remote Access capabilities focus on these protocols to ensure secure, monitored, and

controlled remote sessions for administrators and privileged users, supporting remote desktop and shell access securely .

NEW QUESTION # 73
What method does Zscaler Identity Threat Detection and Response use to gather information about AD domains?

- A. Analyzing firewall logs
- B. Scanning network ports
- C. Packet sniffing
- D. Running LDAP queries

Answer: D

Explanation:
Zscaler Identity Threat Detection and Response gathers information about Active Directory (AD) domains primarily by running LDAP queries. LDAP queries allow the system to retrieve user and domain information directly and accurately from the AD infrastructure, enabling detection and analysis of identity threats and suspicious activities.
The study guide highlights the use of LDAP queries as a reliable and standard method for accessing AD domain data in this security context.

NEW QUESTION # 74
Which of the following scenarios would generate a "Patient 0" alert?

- A. A new malicious file was detected by the sandbox due to an "allow and scan" First-Time Action in the sandbox policy.
- B. Zscaler detected a HIPAA violation with in-band Data Protection scanning.
- C. A new malicious file was detected by the sandbox due to an "quarantine" First-Time Action in the sandbox policy.
- D. Zscaler's AI/ML based Smart Browser Isolation was triggered due to a users accessing a newly- registered domain.

Answer: A

Explanation:
A "Patient 0" alert fires when the first instance of a previously unknown file slips through (under an "Allow and Scan" first#time action) and is later classified as malicious by the sandbox, identifying that initial download as the zero#day event.

NEW QUESTION # 75
......

By using the PassLeader ZDTA valid exam lab questions, there is no need to purchase anything else or attend expensive training. We promise that you can pass the ZDTA certification at the first try. We will update our questions and answers in time after thoroughly analysis of latest real exams, so the ZDTA Exam Dumps shown front of you is the latest and valid. Besides, we offer you one year free update Zscaler study dumps after your purchase.
